(Baltimore American.)

Messrs, Baitors: I seldom appear publicly in print, but the facts connected with my experience which follow are so striking, and bear so closely upon the experience of others, that I venture to reproduce them entire:

In the month of September, 1879, I was summer had been excessively hot and everybody was complaining of being ex. hausted and feeling tired, It was not an unfrequent occurrence to have patients ask for something to relieve this weary sensation, and that I should also partake of the same universal lassitude or weakness, did not alarm me, I supposed that over-work and exposure had produced a temporary physical prostration; therefore I made a trip to St. Paul, Minn., thinking that a few weeks in a cooler climate would soon reinvigorate me. Little did I dream. however, what was in store for me. Atter getting settled in my new quarters 1 took a short walk every day, and patiently awaited a return of strength, but in spite of all my efforts I seemed to be losing strength; and even any slight exercise became laborious and tiresome. During this time I had frequent dull aching pains in my head and through my back and hips, occasional shooting pains in various parts of the body, with sereness, shortness of breath, and palpitation of the heart. My feet and hands would be like ice one day, and burn with heat the next. I had no desire for food. and what I did eat distressed me; my sleep became disturbed with the frequent desire to urinate. The quantity of fluid passed would at one time be small and at another quite profuse. Then for days I would be perfectly 'ree from this desire and nothing seemed to be the matter: nevertheless my debility gradually increased. My eyelids fed out; my bowels were alternately torpid and too active, the urine would be clear some days, on others it would be of high color and deposit a black dust sediment, and at still others there would be a whitish appearance and a thin greasy scum would rise to the top, The pains in my head, back, chest, joints, bowels and bones were horrible in the extreme. I went in vain from place to place and consulted the best medical authorities the country affords; I would have a chill one day and a burning fever the next. I suffered excruciatingly with a numbness of my feet and hands, and at the base of the brain and between my shoulders; at times my limbs and body would bloat and physicians said I was suffering from the dropsy and could not recover. How I could be so blind to the terrible

trouble that was devouring me, I do not know; but there are thousands to-day who are suffering from the same cause and are as ignorant of its nature as I was. My skin was the color of marble at one time, and then again it would be like saffron, and this terrible restlessness, and I might say wildness, was followed by a dull, heavy, drowsy sensation. I was wasted to a merskeleton except when the dropsical bloat occurred. I tried all the celebrated mineral waters of this country and Europe; all kinds of medicine and all kinds of doctors. Still no help came. I lay at my hotel in Philadelphia, where I was temporarily sojourning, given up by friends and physicians alike, when there providentially came into my hands a little pamphlet which I carefully read, and from which I got a view of my real condition, which no other agency had revealed. Acting on its advice, I had my water analyzed at once, and to my surprise, albumen and tube casts were found in large quantities, A skillful physician was sent for and apprised of the fact. He said I had Bright's Discase, and that death was certain. My therefore laid aside my prejudice and commenced its uso. At first my stomach rejected it and I had to use small quantities; but after the first five days my stomach retained full doses. This was one year ago last October, and my improvement was rapid and permanent. I have regained 50 of the 65 pounds of flesh I lost during my illness, and I feel as well to-day as I ever gid, and I can unreservedly state that my life was saved by Warner's Safe Kidney and Liver Cure, the remedy I used.

It may seem strange that I, being a physician and an ex-army surgeon, did not have the water analyzed before: but such is the fact. I had the symptoms of every other disease, and I did not suspect that my kidneys were in the least particular out of order; and here is just where I was in the greatest danger, and where most people who read this article are in danger. I find that I am only one of thousands who are suffering from kidney disorders, which neglected, surely terminate in Bright's discase. I also know that physicians may treat these disorders for months without knowing clearly what the trouble is, and even after ascertaining the cause, be unable to prevent it. When death, however, finally overtakes the helpless victim they disguise its real cause, attributing it to heart disease, convulsions, apoplexy, verugo, paralysis, spinal meningitis, blood and uremic poisoning, etc., etc.

