## GREAT MINING REGION

### Eighty Miles Round Tucson Is a Rich District.

### A Number of Mines Unequaled in Any Other Part of This Rich Region.

Within a radius of 80 miles of Tucson there is the greatest number of the richest mineral deposits to be found in any equal area in any state or territory of this country.

The Ray copper mines, R. N. Truman, general manager, have recently opened their mines sufficiently to have an output of 300 tons per day, and have built a railroad seven miles in length to their new plant in Kelvin, which is in successful operation and will soon be doubled in capacity.

The Scott lead mines, near Dudleyville, and sulphur mines, on the Gila river, are claimed to be large deposits, and only awaiting cheaper transportation.

The Mammoth gold mines, Geo. P. Blair, manager, located at Mammoth, near the San Pedro river, 52 miles from Tucson, have their 70 stamp mill on the river, three miles from their mines with which they have a wire tramway. They have the finest plant for the cyanide process and have one of the most successful properties. The Mohawk, an extension of the Mammoth, has a good 30-stamp mill.

The Copper Hill Copper company's mines are located six miles from Mammoth and 46 miles from Tucson, J. D. Coplin manager, have developed a large copper district and are now putting in their plant, which promises to be one of the great copper industries of the territory.

The Canada del Oro gold mines or fields, situated 35 miles from Tucson, on the north foothills of the Catalina mountains, comprise over 400 acres, are now being worked with an average of \$14 free milling ore, with large veins of low grade ore. Its name was given the Canyon of Gold. The owners are Tucson citizens.

The Deer Creek San Carlos coal mines, 50 miles from Tucson, are now being tested by Prof. Phillips, of Pittsburgh, Penn., and good lignite bituminous coal is being developed.

The Pearce, or Commonwealth, gold mines, at Pearce, are now having a large plant put up to replace the one recently burned.

The Copper Queen (rightly named) at Bisbee, under the able management of Walter Douglass, and the South Bisbee mines, are, as usual producing immense quantities of rich copper ore, 500 or more tons per day, their plants turning it into copper matte for shipment east. Over 1,600 men are employed. Phelps, Dodge & Co., of New York, are the principal owners of this valuable property.

At the Huachuca mountains, near Bisbee, are a number of good mines now being developed.

On the San Pedro river, just across the international line, the Caucaucus and Cobre Grande copper mines, of no mean extent or value, are located.

Many good gold and copper mines are located in the Patagonia mountains some of which are now being opened.

The Duquesne Mining and Reduction Company, owned by Mr. George Westinghouse, of Pittsburgh Penn., J. F. Tenor, general agent, is located at the Washington camp, and is acknowledged to be one of the best and most extensive copper mines in the country. A plant is to be put up and a railway built to these mines the present year.

The Helvetia Copper Company, at Helvita, 36 miles south from Tucson, is here; 30 of the best copper mines in Arizona, R. M. Seagur, general manager, B. J. Closs, superintendent, having their mines on the west side of the Santa Rita mountains and their mill and plant in the Santa Cruz valley. They employ 200 men and have a growing town. Their output is 350 tons a day of 14 per cent copper.

The Rosemont Copper company is located about one mile from the Helvetia mines. The Lewiston Bros., of New York, are the principal owners, and this property is both valuable and extensive.

The Azurite gold, silver and lead mines are located in San Xavier district, about thirty miles from Tucson, has a large percentage of silver mines well opened with a mill. It has also two 30-ton copper smelters. Gov. L. C. Hughes, of Tucson, is a large owner in these mines.

In the Oro Blanco district, ten miles square, 70 miles from Tucson, are the Tres Amigos and Old Glory gold mines which are rich in gold ores, but at present lack transportation facilities. The principal mines are the Badger, Cedar Hill, Peacock, Keystone, Homespun, Transit and Little Man.

