CROSS, FEVERISH CHILD IS BILIOUS OR CONSTIPATED

Look, Mother! If Tongue is coated give "California Syrup of Figs."

Every mother realizes, after giving her children "California Syrup of Figs" that this is their ideal laxative, because they love its pleasant taste and it thoroughly cleanses the tender little stomach, liver and bowels without griping.

When cross, irritable, feverish or breath is bad, stomach sour, look at the tongue, mother! If coated, give a teaspoonful of this harmless "fruit laxative," and in a few hours all the food, constipated waste, sour bile and indigested food passes out of the bowels, and you have a little, playful child again. When its little system is full of cold, throat sore, has stomachache, diarrhea, indigestion, colic—remember, a good "inside cleansing" should always be the first treatment given.

Millions of mothers keep "California Syrup of Figs" handy; they know a teaspoonful today saves a sick child tomorrow. Baby's Happiness Depends on Health

Cross, fretful babies usually need a laxative to make them comfortable, and comfort begets happiness. Constipation is the cause of much discomfort. Mothers should watch closely the condition of their children's bowels and see that they are regular.

A mild, pleasant tasting laxative such as Dr. Caldwell's Syrup Pepsin, is ideal for children because of its natural composition and gentle action, and because it contains no opiate, narcotic or other harmful habit-forming drug. Dr. Caldwell's Syrup Pepsin is sold by druggists everywhere. A teaspoonful at bedtime will bring easy, certain relief.

A free trial bottle can be obtained by writing to Dr. W. B. Caldwell, 452 Washington St., Monticello, Ills.

News From Seneca

This City to Have 24 Hour Electric Current.

SENECA, Feb. 27.—For some time the business men of Seneca have realized that our town is seriously handicapped by not having a twenty four hour electric current, and there has been much talk of late on the streets about it. It was felt that this was a useless handicap when there were three separate plants from which a continuous supply might be available.

The town of Seneca owns an electric plant which supplies lights to the town and residence, the Coneross Power company is a locally controlled concern having a plant on the Coneross Creek about four miles south of Seneca, and the Southern Power company has a line passing directly through our town. It was felt that with all these possible sources of electricity that it was positively inexcusable not to have a twenty four hour current available for all purposes. And now it is reported that active steps are being taken to make some arrangement for this long felt need.

Sheriff Davis Captures a Still, Its Operators and Products.

Sheriff Davis was in town for awhile yesterday, and related interestingly to your correspondent the account of the way in which he captured a still, its operators and products Thursday night on L. Verner's place near the Tugaloo river on the back side of the county. The sheriff had gotten wind of their operations and with one of his deputies, Fred Brown, went over to that side Thursday afternoon. He says that he crawled right up to them and watched them for some time in the actual operations. He says that this is the first time he has ever taken a crowd in the very act, that he has frequently gotten there just after they got through, or just as they were starting up, but this time he watched them for some time in the actual process. He watched them build up their fire and test their pot, all unconscious that the eyes of the law were looking down upon them. When they had tried of watching this interesting process they jumped right into the still and each grabbed his man in the collar and threw him down. They were taken so completely by surprise that they easily surrendered. They captured several gallons of the finished product and destroyed several barrels of beer and mash and quite a quantity of meal. The sheriff said everything indicated extensive operations.

One of the men captured whose name is Langston, was only a boy. They were lodged in Walhalla jail.

Quite a number went to Walhalla from here today to attend the County Convention at the Sunday School Convention, Mrs. W. J. Lunney, Mrs. W. F. Reid, Mrs. S. K. Denny, J. V. Norman and L. F. Wallace, and Misses Norma McCallist and Julia Harper were among the number.

Mrs. Smith has conducted an up-to-date and popular milliner establishment here for several years and her leaving will be a great loss to the town.

Fertilizer Facts No. 17 WAR and DIVERSIFICATION

Soil fertility represents capital, and must be maintained if we expect to reap a constant income from the soil.

Not to apply at least as much plant food to the soil each year as we take off with the crop is to diminish our farm capital.

Diversification is a method of farming by which we do not have to depend on one source or crop for our entire income. It means that we must put more into the soil and get more out of it.

What to put into the soil? Intelligence and plant food combined and well mixed. A diversity of crops all of them usable and salable.

Crop rotation is a part but not all of diversification. The sale of our farm crops may mean slow suicide, especially if we sell more plant food in the crop than we apply in the form of fertilizers and barnyard manures.

Do you haul the leaves from your forest and fail to return something for your trees? That is poor policy if you expect to maintain your forest. So it is with taking more from the land in the form of crops than you put back.

An investment of \$4.25 in fertilizer for cotton per acre, made a gain in produce of \$9.00, or a net gain over cost of fertilizer of \$4.75. On a hundred acres this would be a very great saving to the farmer.

Truck crops will net from \$50 to \$100 per acre when you apply from one to two thousand pounds of fertilizer to the acre.

Clean your slate and get ready for another year. You will feel better and make bigger crops in 1915.

Your motto should be live and let live. All of us are trying to do this. Co-operate with all the agencies that are trying to bring about a better Agriculture for the South. Give an impartial hearing to the press and Agricultural lecturer as well as to the work of corporations and associations and societies.

The South is now beginning an era of her greatest prosperity. Join in the movement and make a success of it. You will be proud of yourself and your sunny southland. Business is already "picking up." Write for Bulletin No. 6, "FARMING IN WAR TIMES—WHAT TO DO ABOUT IT."

The Anderson Guaranty & Trust Company. Now if you have money on hand you can invest it, increasing your income by getting first class 8 per cent paper. This beats 4 per cent. We are of the opinion that our legislature next year will pass a 6 per cent law in this State, but if you have a contract for a number of years at 8 per cent you are safe. Our plan is to bring the people who want to loan and the people who want to borrow together so you won't have to wait for some one in your neighborhood to want money, just get in line and let us know your wants and we will see what can be done about getting what you want. Anderson County mortgages are better than you can get anywhere on earth.