Words, of course, fail to express my thanks to H. H. Warner & Co., of Rochester, N. Y., for giving the world such a needed and certain specific as the Sate Kidney and Liver Cure, but such as they are I gladly give them; while to the thousands to whom I have lectured upon the laws of health and hygiene I commend this letter most cordially, and warn them to beware of the insidious nature of a discase over which physicians confess they have no control and which in one form or another, is carrying more people to untimely graves than any other malady.
J. M. PORTER, M. D.

Baltimore, Md., 91 Saratoga street.

A Southern exchange gives a plan for sheep are allowed to run through a narrow chute; the counter stands where he can check the run of sheep, and has a string of ene; as fast as 100 sheep pass, a button is moved to the other end.

Of a hundred peas preserved in the free air by Messrs. Van Tieghem, and Gaston Bonnier ninety afterward germinated; of a hundred melosed with air in a sealed tube only forty-five, while of a like lot kept in carbonic acid gas rone grew. Similar re- for an orchard must be kept in good consults were obtained with other sceds, showing clearly that all seeds should be stored where pure air may have access to them.

To draw a load on a sand road requires a power equal to one-fifth the weight of the load, an ordinary earth or dirt road reduces this, approximately, one haif, while a clay bed read again reduces a half, good cobbles require a thirtieth equivalent, while American Belgian blocks necessitate a fortieth. Asphalt is calculated as requiring one hundred and fortieth, while the leverage on an ordinary railroad is but one two hundredth. "Reducing this to practical horse power, one horse, on an ordinary rail, can draw a wagon weight that would require the power of twenty horses over a · is a valuable guide in close loading."

AGRICULTURE.

ADMINISTERINN DRUGS TO DOGS AND Pigs.—The following is the safest method of giving medicine to dogs in a liquid form Tie the mouth and have him held firmly. Then draw out the cheek, which acts as funnel, and pour down the fluid. It he clenches the teeth so as to exclude the liquid, but a bit of wood between them. In giving a bolus or ball, one person should hold the dog between his knees, the hinder practicing medicine in New Orleans. The part resting on the floor. Another person then torces open the mouth by pressing the forefinger and thumb of the left hand upon the lips of the upper jaw, and with the right thrusts the ball tar enough back toward the animal's gullet to insure its

ready passage to the stomach. To prevent disgust and sickness nauseous medicines should be enveloped in thin paper or in a thin flour wafer. Whenever possible the necessary medicine should be introduced into the food of the pig. this is impossible small pigs may be drenched by seizing them by both ears, placing them between the legs, and lifting them a few inches from the ground. The medicine, previously mixed, is gradually poured into the mouth from an iron spoor by another person, the elevation of the lead causing the mixture to pass backward, and thus be swallowed. For large pigs, the operator can hold the head firmly between his knees, while an assistant secures the hinder portions. The first, lifting the heart a little, turns it somewhat to the right, separates the hps on the right side, when he can pour the contents of the horn or bottle into the angle of the mouth. Or again, the animal may be secured by a unning noose to a rost, and then be drenched by a single person.

The tortilla is a kind of bread used by the Mezas (we Americans call them Mayaz), the aboriginal natives of Yucatan. It is cake made of crushed corn, which is first boiled, then soaked in lye to soften the husk, then repeatedly washed in water, with which it is ground into a paste on ones, "metates" which are said to be the same as those used in ancient Egypt. Thin, circular cakes, about six inches in diameter, are made of this paste, about oneeighth of an inch thick, and baked, or rather 'heated through," on an iron slab, and they are eaten with ground chill pods or red peppers. It is interesting to know that the people who cat this kind of bread men and women, are exceedingly clean in their habits and amazingly honest. They are said to be quick to learn.

