University of South Carolina, **Finn Hall.**

Columbia, S. C., Mar. 9.—This week's letter is written with the utmost sadness, because the campus has been made lonely by the removal of one of our most dear comrades, Roy A. Mitchell, of Mountville. He was dear not only to the Laurens county boys, but to the whole student body. This was shown by the way in which his remains were honored.

Our comrade was Roy A. Mitchell, of Mountville. He was a member of the Sophomore class and stood high in it, both in scholarship and in a moral way. He died in the university infirmary last Friday at 2:15 p. m., from a stubborn case of pneumonia.

Meetings of the student body, the sophomore class and the Laurens County Club were held Friday evening at which resolutions showing the high esteem for young Mitchell were drawn up. The committee appointed to draw up the resolutions for the student body was composed of A. G. Hart, chairman, M. A. Wright and Frank J. Rodgers. The resolutions were unanimously adopted by the several bodies and each body sent beautiful floral tributes. On Saturday morning when the remains were conveyed to the union station to be sent to Mountville, almost the entire student body of five hundred, marched with bared heads in front of the hearse.

Roy was a bright young man and always wore a smiling face. He was a bright star taken from our midst. May God bless and comfort his beloved ones in their great bereavement, in our humble prayer.

The following were the resolutions drawn up by the committee: "Bowing beneath the weight of the severe shock and deep sorrow which has come to us this day, in the death of our friend and fellow student, Roy Quay Mitchell, and recognizing the loss to us of a friend and partner in our life; and whereas,

"He was a man sharing the highest ideals of this campus, never failing to measure up to all requirements of a gentleman and companion among us; and whereas,

"In his course here he had given large promise of usefulness to his State and fellow man, keeping before him principles of honor and unselfishness; and whereas,

"We, the students of the University of South Carolina, desire to express our sympathetic sorrow to his family and community in the loss of their son and friend;

"Be it Resolved: That the sympathy of the student body of the university goes out to all who loved him, and all who share with us the sadness of his death.

"Further, that a copy of these resolutions be sent to the family, to the Laurens county papers and to the daily papers of the State and that a copy of the same be printed in the Gamecock, The Carolinian, and The Garnet and Black.

"Augustus G. Hart, Chairman.  
"M. A. Wright,  
"Frank J. Rodgers."

Baseball practice is now in full sway and several of our boys are sure to make the team. Our first game is with Lafayette on March 23rd. Sponsors will be had and that night a dance will be given by the German club in their honor and in honor of the visiting team.

**WE HAVE FAITH IN THIS STOMACH REMEDY**

A woman customer said to us the other day, "Say, you ought to tell everyone in town about Rexall Dyspepsia Tablets. I would myself if I could." That set us to thinking. So many people have used them and have so enthusiastically sounded their praises both to us and their friends, that we had an idea you all knew about them. But, in the chance that some of you suffer from indigestion, heartburn, dyspepsia, or some other stomach complaint, don't know about them—we are writing this.

They contain Bismuth and Pepsin, two of the greatest digestive aids known to medical science. They soothe and comfort the stomach, promote the secretion of gastric juice, help to quickly digest the food and convert it into rich, red blood and improve the action of the bowels. We believe them to be the best remedy made for indigestion and dyspepsia. We certainly wouldn't offer them to you entirely at our risk unless we felt sure they would do you a lot of good. If Rexall Dyspepsia Tablets do not relieve your indigestion, check the heartburn, and make it possible for you to eat what you like whenever you like, come back and get your money.

Sold only at the more than 7,000 Rexall Stores, and in this town only at our store. Three sizes, 25c, 50c and \$1.00. Laurens Drug Co., 103 W. Main St., Laurens, S. C.

**MUST GROW MORE LIVESTOCK**

Prosperity of South Depends Upon Diversified Farming and Stock Raising.

**ERADICATE CATTLE TICK**

The South, Adapted to Live Stock Growing, Should Lead the United States in Production of Cattle —Do Not Import Food Products—Keep Money at Home.

By G. H. ALFORD, Agricultural Extension Department, International Harvester Company of New Jersey.

During the last ten years our acre yield increased, but not half as much as the increase in population. We have all heard the old Dutch proverb quoted before, but we cannot quote it too often: "No grass, no stock; no stock, no manure; no manure, no crops." Holland is almost entirely a grass and stock country, and lands are worth on an average \$500 per acre. These people have found that they can make more out of land from grass and live stock than they can by cultivating it.

Unnumbered acres of hill land in the cotton belt are making less than one-third bale of cotton per acre, and at the same time making poverty for those tilling them. The cost of commercial fertilizer applied annually is appalling. The razor-back terraces, covered with weeds, grass and briars, and the circles and short rows prevent the use of labor-saving implements.

We are sending millions to the northern states every year to pay for pork products, dairy products and beef. This money should be kept at home and deposited in our banks until they are full to overflowing and the rate of interest lowered to say, six per cent., because of the abundance of money. Then we will have the necessary money to build good roads, to pay good teachers better salaries, to teach longer terms, to improve our farms and to build comfortable homes and put telephones and libraries in them. Then our boys and girls will stay on the farm, and we will behold prosperity in every department of the commercial world.

The south has an overwhelming advantage over every other section in live stock raising. We have great climatic advantages that permit out-

We all know the story of Mr. Rockefeller, and Mr. Carnegie, or Schwab, or any of our other great fortune builders. They began by PUTTING THEIR MONEY IN THE BANK. Not because they had too much—oh, no! They wanted that money in the bank so it would be safe and so it would be there to grasp the first good BUSINESS OPPORTUNITY. None of them dabbled in get-rich-quick schemes peddled around by smooth strangers.

door pasturing and feeding during the whole, or the greater part of the year. We can obtain large yields of oats, leguminous crops, Johnson and Bermuda grasses, sorghum cane hay, and an abundance of corn for the making of silage, the most economic form of carbohydrates. The keeping of good cattle and the intelligent use of thoroughly good permanent pastures and grazing crops, and the economic use of the silo and cotton seed meal will make our lands rich, keep millions of dollars at home that are now sent to the north and west, and make our people prosperous.

In the cotton belt live stock farming has been avoided mainly for two reasons: (1) Because all-cotton farming paid better until the soil became poor; (2) because of the cattle tick. Now, millions of acres are too poor to grow cotton profitably, and we can easily eradicate the cattle tick. Since the work of eradicating the tick was inaugurated, nearly 200,000 square miles have been cleaned for all time; this is an area over three times as large as Alabama. The tick injures the hide, reduces the milk flow at least ten per cent., makes it very difficult to fatten cattle, prevents the introduction of good cattle to breed up our native cattle, lowers the price of our cattle on the markets and destroys more than enough cattle every year to pay for its eradication.

The days of the tick are numbered. The last tick will be destroyed in a few years, and then the south will adopt a permanent system of agriculture promising prosperity to present population and to posterity.
