

The Herald and News.

Protracted Meeting in West End. Rev. G. E. Edwards, assisted by Rev. S. W. Henry, began a protracted meeting in the O'Neal Street Methodist Church on Sunday.

Ready to Yield. "I used DeWitt's Witch Hazel Salve for piles and found it a certain cure," says S. R. Meredith Willow Grove, Del.

Death of a Child. The year old son of Mr. Clarence Powell died at his home in West End on Sunday.

Fill by Temple in India. Sacred cows often defile Indian temples, but were yet a body that is polluted by contamination.

On Saturday our sanctum was visited by Master Junius B. Bailey, the editor of the Child's Monthly, published at Chapin.

Happy Time in Old Town. "We felt very happy," writes R. N. Bevil, Old Town, Va., "when Buckle's Arnica Salve wholly cured our daughter of a bad case of scald head."

From Payment. One of the excellent features of the Improved Order of Red Men is that it pays its members a sick benefit, and in case of death the family of a deceased member is paid a burial fund of \$50.

Lends Them All. "One Minute Cough Cure beats all other medicines I ever tried for coughs, colds, croup and throat and lung troubles," says D. Scott Curran, of Logansport, Pa.

A Sudden Death. The following account of the death of a young man who had many relatives in Newberry is taken from The State of the 1st Young Boland was a grandson of Mr. W. H. Blais of this city:

Last night a sad death occurred Young Claude R. Boland, aged 18 years, suddenly fell dead. The boy had been in good health and up to a few weeks ago had been as light-hearted as a boy of his age should be.

While sitting on the edge of his bed about 10 o'clock last night young Boland suddenly placed his hand to his heart and calling the name of a young woman of whom he was very fond he collapsed and fell back dead.

A physician was hastily summoned but to no avail. It is supposed that the lad died from heart failure.

The funeral will be held from his parent's residence, No. 205 Main street, this afternoon at 4 o'clock and the interment will be in Elmwood cemetery.

Spring Fever. Spring fever is another name for biliousness. It is more serious than most people think. A torpid liver and inactive bowels mean a poisoned system.

Put Up the Tent. We back up all we say about "Clifton" flour. Back it up, first with our goods, and second, with our guarantee.

YOU can buy a new Harp at Maves' book store for \$3.75 that any child can play.

VARIOUS AND ALL ABOUT.

The County teachers' examination will be held on the 13th inst. Commencement exercises at Prosperity Wednesday and Thursday nights of this week.

The County books of registration were open yesterday for the purpose of registering voters.

The closing exercises of the Boundary Street School will be held in the opera house Friday night.

Mr. A. C. Jones has purchased the old Methodist Church building. He will have it torn down in a few weeks.

The Excelsior Fire Company's Reel Team will begin practicing this afternoon for the Somer tournament.

We are in receipt of an invitation to attend the Commencement exercises of Erskine College at Due West, June 8th to 10th.

We are indebted to Prof. W. L. Peterson, principal of the Wagener High School, for an invitation to attend the Commencement exercises on the 8th, 9th and 10th inst.

Mary Wheeler, colored, who lived on Mrs. Paysinger's place was found dead in bed Monday morning. Coroner Lindsay pronounced it death from natural causes.

The meeting of the Woman's Missionary Society of the Central Methodist Church which was to have been held yesterday afternoon was postponed on account of the funeral of Miss Carrie Aull, and will be held Wednesday evening immediately after prayer meeting.

Personal.

Mrs. A. J. Bowers is on a visit to relatives at her old home in Salem, Va.

Mr. Roland Spearman, who is working for the Bell Telephone Company, is at home on a visit.

Mrs. Harriett Lane and daughter, Miss Sallie, left yesterday for Hendersonville to spend the summer.

Mr. Ben A. Hawkins, of Columbia, is spending a few days at home with his father, who has been critically ill for the past week.

Mr. and Mrs. W. P. Houseal returned on Saturday from Georgetown, where they had been enjoying the sessions of the State Press Association.

Mr. T. B. Graham, of this county, who has been serving the Southern Railway Company for some time as agent and operator at Glendale, S. C., has been transferred to King, S. C.

We received a pleasant call on Saturday from Editor Bailey, of the Carolina News. He reports the prospects bright for a large cotton mill at Chapin in the near future.