PR FRES R KNAPP, of the Iown Agricultural College, writes, saying that "taking the best specimens of each breed of cattle and carefully comparing them 1 cannot see for beef purposes, one has very much advantage over the other. I have seen Polled Angus heifers, at 2 years old, weigh 1800 pounds. These were selected in England and imported. Both Herefords and Short-horns have equaled it, and I venture the assertion that, if an equal number of the best specimens of those breeds were selected and placed under the same conditions, there would be scarcely any difference in the profit for beef. There is no sense in paying \$1260 for a Polled Angus heifer when an equally good Shorthorn can be bought for onesixtn the money.

THE duty of fumigating green houses is one of such an unpleasant character that it is often replected, to the injury of the lants. A French horticulturist has made discovery which will render it unnecessary to use smoke for the purpose. He recommendation would be its cheapness, at the factories.

Do not forget that swales, swamps and any wet land with hard pan near the surface pays very small interest, If any, in their present condition. If drained three feet deep with tile they will pay a very large interest on the original cost, and on the drainage besides. It is not unusual to get back the cost of dramage in 2 crops after the tiles are laid. Where tiles can he had near, or at a cost for freight not caeaper to drain with tile than with stone. upon the ground, use these. Dreining will open a new world to the farmer who has never tried it. Put down the "crockery" draw a good interest.

A "o RN of wheat" is a little thing, but marvelously complex. Through the centre of the kernel tups a groove, so that a iorizontal section is heart shaped. Under glass we see that it is very composite in structure. The cutside layer or cuticle, which forms the bran, is comprised mainly of silex, the mineral base of sand, which by means of the potash in the soil is made soluble, and is carried by the little veins of the wheat plant and deposited with the woody tissue. The nutriment in this tilple coat is not digestible by the human stomach, but is excellent for cattle. The ayer next the inside this is styled gluten. This is a complex substance and in the highest degree nutritious, especially to the muscular tissues of man.

An Illinois horticulturist has constructed a fruit house, which is to be a protec- ing, then insert it in the neck of a tion alike from summer's heat and winter's small bottle and on pouring cold water cold. Two twws of po ts are set in the upon it, it will assume its former figure ground, two and a half feet apart, boarded up inside and out and the intervening pace filled up with straw, packed in as closely as possible. Two sets of rafters counting sheep somewhat as follows: The are put on, the upper set three feet above the lower, which are boarded on upper sides and the space closely packed with straw, after which a cheap board is put on, tightly-fitting leather buttons, all at one On the 11th of last August, with the temperature 98 deg, in the shades, in it was as cold as an ice-house, and contained a quantity of apples as sound as when taken from the trees ten months before,

A successful fruit grower thinks that many apple trees are set too near together; two rods apart is near enough. The land dition. He top-dresses his orchard once in three years, principally with a thick coating of straw. He allows hogs to run in his orchard, and plows the land until the trees are so large as to interfere with such a practice. Last year he picked 45 barrels of Greenings from four trees. Or chards thrive best near bodies of water. Trees should be judiciously trimmed while young. Many trees are injured by overpruning. Trees should be grafted when they are from one inch to one and onehaif inches in diameter.

Australia presents the strange anomaly of choice breeding rams selling at \$1000 to \$2000 per head while mutton is worth 21 @8 cents per pound. There is evidently common dirt road, and of forty through a a wider gap over there between the appre-Jersey sand path. This simple proportion | ciation of wool and that of mutton than would seem to be reasonable or warranted. | courage the importation of machines.

DOMESTIC.

