

HUSBAND RESCUED DESPAIRING WIFE

After Four Years of Discouraging Conditions, Mrs. Bullock Gave Up in Despair. Husband Came to Rescue.

Patron, Ky.—In an interesting letter from this place, Mrs. Bettie Bullock writes as follows: "I suffered for four years, with womanly troubles, and during this time, I could only sit up for a little while, and could not walk anywhere at all. At times, I would have severe pains in my left side. The doctor was called in, and his treatment relieved me for a while, but I was soon confined to my bed again. After that, nothing seemed to do me any good.

I had gotten so weak I could not stand, and I gave up in despair. At last, my husband got me a bottle of Cardui, the woman's tonic, and I commenced taking it. From the very first dose, I could tell it was helping me. I can now walk two miles without its tiring me, and am doing all my work." If you are all run down from womanly troubles, don't give up in despair. Try Cardui, the woman's tonic. It has helped more than a million women, in its 50 years of continuous success, and should surely help you, too. Your druggist has sold Cardui for years. He knows what it will do. Ask him. He will recommend it. Begin taking Cardui today.

THIS STATE CAN GROW MORE CORN IF FARMERS WILL SELECT SEED

Proper Selection of Seed One of Most Effective Methods of Increasing Average Yield—Some Points to Look For in Corn.

In 1914 South Carolina planted 1,925,000 acres in corn, producing 36,538,000 bushels, or 18.2 bushels per acre. Wisconsin, in the same year, planted 1,725,000 acres, producing 69,538,000 bushels, or 18.2 bushels per acre. Although South Carolina planted 250,000 acres more than did Wisconsin, the latter state made 33,324,000 bushels more corn—almost twice as much as this state.

This is not as it should be. We should be able to make as much corn per acre as any state. The question is, how are we to go about it? There are two principal ways to increase our average and under our conditions both are necessary. The first step lies in improving our land by means of thorough preparation, increasing the supply of humus, and using commercial fertilizers intelligently. The second step is the improvement of seed by careful field selection. It has already been demonstrated that our improved lands are capable of making from 40 to more than 100 bushels per acre. Just how much more can be grown on one acre with properly selected seed is yet to be seen, but we should certainly by all means give the seed question more serious thought.

The livestock breeder is far more particular in selecting breeding stock than is the average corn grower in selecting seed corn. Yet the laws governing livestock improvement are the same as those governing corn improvement. The man who raises hogs keeps only the best sows, which give the largest and most vigorous litters of pigs. As some sows give better litters than others, so some ears of corn will produce more corn than other ears. Therefore, make an effort to select the best ears for seed. After selecting them, test them to see which yield best. Seed selection must begin in the field, in order to know what kinds of stalks the ears come from and what kind of chance they had.

Making Field Selections. Before making selections, fix on the type of stalk and ear desired and stick to this type. Keep it always in mind so that the selection will be alike. Selections should always be made under uniform and normal conditions. Do not select from the best land. Always take an average spot in the field.

The stalk must be the first consideration. A large ear taken from a pile of corn will not necessarily be a producer of large ears, since it might have had a better chance than some others in the field, the stalk might have been too tall and slender, and the ear might have been too high on the stalk. It is, therefore, necessary to know the stalk from which an ear comes.

Select from stalks which are strong and stocky, and gently tapering from the ground up. The ear should not be growing higher than ones shoulder, as this has an important bearing on the labor of gathering. The shank

should be just long enough to permit the ear to turn down at maturity. If earliness is desired, such stalks can be kept separate. Do not gather the corn until it is well matured. Mark each desirable stalk with a tag or by some other method and leave it standing in the field. If the corn is to be cut and shocked, the marked corn can be left and shocked separately.

After the Field Selection. Field selection is of large importance, but there is work still to be done after the corn has been shocked and taken to the barn. Experiments have shown that an ear which is cylindrical, gently tapering, and has straight rows of deep, plump kernels will produce the highest percentage of grain. The accompanying photograph shows an ear of the desired type. The cob should be medium to small, rather than large. Large cobs mean a smaller percentage of grain, as well as a possibility of causing the grain to mold on account of the cob's not drying out. The grains should be long and full. A gently wedge-shaped and

A GOOD AND A BAD EAR
A—Shows poor ear with too much space between kernels. a—shows pointed kernels of same.
B—shows good ear with no space between kernels. b—shows plump kernels of same.

plump kernel will leave very little space between the rows. Sharply pointed grains are usually loose on the cob.

The spacing and shape of the kernels will vary with the variety, but care should always be taken to select only those ears that have well developed kernels that are not loose on the cob. The careful study and selection of the individual ears must be done after the corn has been brought to the barn and the farmer can do it in his spare time. As soon as the corn has been carefully selected it should be stored in a well ventilated room out of reach of rats and mice. It should be inspected at intervals throughout winter to see that it is in good condition.

BARNUM & BAILEY.

Have Hundreds of New Features.

The Barnum and Bailey Greatest Show on Earth, which comes to Greenville on Saturday, Oct. 23, claim to present this year "A Circus of All Nations," meaning one that is filled with all new features shown now for the first time and presented by 480 world-famed artists who represent every nation in the world. The entire world has been scoured by special Barnum and Bailey agents so that practically all the arenic stars that are really worth seeing take part.