Dr. W. F. Eberhardt has accepted a position as prescription clerk at Dr. Van Smith's drug store. Dr. Eberhardt has hosts of friends here who are glad that he will remain in Newberry.

President E. H. Aull, with as much interest and enthusiasm as ever, backed by a record of fine service for the association, is the main spring of the meeting. Of course Madame President is on hand also, sharing the dainty official responsibilities that devolve upon her.

Was Wasing Away.

The following letter from Robert R. Warr, of Salem, Mo., is instructive. "I have been troubled with kidney disease for the last five years. I lost flesh and never felt well and doctored with leading physicians and tried all remedies suggested without relief.

When a sewerage system is to be installed in a stream or river, then the method of disposal becomes a much more serious matter, but methods of disposal have been found to cover even these conditions.

The facts are these: A warrant from Saluda County had been placed in the Sheriff's hands for a negro man and woman - Pick Bug and Sallie Bug - supposed to have gone to Alabama.

Everybody said I had consumption," writes Mrs. A. M. Shields, of Chambersburg, Pa., "I was so low after six months of severe sickness, caused by Hay Fever and Asthma, that I thought I could get well, but I learned of the marvelous merit of Dr. King's New Discovery for consumption, used it, and was completely cured."

Mr. A. P. Coleman, commonly known as "Dandy" Coleman, died at his home in Saluda county on Saturday in the 64th year of his age. Mr. Coleman was a good man and will be missed in the community in which he lived.

Death in Saluda County.

THE SEWERAGE SYSTEM.

LIKELY TO BE COMPLETED BY THE EARLY FALL.

A Description of the System by the Superintendent in Charge—A Large Force Now Laying the Pipes—One Thousand Feet Already in the Ground—Description of the Work, the Pipes, Etc.

Active work in putting in the sewerage system was commenced by the contractors, Messrs. Guild & Co., of Chattanooga, yesterday a week ago when the first ground was broken just behind the O'Neal Street Methodist Church in West End.

The system is being built exclusively for sanitary purposes, and will not care for storm water. It will include about five miles of pipe, although Mr. C. C. Beddoes, the city engineer, thinks that with the \$25,000 voted by the city he may be able to put in as much as seven miles.

"Newberry will have a fine system when it is finished. You have a good contractor and he is doing good work.

Mr. Beddoes, when asked about the quality of the work that is being done, said: "Newberry will have a fine system when it is finished. You have a good contractor and he is doing good work. Every pipe is tested before it is put in, to avoid any damages from cracks, and Portland cement is being freely used at every joint.

The pipe, which are 12, 10, 8, 6 and 4 inch, are being put at least three feet under the ground, and generally reach five. A good deal of trouble is being experienced from the fact that the houses are generally so far from the sidewalks, in order to get a sufficient drop the pipe will have to be laid deeper than they otherwise would.

At present the force of hands engaged in laying the pipe numbers about twenty, but when all the pipes have arrived the contractors expect a little later to put on a force of about seventy-five and to rush the work through.

Mr. Beddoes is being assisted in his part of the work by Messrs. W. B. Seabrook and W. C. Sumner.

Mr. Jno. H. Randolph, of Baton Rouge, La., is superintending the work for Messrs. Guild & Co., and Mr. G. C. Mills is in charge of the actual construction.

The following description of the system which is being constructed in Newberry is furnished The Herald and News by Mr. Randolph.

"Every citizen of Newberry is no doubt interested in the public work now going on within the municipality and would perhaps be interested enough to read a short description of the sewerage system now under construction.

"In designing a sewerage system the first of the disposal of the sewerage is method to be considered. When an area in which a sewerage system is to be installed is fortunate enough to be situated on a stream or river carrying a volume of water many times larger than the discharge from the proposed system, then the method of disposal is easily settled by discharging into the stream or river at a point far enough below the above mentioned area to do away with any danger, or bad effects, that might arise from the use of that portion of the stream for drinking or other purposes.