The Major McKinley copper mine, located 45 miles northwesterly of Tuc-

## VIOLATED ANTI-TRUST LAW

### Mississippi Attorney General Files Charges Against Cotton Oil Mills.

JACKSON, Miss., Nov. 13.—Attorney-General McClure today filed a declaration in the circuit court charging nineteen cotton oil mills in the state with violating the new anti-trust law. The declaration asks for a forfeiture of charter and that the statutory penalty be imposed. It also sets forth that the mills violated the law by entering into a combination to control the prices of cotton seed, and that this combination also prevents competition among insurance companies for oil mills and competition among railroads for hauling the seed. During the early part of the season the price of this seed went as high as \$20 per ton.

### Rich Gold Discovery.

William Lawrence came in Monday, bringing 76 ounces of gold (Troy weight), representing a month's clean-up from their mines, two miles south of Dripping Springs. The gold was shipped from Globe by express. Its value is from \$1,200 to \$1,300. Mr. Lawrence and J. C. Glisson are the owners of the mine and they have been working it only a few months. They made several shipments of ore, but the charges were so heavy that they decided to work it themselves and for that purpose erected an arrastra which answers the purpose very well.

The mine is an old location formerly owned by United States Marshal Griffith, who sunk a shaft 70 feet and got some very good ore, but the ledge was a blind lead, and was found by Lawrence and Glisson about 30 feet from the shaft. The gulch had been worked over successfully several times for placer gold showing that the gold must have come from a ledge near by, and Lawrence and Glisson, after diligent search, discovered it. The ledge is from two to three feet wide and carries a very rich streak which in some places is not wider than the thickness of one's finger, and in other places widens into pockets. This streak assays 202 ounces of fine gold to the ton, and the ledge matter \$15 to \$20. The gold is in decomposed iron, which crumbles easily. Lawrence and Glisson have two claims, one on either side of the discovery shaft.

The proceeds from the sale of the above mentioned stock will be applied to the acquiring and constructing the necessary plants for the manufacture of ice, electricity and telephone service, and such other uses as may be permitted under the Articles of Incorporation of this company.

By order of the Board of Directors.  
WALTER DOUGLAS,  
JOHN B. ANGIUS,  
SPENCER W. CLAWSON,  
LEMUEL C. SHATTUCK,  
WILLIAM H. BROPHY.

### Canadian Premier.

Sir Wilfrid Laurier, who has just been returned to power by the victory of the liberals in Canada, has been the leader of his party since 1887. Four years ago he led the liberals to triumph at the polls, and was sworn into office as president of the privy council on July 9, 1896. His record since that time has been evidently pleasing to the people. He settled the vexed school question in Manitoba so as to take it out of politics altogether, and his administration in other respects has been satisfactory to the electorate. On his visit to England in 1897 he received almost regal honors. In the same year he was the recipient of unusual honors from the pope and the president of France. Sir Wilfrid on his return was met with acclaim in numerous cities of Canada, which vied with one another in the warmth and enthusiasm of their receptions. In 1898 he acted as one of the joint commissioners for the settlement of matters in dispute between Canada and the United States.

### Soldiers Vote in Philippines.

WASHINGTON, Nov. 13.—New York is the only state which has given its soldiers fighting in the Philippines an opportunity to exercise the right of suffrage. There are more than 30,000 volunteers in the Philippines and about 38,000 regulars. It is estimated that 7,000 men enlisted from New York state, and if any of the congressional election districts are close, especially those in the vicinity of Fort Niagara, where the 42d regiment was recruited, the vote of the soldiers in the Philippines will have an important effect. Officials of the war department say the federal government could take no action to insure the voting of troops in foreign service. This was a matter, it was said, which the states themselves should have attended to, and surprise is expressed that more states did not follow the example of New York and send commissioners to Manila to supervise the voting.

### Tea Garden Drins.

Is a sugary, most quality; once used, it is a deliciously sweet, makes taffy candy to perfection; manufactured by Pacific Coast Syrup Co., 707-719 Sansome St. San Francisco.

## The White Hills.

The recent big strike in the mines of White Hills show the great possibilities of mining. A few years ago the White Hills mines were sold to an English company for \$1,750,000 and the price was thought to be far in excess of the value of the property. Today the mines have an estimated value exceeding \$10,000,000 and it is not believed that they can be purchased for that figure.

### Concentrates.

Any U. S. town with a population not to exceed 3000 can have a national bank with a capital of \$25,000.

