Notwithstanding the fact that there was no improvement in Anderson's cotton market yesterday, the farmers of the county are in good heart as a result of the recent advances and they are determined to hold on to their cotton until it sells for 10 cents, come what may. The market price in Anderson yesterday was nine and one-quarter cents and practically no cotton was marketed at that figure. Possibly five or six bales were sold.

The summer rates which the Piedmont & Northern railway have been offering over its lines during the months of June, July and August have gone out of effect and no more will the gay excursionist ride on the one fare basis, that is until next summer. NOW IS THE TIME FOR SOWING GRAIN AND THE

COLE Three-Furrow GRAIN DRILL

Is The Proper Implement with which to do it.

It is generally conceded that wheat and oats planted between September 15th and September 30th have fifty per cent. better chance of a maximum production than that which is planted later. This is true for the reason in a large measure, that May is usually a dry month and cuts the grain off.

Then again, it is imperative to plant grain crops early, so they can be gotten off earlier in the spring, and a corn and pea crop planted on the same land, thus giving two money crops from the same land in one year.

PLANT YOUR GRAIN NOW WITH A COLE GRAIN DRILL.