"When a sewerage system is to be installed within an area not accessible to a stream or river, then the method of disposal becomes a much more serious matter, but methods of disposal have been found to cover even these conditions. For instance, the chemical process, where the already diluted sewage is treated with chemical preparation; the burning process, where the sewage is dried and burned, the residue being used as a fertilizer; the use of septic tanks, where the diluted sewage is allowed to filter through broken rock or stone, carrying with it an abundance of pure air without the aid of chemicals acts as a purifier to the polluted liquid. This process is repeated several times and is at last passed intermittent filtration through beds of charcoal to more thoroughly oxidize or purify, before being allowed to escape. There are many other methods of disposal, but of them all the septic tank was the one found to be most practicable to be used for the disposal of the sewage that is destined to pass through the pipes of the system now under construction in Newberry.

"The manner of disposal determined upon, the location of these septic tanks must then be determined upon, these must be located in a place far enough from the area to be sewerage and where the purified liquid can drain away from the sewerage area, first, to do away with

all danger from the gases that may be given off from these tanks; second, to give the sewage as much time to disintegrate and become diluted as possible; and right here I might say that there must be a sufficient water supply thoroughly to flush all sewers leading to these septic tanks in order to make the dilution as great as possible and to keep all pipes clear of residue.

"The sizes of the sewers are then determined by the volume of the flush water and sewage that is intended to pass through them at a given velocity. The main sewer must have for its lowest point the discharge into the septic tank, and its highest point is usually the point most distant from its discharging point. All sub or smaller lines must have for their lowest point their discharge into the main sewer; their highest point the point most distant from their discharge. The grade or slope between all points of these sewers must be so that in no case will there be a point on any line of sewer that will be at a less elevation than a point further on in the direction of the flow, that is, there must be no pockets or dips in the line of sewers and where siphonage must be resorted to. In some cases siphons must be used in order to pass under something that cannot be in itself changed. In such a case a special construction is resorted to in order to reduce the liability of stoppage, and consequent deposit, to a minimum.

"The grade or slope of these sewers is determined by the amount of sewerage, the velocity of the flow and the size and character of the sewer; this grade being usually determined by the formula (Kutters) after the size and grade of the main sewer has been determined. The sub lines and smaller pipes are then designed with a view to carry the sewerage from their respective areas by the shortest and quickest manner possible to the main sub sewers and at the least expense, care being taken to lay all pipe in perfectly straight lines and on grades not to fall below an established minimum. All changes of direction of flow are designed to take place in man holes. In a well constructed system a clear light should be seen from one man hole to another.

"In order to keep all lines well scoured or flushed, flush tanks are placed at the upper ends of all small lines. These flush tanks are so arranged that they will fill up to a certain point within a given time; then automatically discharge their contents into the sewer with a head and velocity far exceeding the ordinary head and velocity in the sewer.

"In places where a sewer pipe must cross a drain, or any place where the pipe is itself exposed and therefore rendered liable to breakage from outside causes or at any point where the terra cotta pipe is not practicable then iron pipe is used as a substitute.

"Such is the system designed for the municipality of Newberry by Mr. C. C. Beddoes and using a septic tank system of his own design for disposal; twelve inch pipe for its mains, ten inch for its sub mains, eight, six and four inch for its smaller pipe, using man holes about every three hundred feet, and automatic flush tanks for flushing purposes.

"The system is being constructed by Messrs. Guild & Co., contracting engineers of Chattanooga, Tenn., with John H. Randolph, of Baton Rouge, La., as superintendent over all and representative and G. C. Mills in charge of construction.

"Let it be well understood that the above is not a theoretical discussion on the subject of sewerage design, but a simple statement couched in terms that can be readily understood by any one."

The sewerage will be emptied into Scott's Creek at a point just one mile below the city, after the oxidizing process has been finished.

The following tribute of respect was adopted at a recent meeting of Bergell Tribe, No. 24, Improved Order of Red Men, of this city.

Newberry, S. C., May 29th, 1902. Whereas, it has pleased God in his all-wise providence to remove from our midst Brother Andrew L. Longshore.

Resolved 2nd, That the County of Newberry has been deprived of one of its most faithful and efficient servants, and the State of one of its most zealous and manly citizens.

Resolved 3rd, That his family has been deprived of a loving and devoted father and husband.

Resolved 4th, That the medical profession has lost one, who if he had been permitted to live, would have helped to keep it up to its present high standard and his name would have been written upon its topmost and fairest page.

