CLOSER TO WAR THAN EVER YET

The Move That Was Made Yesterday May Prove It

Says Washington

Washington, April 14.—While the opinion of those best informed, was that such serious steps as military intervention may not be required to force Huerta to yield from his position on the question of a ratification, they recognized today developments carried the situation closer to real hostilities than it ever has been during the three years of turmoil in Mexico.

Inquiries for further information were pressed at the White House, but the president took the position that there was nothing further to announce or explain; that the American flag had been affronted and that a demand for a salute in satisfaction had been made.

Though he hopes sincerely the gravity of the situation will be removed by satisfactory action on the part of the Huerta Government, it is known that Mr. Wilson had considered all phases and possibilities, and is prepared to meet them with a firm hand.

A large number of our people attended the singing at Guthrie Grove last Sunday and reported a pleasant time.

When the writing of this, we positively will not have more to say on liquor question unless circumstances make it absolutely necessary, and we do not think they will. Personally, we do not care if there is never another drop of intoxicating liquor sold in South Carolina, but as many others, of the two evils, prohibition that does not prohibit or dispensary, we choose the lesser, and that is the dispensary.

We know that some great moralists preach of surrounding the boys and young men with temptation and all that. Great God, what is any worse than to have it so that the boy can step almost to any negro house and buy a pint of whiskey at any time that he wants it. The Cross Roads correspondent made a slight, though unintentional mistake. The writer from that place said that half the negroes were selling liquor and no one got any profit out of it. We all know what was meant by this statement, yet there is a tremendous profit for the seller. They buy their supplies from men who sell and ship in pints at \$2.00 to \$2.50 per gallon and then sell it at 75c to \$1.00 a pint. That is a profit of from \$4 to \$6 a gallon. Does that look like profit, and is it any wonder that it is impossible for a farmer to hire a negro to do a week's or a month's work for him in the busy crop time. Especially the town negro; hadn't they rather violate the town law by selling liquor and paying a small fine imposed by the courts than to go out in the country and work for an amount per month that he could make in a few days selling liquor. And the negroes are not all who sell liquor either. There is about as much sold by the white people as by the negroes, and by some, perhaps, who would not be suspected. We recently heard of a man stopping at a hotel in a town in this state asking a negro who was working about the place if he couldn't get him some booze. The negro told him that he would get him some, but that the keeper would tell him what he wanted.

Any one will tell you that whiskey is going to be sold in some form or other as long as the world stands. By on those who are opposed to the sale in any way say this. This being admitted, what is the remedy? We suggest the following:

The dispensary with the proper safeguard thrown around it. A chiefing sentence for all who are convicted of selling in violation of the law. A national law that will not conflict with the inter-state commerce prohibition the shipping of liquor to any one who is not an authorized agent. Any farmer who works hired labor can tell whether or not the indiscriminate selling and drinking of liquor demoralizes labor.

The construction of two tank cars, especially equipped for fire fighting, is a new departure of the Canadian Pacific railroad.

USE THE NAVY FOR COMMERCE

Bill to That Effect Was Introduced in Congress By Senator Weeks Yesterday

Washington, April 14.—Feasibility of establishing a line of naval cruisers to carry passengers, mail an freight between the United States and South America was endorsed by Secretary Daniels today in a report to the senate on a resolution recently introduced by Senator Weeks. The committee on naval affairs immediately introduced a bill to establish one or more such lines.

It is the plan to use in time of peace such swift scout cruisers as are little needed in fleet maneuvers.

The mail ships would be commanded by retired officers at the discretion of the navy department which also would fix rates and fares.

In his letter to Chairman Tillman of the naval committee, Secretary Daniels said:

"It is practicable, by the use of naval vessels, to carry out the purpose indicated in the resolution and the following vessels will be available for the service: St. Louis, Charleston, Milwaukee, Columbia, Minneapolis, first cruisers; Salem and Chester, first scout cruisers; Buffalo and Rainbow, transports; Ancon, Cristobal and Hector, Panama steamers; Mars, Vulcan, Cyclops and Neptune (or two equally good) and the Nan Shan Colliers."

There is no use "beating around the bush." We might as well out with it at last. We want you to try Chamberlain's Cough Remedy the next time you have a cough or cold. There is no reason so far as we can see that you should not do so. This preparation by its remarkable cures has gained a world-wide reputation, and people everywhere speak of it in the highest terms of praise. It is for sale by Evans' Pharmacy.

HOME ECONOMICS TO BE DISCUSSED

Important State Convention To Be Held at Winthrop College In May

Miss Mary E. Frayser, who is so pleasantly remembered in Anderson for the words of wholesome advice she gave the women last summer, announces an important meeting at Winthrop, where she is the head of the "Home Economics Extension Department." She has issued the following announcement to the women of South Carolina—and it is given to the public through Miss Mangle M. Garrison, supervisor of rural schools for Anderson county, whose work here is well known:

"Winthrop College invites you to attend the first two-day session in Home Economics in this state."

"The meetings will be held in the Home Economics Department of the college, May 7-8. Class and laboratory instruction will be given in the selection of foods, principles of cooking, sewing, home furnishing and decoration. Such practical problems as diets in health and sickness will be discussed. Labor-saving methods of doing the work of the home will be demonstrated, as well as labor-saving apparatus for household use."

"One morning will be devoted to methods in dressmaking with the demonstration of the use of and alteration of patterns to suit the individual."

"There will be demonstrations of the use of the cheaper cuts of meat, of bread and of cake making. Simple tests for food and textile adulterations and the removal of stains from linen will be shown. The offerings will be varied; but all will bear upon the woman's problem of better homekeeping."

"It is hoped that every rural school improvement association and every woman's club in the state will send at least one representative to this meeting."

"The delegates will be the guests of Winthrop College. All interested in this course are invited to be present. No preparation in the way of training is required. Should you elect to come, you will be met at the train, and every effort made to make your stay pleasant and profitable."

"Each woman planning to go is requested to notify Miss Frayser."