The time-honored custom has always been to refer to each successive year's circus as "bigger and better than ever" but the phrase has become so hackneyed that, this year, Barnum and Bailey hesitate to use it, despite the fact that it adequately describes the entertainment. More railroad cars are required to transport the show, bigger tents are raised, more area is needed to accommodate the show than ever before. In fact, the circus has reached a point where it is the despair of many of the smaller railroads and taxes their facilities to the limit, for eighty-five cars are needed to convey the gigantic canvas city from town to town.

There's material enough in this year's circus to make a dozen circuses of the old days. A "big top" 680 feet long, nearly 1,500 employees, three rings, four elevated platforms, acres of aerial apparatus, the biggest stage ever erected for a dramatic presentation, a 110-cake menagerie, 750 horses, forty elephants, a street parade three miles long.

Among the novelties offered this season are the "Six Riding Hannafords," "The Paladins," balancing, pyramiding and head jumping on the tops of burning lamps. "Pallenberg's Wonder Bears," "Adgie" and her den of nine performing African lions, Barnum and Bailey statue horses, Madam Bradna's Angel Horses. Three great herds of war elephants, trained and shown by the first and only lady elephant trainers. Besides these, are 60 acrobats, 60 riders, 60 acrobats and 60 clowns.

A wonderful prelude to this great circus is the presentation of the new, magnificent, spectacular pageant, "Lalla Rookh" in which more than 1,000 characters take part. Everyone should

get an early start on circus day in order to be there in time for the parade which starts at 10 A. M., and which is said to be three miles long.

ACIDS IN STOMACH SOUR THE FOOD CAUSE INDIGESTION

"Pape's Diapepsin" fixes sour, gassy, upset stomachs in five minutes. If what you just ate is souring on your stomach or lies like a lump of lead, refusing to digest, or you belch gas and eructate sour, undigested food, or have a feeling of dizziness, heartburn, fullness, nausea, bad taste in mouth and stomach headache, you can surely get relief in five minutes.

Ask your pharmacist to show you the formula, plainly printed on these fifty-cent cases of Pape's Diapepsin, then you will understand why dyspeptic troubles of all kinds must go, and why it relieves sour, out-of-order stomachs or indigestion in five minutes. "Pape's Diapepsin" is harmless; tastes like candy, though each dose will digest and prepare for assimilation into the blood all the food you eat; besides, it makes you go to the table with a healthy appetite; but what will please you most, is that you will feel that your stomach and intestines are clean and fresh, and you will not need to resort to laxatives or liver pills for biliousness or constipation.

This city will have many "Pape's Diapepsin" cranks, as some people will call them, but you will be enthusiastic about this splendid stomach preparation, too, if you ever take it for indigestion, gases, heartburn, sourness, dyspepsia, or any stomach misery.

Get some now, this minute, and rid yourself of stomach misery and indigestion in five minutes.

Despondency. When you feel discouraged and despondent do not give up but take a dose of Chamberlain's Tablets and you are almost certain to feel all right within a day or two. Despondency is very often due to indigestion and biliousness, for which these tablets are especially valuable. Obtainable everywhere.

Rheumatism Easily Relieved By Cleansing the Blood

S. S. S. Gives Quick Relief by Toning Up the Blood

Yes, but how? A natural question. The answer is that you must cleanse your blood by stimulating it to healthy, vigorous action, so that it will throw off the germs and impurities that cause Rheumatism. The action of the wonderful blood purifier, S. S. S., is to practically renew the life blood, give it vigor, stimulate the flow making it throw out the germs and the poison impurities. The excruciating pains of Rheumatism, whether it is the shooting, stabbing, Scleratic, the gripping agony of muscular Rheumatism, or aching arms and legs that break up sleep will be entirely relieved by S. S. S. Don't use nostrums and drugs. Take the blood bath—Nature's blood tonic, S. S. S. Get it at any druggist, but insist upon S. S. S. Let us tell you about blood diseases. Send for booklet "What the Mirror Tells," or if yours is a peculiar case, write S. S. S. Co., Atlanta, Ga., but begin treatment at once.

Headquarters for School and College Necessities

Whether in school or college, at home or away, every boy and girl should be supplied with the following necessities: Stationery, Tooth Brushes, Tooth Paste or Powders, Shoe Brushes, Hair Brushes and Combs, Face Creams and Lotions, Talcum Powder, Shaving Soap or Cream, Shaving Brushes, etc. we have them. Powe Drug Company

A Sleepy Feeling

In the morning when you ought to be fresh and vigorous is a sure sign of a torpid liver and bilious state of the stomach and bowels. To avoid a sick spell give your system a thorough cleansing. For this purpose there is no remedy more wholesome and effective than

DR. M. A. SIMMONS Vegetable Liver Medicine

The Old Original Liver Powder
Its excellent purifying and invigorating influence brings about an immediate movement. You feel better from the first dose. The bowels move freely so that the system is soon rid of the bilious impurities which are clogging the vital organs. When the stomach and bowels have been cleansed the sleepy feeling disappears, the mind becomes cheerful, the digestion good and the body active and vigorous. Dr. M. A. Simmons' Liver Medicine is now put up in a handsome lithographed tin box.

Deafness Cannot Be Cured

By local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remediation. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are cured by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.
