Mr. Crosby and J. M. Castanada have organized a company to sink for artesian water at Benson, and have sent to Chicago for pumps and machinery to sink by the hydraulic process. A test well two inches in diameter will be sunk at the west end of town, and if that is successful six and eight inch wells will be sunk all around the town. With artesian water both north and south of Benson and several score of flowing wells in the St. David region, there is every reason to look for it right in the town. Thousands of acres of splendid land surrounding will be taken up and put under cultivation as fast as wells can be sunk—as soon as the test well of Messrs. Crosby and Castanada is proven successful. People from all parts of the territory are watching the test with no little interest and many are preparing to get there from the northern part of the territory to take up land, sink wells and improve ranches.—Oasis.

Something of a sensation was caused last night by a report that Joseph Deiro could not be found and that Du-Hankins' horse was also missing, the inference being that Joe had concluded to leave in order to escape the consequences possibly to result from the prosecution against him because of the shooting of Garcia last week. It appears that there was some "hurryin' to and fro" for a short time about 10 o'clock but soon after Deiro appeared at home, the horse having been found earlier under circumstances readily explained. If Deiro has any fears of the ultimate result of the further investigation of the shooting of Garcia, he certainly does not show it; beyond mentioning the expense which he may be, as he claims, unjustly subjected to.

"De Witt's Little Early Risers did me more good than all blood medicines and other pills," writes Geo. H. Jacobs, of Thompson, Conn. The brick now being used here is brought from Tucson. It has been stated to the Ore reporter that soil suited for brick is found in this vicinity and it is to be regretted that brickmaking has not already been added to our local industries. If brick could be furnished here at a somewhat lower price than at present it might be hoped that a considerable number of new buildings erected would be of that material.

Officer Dayton Graham is today suffering from a very painfully burned hand, caused by his efforts in extinguishing an incipient fire at his residence last night about half past eleven. Mrs. Graham had occasion to get up and light the lamp after retiring and it is thought she dropped the match before it was extinguished, and being near the window the lace curtains caught fire. Mr. Graham extinguished the fire with his hand. But little damage was done beyond the injury to his hand.

Last week the mother of O. S. Ashburn was alone in his house in Benson, when the house caught fire through the explosion of a coal-oil lamp. Mrs. Ashburn is eighty years of age. Before assistance arrived the fire was under such headway that it could not be controlled and the building and contents were totally destroyed. \$840 in gold and \$3 in silver were in the fire. The gold was recovered almost intact, but the silver had melted.

The finding of a considerable body of ore at the depth of 200 feet by the Lowell and Arizona Mining company on their property about a mile south of Bisbee, as referred to in the Ore two days since, would seem to be of much promise. Further development up to this time having shown the ore to be in even greater quantity probably than at first supposed.

D. A. Markey yesterday received a letter from J. B. Benton, who is prospecting in Sonora, having left here for that section about three months ago. The letter is written from Apato Sonora, and dated the 18th of this month. Mr. Benton states that the natives in the section in which he now is, are very much excited over the Yaqui outbreak and that very many prospectors are coming in from the mountains because of it. However, he adds, that the Mexican troops are "killing off the Yaquis very fast" and that he hopes to be able to continue in safety his search for "something we can make a stake out of."

COPPER IS THE METAL.

The Cochise Copper Mining Company, Bisbee, Arizona.

This company owns a very valuable group of mines situated in Warren mining district, county of Cochise, Arizona, lying immediately east of and adjoining the town of Bisbee, and adjoining the property of the Copper Queen Consolidated Mining company on the north. The latter company has been in operation for about twenty years, and employs about 1,500 men daily in the operation of its mammoth mine and smelters, and as a result has produced copper to over 34,000,000 pounds during the year 1898, and the net proceeds of such production are reported to have been over \$2,000,000, and it has been said by experienced miners who have been under its employ for years, that the Queen mine now has sufficient ore in sight to keep it in constant operation for the next twenty years without further development.

Is it not reasonable to believe that the property of the Cochise company is fully as valuable, when it is within such close proximity to such a wonderful mine?

The blasts set off in the underground workings of the Queen property can easily be felt and heard at the shaft of our mine, and oftentimes the concussion has attracted marked attention.

The original owners of these valuable mines are local business men, well and favorably known in Bisbee and surrounding vicinity, who are doing their utmost to make this enterprise a success in every respect. The board of directors are original owners, and are donating their services to the company until such time as the mine will pay dividends. They own the controlling interest in this property, and as a protection to stockholders have placed their entire interest in escrow for a term of one year.

The stock books of our company are now open for subscriptions, and a limited number of shares are offered at ten cents per share. No application for less than 100 shares will be accepted.

The company reserve the right at any time to advance the price of shares without further notice, or to reject any application for stock at their discretion.

Every cent received from the sale of stock will be expended toward the development of our property and the erection of hoisting works, and all other necessary improvements, and to make our enterprise a success in every particular.

We invite investigators and their experts or their engineers to closely scrutinize our property.

Applications for shares may be made to any of the directors of the company, or to any of our legally authorized representatives.

A Magnificent Portrait of . . .

Admiral Dewey

. . . In Ten Colors . . .
Size, 14x21 inches.

Will be published by us shortly. It is now being printed for us on heavy paper in a form suitable for framing, by one of the largest art lithograph houses in America, in the famous French style of color plate work. Every American family will want one of these handsome pictures of Admiral Dewey. It must be remembered that this picture will be in no sense a cheap chromo, but will be an example of the very highest style of illuminated printing. It will be an ornament to any drawing room or library. Our readers can have the Dewey portrait at what it costs us, namely twenty cents per copy, by merely filling out the coupon below, and sending it to this office at once. There will be such a demand for the portrait when it is published that we advise sending orders in advance; as many copies as may be desired can be had on one coupon, providing twenty cents is sent for each copy. Write name and address plainly; remit in coin or postage stamps.