OAPE CLOAKS.—The novelty of the cordance with the better ideas of to-day. This cape cloak is useful and economical: the cape is not detached, but forms part of the cloak; it admits of a slight fully made in dark shades of cloth, and also in cashmere cloth in small palm patterns, with olive shades in them. l'hese should have a black velvet collar. Another cloak, an imported design, is a straight sack with mandarin sleeves and dark velvet collar. It is made in striped Chinese silk and wool stuffs with gold and black in them, the stripes narrow and indistinct; the lining is quited satin. Brocaded volvets and pressed plush are used for the outside of the richest garments, excepting the few made in very rich plain velvet, lined with splendid furs and clasped with precious metals. Naturally, of these there are his colleagues in the Government of the few. but they must be said to occupy danger of Bear Killers receiving two boun-

APPETIZING SANDWICHES. - Take equal quantities of the breast of a cold boiled chicken and of cold boiled tongue. Chop them very fine; so fine, in fact, that you cannot distinguish the separate particles. Add a good large half-teaspoonful of celery salt, a pinch of cayenne pepper and four tablespoonfuls of mayonnaise dressing. This quantity of condiments will be enough to season the breast of one large chicken and an equal quantity of tongue. When this is perfectly cold, spread some thin slices bread with butter, and then with this mixture. Do not prepare them till you are about ready to serve them. If you wish to take sandwiches for a lunch when traveling, be careful not to make the dressing quite so moist as you would if they are to be eaten at home. The better way, if you do not object to the trouble, is to put the salad filling in a small glass jar, and spread the sandwiches as you need them.

DEVILLED CRABS.—One dozen fresh crabs, boiled and pickled (or one can of tresh crab meat), quarter of a pound of fresh butter, one de sertspoonful of mustard powder, cayenne pepper and salt to taste. When canned crab is used, draw all the liquer from the meat into a bowl, and mix carefully with an equal quantity of fine bread crumbs. Work the butter to a light cream, mix the mustard well with it, then stir in very carefully a handful at a time of the mixed crabs and crumbs. Season to taste with cayenne and salt, fill the erab shells with the mixture, sprinkle bread crumbs over the tops, put three small pieces of butter upon the tops of each, and brown them quickly in a hot oven, They will puff in baking, and will be found very nice.

EVERY nouse-wife should know that sugar boiled with an acid, if it be but fluces that the vapor from boiling tobacco three minutes, will be converted into a juice is as efficacious as are the fumes of glucose, which is the form of sugar the burning weed. The method adopted found in sweet apples. One pound of is simply to mix a small quantity of juice sugar has as much sweetening power friends importuned me to take a remedy in the water and evaporate the whole. The water and evaporate the whole water and evaporate the wa house. Could not the same plan be ador - the fruit after it is cooked, and while ted against house flies and mosquitoes? Its yet warm will make the fruit as sweet for the juic : could be expressed from the while the fruit is boiling. Save your as two and a quarter pounds added refuse tobacco which is now thrown away ... ugar by a chemica! knowledge It is an established fact that If fruit is sweetened when it is hot it requires much more sugar than if sweet ned when

cold. ALCOHOL GOOD FOR BURNS,-The most cleanly dressing for a burn or scald is to saturate a soft piece of fabric with alcohol, lay it over the burn, then cover it with cotton or finely picked oakum. It may be thought, says the Boston Journal of Chemistry, that alexceeding their price at the kiln. It is cohol applied to a burn will produce more pain; but try it, and you will be If these are not available and stones are agreeably surprised to observe how all other means had failed. quickly it will allay the pain, Subsequently disturb the dressing as little as possible; wet the dressing occasionally this fall and make your capital in land with alcohol, and the result you will find better than by any other method.

A BAR-HARBOR Dish, -Take half a pound of salt pork, cut in small pieces, fry them till brown; take them ou, and in the fat thus obtained put a pound of haddock or of fresh codfish, half a dozen potatoes cut in thin slices, some erackers or pieces of hard bread broken in small bits, half a teacupful of sweet mik, a lump of butter the size of a small egg, and pepper and salt to taste: thicken with a little flour rubbed smooth with the butter. When the potntoes

are done serve. PUTTING AN EGG IN A BOTTLE,-To accomplish this scemingly incredible act requires the following preparation: You must take an egg and soak it m vinegar and in process of time its shell will become quite soft, so that it may be extended lengthwise without breakand hardness. This is really a curiosity, and baffles those who are not in the secret, to find out how it is acomplished.

