Uncle Dave's Letter

The current Banker-Farmer, published by the agricultural commission of the American Bankers' Association for the purpose of fostering closer relations and a spirit of cooperation between the financial and agricultural interests, offers on its cover page a creed which it calls, 'The New Banker.'

No man believes in fighting harder for a principle than I do. I yield to none in determination to advance the right, as I see it, so far as I can. Yet in my honest opinion the tax payers of Anderson county will make a big mistake to vote for this \$750,000 road tax for Anderson county.

A rare and truthful book could be written upon the "High cost of living," but what's the use, when the entire work could be condensed into the one word, "Theft." People steal more nowadays, and more of them are at it.

GREATER THAN EVER BEFORE

Quantity of Cotton Seed Crushed Exceeds 1911 Record Crop By 572,826 Tons

WASHINGTON, March 18.—Further progress this season in the remarkable development of the cotton seed products industry was indicated in today's census bureau report on cotton seed crushed and linters obtained from the 1914 crop.

A greater quantity of seed than ever before was crushed, exceeding the 1911 record crop crushing by 572,826 tons, and a record was established in the number of bales of linters obtained, which totalled 146,117 bales more than last year.

As 70 to 75 per cent. of the total production of cotton seed is crushed annually, it is estimated the 1914 production of seed will reach 7,000,000 tons. Its value has not been estimated, but the 1913 production, 6,305,000 tons, had a total value of \$155,500,000 in oil, cake and meal, hulls and linters.

Cotton seed crushed from the 1914 crop was 5,493,899 tons, against 4,767,802 for 1913, and 4,579,508 for 1912. Total linters for the crop 772,270 running bales, against 631,153 for 1913 and 602,324 for 1912.

Table with columns: State, Seed Crushed, Linters Obtained. Includes Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, Missouri, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, and All other States.

United States totals include 68,715 tons of seed estimated to be crushed and 95,300 bales of linters to be obtained after the date of the March canvass.

MARKET REPORT

New York Cotton.

NEW YORK, March 18.—Cotton was less active today with prices easing off under liquidation and selling for a reaction.

Private cables reported realizing in a narrow market at Liverpool, and the opening was at a decline of 4 to 5 points. Reactionary sentiment also was encouraged by the census report indicating the supply of 1914 linters was a little over 772,000 bales compared with 631,000 last year, but selling was restricted by continued large spot sales in Liverpool, and the steady ruling of southern spot markets late yesterday.

The market showed a fairly steady tone during early trading and prices rallied from the opening on spot house buying of May against sales of later months, some scattered covering and a little Wall Street buyings. Offerings increased slightly around closing figures of yesterday, however, and the market turned easier again during the afternoon on southern selling and reports of a lower spot market at New Orleans.

On the basis of today's report on linters, some of the local traders were talking a census report next Saturday indicating a total growth of lint and linters in the neighborhood of 17,000,000 bales.

New Orleans Cotton.

NEW ORLEANS, March 18.—The cotton market was slow and hesitating today. Profit taking from the long side was against prices, and buyers were not aggressive and buyers were encouraged by reports of smaller spot inquiry in the interior and by the drop of 13 points in local spot quotations. In spite of all this the market had very little selling power and made several rather sharp recoveries from the decline.

The question of acreage caused much discussion and it was evident that not a few longers were withdrawing from the market because they feared a further advance at this time would result in more extensive planting than has been advocated.

Cotton Seed Oil.

NEW YORK, March 18.—Cottonseed oil was firm today despite the bearish census report on the crush, owing to support from refiners, light offerings generally and local professional buying on the strength in hard and grain. Closed 2 to 12 points net higher. Sales 5,600.
