WEDNESDAY, OCTOBER 25, 1899.

The gold democrats of Maryland have declared for the state republican ticket.

The Mexican Central railway has begun construction on the branch line from Guadalupe to the Pacific.

The English are sweeping everything before them in the Transvaal if their exclusive reports can be relied on.

A CENSORSHIP has been established over cable messages to and from South Africa—no code messages are allowed.

SAMPSON is trying to steal the halo of glory from Seley and place it over the head of Captain Chadwick, but it won't work.

If the horse goes the coachman must go too. A family coachman way down east has gone. He took a \$20,000 bride with him.

There is no better gauge to popular sentiment on the Philippine question than the ease with which the new regiments have been filled with carefully picked men.

While we are not in the confidence of either party, it is safe to assert that Admiral Dewey, in his conference with the President did not suggest that we haul down the flag and scot.

The Chesapeake and Ohio steamship Rapidan, the largest steamship of the company's transatlantic fleet, has been chartered by the English government for transport service in connection with the Transvaal war.

There was a "perpetual ameness" and sort of "stereotyped monotonous expression to those yacht race reports. "No wind; no race." "Columbia in first." "Columbia beats." "Columbia wins." Perhaps they were censored.

A MAGISTRATE has declared it illegal for a man to make love to a woman without her consent. The legal form will read: "May I ask you if I may ask you?" It is feared this complicated question will completely befuddle a great many suitors.

THE International Commercial Congress, composed of representative business men of all nations began its annual session at Philadelphia last week. President McKinley being unable to attend was represented by proxy in the person of the assistant secretary of state, Mr. Hill.

PRESIDENT MCKINLEY says he cannot comply with the request of the many petitioners that he "mediate" in the Transvaal imbroglio, unless one or both of the belligerents refer the matter to him. But he promises to see that American interests and Americans do not suffer in that country while hostilities are in progress.

The admission fees to a recent prize fight in New York exceeded \$85,000, the largest amount ever received for any single performance. This has been cited as a startling commentary upon the times. Bloody noses and cracked crowns, however, are not the delight of the vast majority of our people nor are bounce and bluster yet widely accepted as the principal virtues of the world.

GENERAL BULLER, who will command the British forces in South Africa, exacted that he be given absolute control in the undertaking. He is the Teddy Roosevelt of England short of a bombast. He is an uncompromising fighter of bulldog tenacity and believes that all and any means are justifiable in warfare. He is said to be well acquainted with every section of South Africa.

The critics of the President have discovered that McKinley was very much disappointed because Dewey would not go west with him. This discovery succeeded the story that President McKinley did not care to have Dewey accompany him for fear he would be over shadowed. You can take your choice in arriving at a correct conclusion. One is as far from the truth as the other.

The raging of smallpox in the cities of the northern mountain states should bring to mind the advisability of local precautionary measures. Of course it is very probable it would not appear in any event. Still, for the reason that Arizona felt the influence of the epidemic last winter, germs may be lurking in well concealed places to revive the mission of the dread disease at the first opportunity. The ounce of prevention maxim is never out of place in the interest of a community's health.

During the winter of 1897 Mr. James Reed, one of the leading citizens and merchants of Clay, Clay Co., W. Va., struck his leg against a cake of ice in such a manner as to bruise it severely. It became very much swollen and pained him so badly that he could not walk without the aid of crutches. He was treated by physicians, also used several kinds of liniment and two and a half gallons of whisky in bathing it, but nothing gave any relief until he began using Chamberlain's Pain Balm. This brought about a complete cure in a week's time and he believes that had he not used this remedy, his leg would have had to be amputated. Pain Balm is unequalled for sprains, bruises and rheumatism. For sale by all druggists.

Crippled by Rheumatism.

Those who have Rheumatism find themselves growing steadily worse all the while. One reason of this is that the remedies prescribed by the doctors contain mercury and potash, which ultimately intensify the disease by causing the joints to swell and stiffen, producing a severe aching of the bones. S. S. S. has been curing Rheumatism for twenty years—even the worst cases which seemed almost incurable.

Capt. O. E. Hughes, the popular railroad conductor, of Columbia, S. C., had an experience with Rheumatism which convinced him that there is only one cure for that painful disease. He says: "I was a great sufferer from muscular Rheumatism for two years. I could get no permanent relief from any medicine prescribed by my physician. I took about a dozen bottles of your S. S. S., and now I am as well as I ever was in my life. I am sure that your medicine cured me, and I would recommend it to any one suffering from any blood disease."

Everybody knows that Rheumatism is a diseased state of the blood, and only a blood remedy is the only proper treatment, but a remedy containing potash and mercury only aggravates the trouble.

S.S.S. For Blood

being Purely Vegetable, goes direct to the very cause of the disease and a permanent cure always results. It is the only blood remedy guaranteed to contain no potash, mercury or other dangerous minerals.

COPPER IS THE METAL.

The Cochise Copper Mining Company, Bisbee, Arizona.

This company owns a very valuable group of mines situated in Warren mining district, county of Cochise, Arizona, lying immediately east of and adjoining the town of Bisbee, and adjoining the property of the Copper Queen Consolidated Mining Company on the north. The latter company has been in operation for about twenty years, and employs about 1,500 men daily in the operation of its mammoth mine and smelters, and as a result has produced copper to over 34,000,000 pounds during the year 1898, and the net proceeds of such production are reported to have been over \$2,000,000 and it has been said by experienced miners who have been under its employ for years, that the Queen mine now has sufficient ore in sight to keep it in constant operation for the next twenty years without further development.

Is it not reasonable to believe that the property of the Cochise company is fully as valuable, when it is within such close proximity to such a wonderful mine? The plants set off in the underground workings of the Queen property can easily be felt and heard at the shaft of our mine, and oftentimes the concussion has attracted marked attention.

The original owners of these valuable mines are local business men, well and favorably known in Bisbee and surrounding vicinity, who are doing their utmost to make this enterprise a success in every respect. The board of directors are original owners, and are donating their services to the company until such time as the mine will pay dividends. They own the controlling interest in this property, and as a protection to stockholders have placed their entire interest in escrow for a term of one year.

The stock books of our company are now open for subscriptions, and a limited number of shares are offered at ten cents per share. No application for less than 100 shares will be accepted.

The company reserve the right at any time to advance the price of shares without further notice, or to reject any application for stock at their discretion.

Every cent received from the sale of stock will be expended toward the development of our property and the erection of hoisting works, and all other necessary improvements, and to make our enterprise a success in every particular.

We invite investigators and their experts or their engineers to closely scrutinize our property.

Applications for shares may be made to any of the directors of the company, or to any of our legally authorized representatives.