ONE dram of carbolic acid, six drops of oil of lavender, and two and a half ounces of olive formed the presciption which proved effectual in destroying a parasitic affection of the moustache of a gentleman who consulted Dr. George Tkin, London, England. The hair had fallen out, and a sort of baldnes occurr. ed in spots, but after the application of the remedy the hair grew again as thick and healthy as bef ro the parasites had attacked it.

GELATINE FROSTING. -Soak one teaspoonful of gelatine in a tablespoonful of cold water till it is soft; it will take about half an hour to accomplish this; then dissolve it in two tablespoonfuls of hot water; stir in while still warm one cup of pulverized sugar; keep on stirring until the frosting is perfectly smooth. This is a quantity sufficient for the top of a large cake.

SHRIMP SALAD.—Peel the boiled shrimps and when thoroughly cold arrange them in a circle upon leaves of fresh lettuce. Pour some mayonnaise sauce in the centre and serve. Sometimes a tablespoonful of chopped parsley is added to the dressing for this

HUMOROUS.

THE stranger carelessly tucked away present season in outdoor garments is in his vest pocket the change of a \$5 a revival of the winter cloak of many note that a brooklyn bartender handed years ago, shaped and modified in ac- to him after serving a warm drink There was nothing strange in that, but subsequently the bartender said to the bystanders:

"I have made a customer of that draping at the back, and constitutes man. How? Why, as easy as rolling the sleeves, which partake of the doloff a log. I have given him a fifty-cent man or visite form. It is fitted in at piece with a hole in it. He'll come in the back, and therefore presents a neat | to-morrow when he's going by, politely and lady-like appearance, and may be call for a drink, inform me in the kind-serviceably made in cloth with a braided est manner that I have unintentionally trimming for border, and also down the put in on him a fifty-cent piece with a centre of the back, if that is liked. It hole in it. To all of which I will reply is a much more desirable form of cloak good-naturedly that I am really sorry, for the country, for church wear, and and ask the man to take a drink with for riding than the circular, which ex- me. We are both feeling quite satisfied poses the arms and chest. It is beauti- with each other, and there is no refusing. Reminiscences follow. The man spends three or four half dollars with me and then leaves, saying I am a jolly good fellow. I have bought all the perforated coms that I can lay my hands on. Business has increased thirty per cent, this week."

The Frederickton (New Brunswick, Can.) Reporter says: "Nobody can but admire the persistent enterprise manifested by the owners of St. Jacobs Oil in keeping the name before the public. It received a big send off in the House the other day by the Hon. Mr. Perley, who warned the first place, the cost being from \$500 | ties for one nose; the judicious use of the Oil causing rapid growth."

THE well-known Henry Erskine once met au acquaintance, a barrister, who dealt in hard words and circumlocutional sentences. Perceiving that his ankles were tied up with a silk handkerchief, Erskine asked the cause. "Why, my dear sir." answered the wordy law. yer, "I was taking a romantic ramble in my brother's grounds, when, coming to a gate, I had to climb over it, by which came in contact with the first bar. and have grazed the epidermis of the skin, the accident being attended with a slight extravasation of blood." may thank your lucky stars," replied Erskine, "that your brother's 'gate' was not so lofty as your 'style,' or you must have broken your neck.

**"Too late to whet the sword when the trumpet sounds to draw it." But never too late to whet your appetite by taking Kidney-Wort, restoring health and making yourself a well, strong, hearty It is unequalled as a remedy for all liver, bowels and kidney diseases. All druggists keep and recommend it.

Hoods, scarfs, ribbons and any fancy articles can be made any wanted with the Diamond Dyes. All the popular colors.

IMPORTANCE of the Legislature: 'Cheer up, Don," said a venerable head of the house, passing the bottle of Mon-ongahela to his despondent son. "Father," returned the Senator, "there isn't a cheer in me. We've even lost the Legislature." "But why do you lay my stress on the loss of the Legislature? Because," replied Don, "I had intended to petition it to change my name."