Resolved 5th, That we tender to his relatives and friends our heartfelt sympathy and promise to his little babe our care and attention.

Resolved 6th, That we record these resolutions in our minute book and furnish a copy of the same to his family and also to the newspapers of this County for publication.

Resolved 7th, That we do now adjourn out of respect to his memory and that this hall be draped in mourning for a period of 30 days.

Eug. S. Werts, Sargent. F. H. Campsen, Chief of Records.

A Real Friend. "I suffered from dyspepsia and indigestion for fifteen years," says W. T. Stuedeman, of Merry Oaks, N. C.

Death of Miss Carrie E. Aull.

After an illness of about ten days Miss Carrie E. Aull died on Sunday at one o'clock. She was born on the 25th of February, 1850, and was, therefore, fifty-two years of age. She was the eldest daughter and second child of the late Capt. Jno. P. Aull, who died about twenty-five years ago.

She was educated at Due West, and early in life became a teacher. For several years she was a teacher in a female college in Staunton, Va. For the past six years she has taught with great acceptability in the Newberry Graded School, and never was there a teacher more devoted to her work or more conscientious in the discharge of her duties. As a teacher she was successful because she let nothing come between her and her duty. She was a woman of a strong force of character and exerted an influence for good in the community in which she moved, which will last long after she is laid to rest.

Surviving her she leaves four brothers and three sisters. Those who were near enough to reach here were here when the end came. She seemed to know when she was first taken sick that the end was near and gave directions for her burial and the disposition of her effects as one would who was going on a journey. She was a consistent member of the Lutheran church.

Interment took place yesterday afternoon at five o'clock at Rosewood Cemetery. E. H. A.

THE FUNERAL.

The Graded School suspended exercises yesterday, and at 4:30 the children assembled at the building and the grade taught by Mrs. Aull acted as escort for the remains from the house to the cemetery. They were followed by the entire school. The emotion shown by the children of her grade was evidence of the esteem in which she was held by them and the love they bore her. It is better to have the love of children like these than the plaudits of the populace for the one is genuine and lasting while the other is fickle as the wind. The influence of a life which held the love of the children as she did can never die.

The services were conducted at the grave by Rev. W. L. Seabrook, prayer being offered by Rev. Geo. A. Wright. As the procession left the residence the Graded School bell was tolled. The afternoon was exceedingly warm but the attendance at the burial was large.

SPECIAL NOTICES.

THOUSANDS of bargains in Shoes, Slippers, Men's and Boys' Suits and odd pants, at Flynn's Cash Store.

ON Saturday morning there will be a big rush at Flynn's Cash Store, at picture frames are marked down for this great sale at Flynn's.

WANTED at once, fifty hands to work on new cotton mill at Easley, S. C. Will pay 70 cents per day for good hands. Jno. F. Grady, Contractor.

WE have one car load hay which we will sell at sixty cents this week. Come quick. Summer Bros. Tel. 31.

Copeland Bros.,

The Undersellers.

The Ewart-Pifer Co.'s

SUMMER SPECIALTIES

The people of Newberry County are in search of comfort and coolness these warm summer days, hence they should be interested in a few statements The Ewart-Pifer Co. have to make.

Clothing! The common verdict of those who have patronized us is that in the suits they have bought of us they find matchless values. Our trade this season has been much larger than usual, hence our stock is broken, but if those who wish a suit will call on us, we will make it to their advantage by giving special prices.

Negligee Shirts! There is nothing like a nice Negligee shirt for solid comfort on a hot day, and there's no such stock of these in the city as we have to show you. The patterns of this season are pretty, if selected carefully, and that's the case with our line. We are showing the nicest goods on the market in plain and pleated bosoms of various patterns and of all qualities.

Timely Underwear Are shown here in abundance, all of the nicest ideas for stylish dressers, from conservative to extreme, from cheap to fine. If you don't want a straw, we can please you in soft or stiff. We can meet all demands in this line.

Shoes to Please Everybody. In Shoes and Oxfords our line is complete, and our business in this line has been immense. We have this Spring in shapes and prices the "best on earth." Give us a trial. Call on us for anything you may need in the way of Gents' Furnishings, Shoes, Hats and fine Merchant tailoring.

Ewart-Pifer Co.