HAYESVILLE, OHIO, Feb. 11, 1880. I am very glad to say I have tried Hop Bitters, and never took anything that did me as much good. I only took two bottles and I would not take \$100 for the good they did me. I recommend them to my patients, and get the best results from their use, C. B. MERCER, M. D.

A REVERBND doctor of Louisville has refused to allow the ladies of his congregation to preach from the pulpit in the conduct of their church work, Considering the general average of ministers these days, we don't believe rightminded women want to preach in their pulpits.

*No lady of refinement likes to resort to superficial devices to supply a becoming health alone that kindles the fire that lights the countenance and brings oack the fresh tints of the apple blossoms to the faded cheek. If anything on earth will do this it is Mrs. Lydia E. Piekham,s Vegetable Compound which has already brought health to multitudes with whom

A FACE that grows: The following is a mot credited to one of the recent Governors of Maryland: "What a remarkable ugly man Mr. Blank is," said he to pretty and tender-hearted young lady. 'Ah," replied she, depaceatingly, "but he has a face that grows on you." "Hum!" responded the Governor, God forbid, madam, that it should ever grow on me."

On Thirty Days' Trial.

The Voltaic Belt Co., Marshall, Mich., will send Dr. Dye's Celebrated Electro-Voltaic Belts and Electric Appliances on trial for thirty days to men (young or old) who are afflicted with nervous debility, lost vitality and kindred troubles, guaranteeing speedy and complete restoration of health and manly vigor.—Address as above. - N. B. - No risk is incurred, as thirty days' trial is allowed.

A CERTAIN reverend drone preaching very dull sermon to a congregation not used to him, many of them left the church before the sermon was near ended. "Truly," said a gentleman present, 'this learned divine has made a very moving discourse."

Lost Faith in Physicians.
Why is it that so many persons use proprietary medicines, or patent medicines, as they are commonly called? Is it because peop's lose faith in physicians? There are innumerable inst. .aces where cures have been effected by Scovill's Sarsapirilla or Blood and Liver Byrup for all diseases of the blood, when they had been given over by their physicians. It is one of the best remedies ever offered to the pfblic, and as it is proremedies ever offered to the public, and as it is pre-pared with the greatest care, as a specific for certain diseases, it is no wonder that it should be more effectual than hastily written and carelessly prepared prescriptions made by incompetent physicians. Take Scovill's Blood and Liver Syrup for all disorders arising from impure blood. It is indersed by leading professionen as well as by eminent physicians and others.

TEE sad suicide of an Arkansas preacher who had devoted himself principally to politics would seem to be a valuable lesson to ministers of the gospel who want to run the primaries and boss the machine.

That Husband of Mine Is three times the man he was before he began using Weils' Health Renewer. \$1. Drugg sts.

"What do you think I had better preach about?" asked the new minister, and the old deacon scratched his head and replied: "Wanl, if you preach about twenty minutes I think you'll tech our people jest right."

VEGETINE is the great health restorercomposed exclusively of barks, roots and herbs. It is very pleasant to take; every child likes it.

A Young man who undertook to trace his family back two centuries, struck the penitontiary before he had exhausted a century, and concluded to stop. He feared he would collide with a gallows before zeaching the objective point,

Dr. Kline's Great Nerve Restorer is the marvel of the age for all nerve dis ases. All fits stopped free. Send to 931 Arch Street' Philadeiphia, Pa.

"Ir 1 were a girl," says a New England elergyman, "I would not parade too much in public places," Of course he would not. He would swing on the front gate and watch the young fellows in the neighborhood do the parading.

Ladies and children's boots and shoes cannot run over if Lyon's Patent Heel Stiffeners are used

A BEAUTIFUL standing screen is made of crimson bolting muslin, upon which a landscape design is worked in different shades of green filoselle in long straight stitches. It is mounted in a square frame of antique brass, hammered in relief.