Any assay should be of a sample, not a specimen, to be fair to the owner or prospector as much as to the prospective buyer.

Gasoline engines are feasible at any altitude. There is one in satisfactory operation near Silverton, Colo., 13,000 feet above sea level.

### Graham Returns.

SOLOMONVILLE—Complete Returns of Graham county, except two small precincts, give Murphy 621, Smith 870. Smith's majority is close to three hundred. The democratic ticket is elected except the supervisors, recorder and district attorney.

### Ship Disaster.

YARMOUTH, N. S., Nov. 13.—Word has just been received here that the steamer, City of Montreal, from Yarmouth to Halifax, has foundered off Cape Porcht in the bay of Fundy and that forty persons perished.

I beg to tender my sincere thanks to my old friends and acquaintances of the Copper Queen smelter for their gift of a beautiful gold watch. I value this token of their friendship and regard more than words can express, and it will at all times serve to remind me of the many happy and prosperous years I have spent with them while in the employ of the Copper Queen.  
ERNEST F. LARSON.

### WHEAT CROP OF THE WORLD.

United States and Russia Alone Produce Greatly in Excess of Their Demands.

A statement prepared by the United States department of agriculture, showing the wheat crop of the world for the last five years, contains much that is of peculiar interest to Americans, says Youth's Companion.

First of all, it is worth noting that wheat is something the demand for which keeps always abreast with the supply. Year after year the world's crop increases, yet gains in population, improvements in transportation and the growth of commerce enable consumption to keep pace. Last year's crop of almost two and three-quarters billion bushels will be no more than sufficient for use, and necessity reserves during this year.

### Worthless Paper.

An express package supposed to contain \$25,000, which was shipped from Chicago to Burlington, Iowa, some weeks ago, when opened by the consignee at the latter point was found to contain scraps of wall paper and parts of business catalogues and pages from the book "Black Beauty" instead of currency. Much mystery surrounds the theft. The package when received by the express company was already sealed, as are all bank packages. There was no delay en route, and the shipment reached its destination in due time.

### A Great Placer Camp.

Old miners declare Cape Nome to be the most wonderful placer camp ever discovered. Fabulous stories are told of the riches found in the sand of the beach and in the gulches and creeks thereabout. One miner named Lindbloom, who returned to Seattle a few days ago, cleared up \$100,000 during the present season, and has refused \$800,000 in cash for his holding. A single nugget worth \$450 was taken from one of his claims recently. Another man from Sioux City, Ia., has brought down to Seattle with him 88,000 in dust taken from a space 45 feet square on Cape Nome beach. The storekeepers at Anvil City are said to have refused to accept any more dust, as their vaults and safes are full.

### Bryan Offered Editorship.

DENVER, Nov. 13.—William J. Bryan has been offered and declined an editorial position on a Denver afternoon paper at a salary of \$10,000 a year. In his reply he says: "I shall remain here and in future as in the past defend with tongue and pen the principles which I believe to be right and the policy which I believe to be wise."

### Mrs. McCoy's Divorce.

NEW YORK, Nov. 13.—The divorce in the divorce suit of Mrs. Norman Selby against her husband (Kid McCoy) filed his report and finds that the pugilist's wife is entitled to her divorce.

### A Fourfold Celebration.

Col. Girard, of Neuchatel, Switzerland, on one and the same day celebrated his eightieth birthday, his golden wedding, the silver wedding of his daughter, and the marriage of a grand-daughter.

W. H. Short and Mr. Meade, the well known cattle men of the Caballona rancho, are in town, having come in Saturday evening, after attending to the shipment of a large bunch of fine cattle.

## TURQUISE MINES.

### Terrible Accident at the Big Mine.

### Man Killed and Others Injured—Various Metals Discovered Close Together.

[From Our Special Correspondence.]  
TURQUOISE, Nov. 9, 1900.

Shortly before noon a sad accident occurred in shaft No. 1 of the Turquoise Mining and Milling company. At about 180 feet, being 18 feet from the bottom of sump, below timbers, a new set of timbers was being put in when the lowest set, owing to the pressure of the ground, gave way and the whole of the ground behind this set and the one above caved in, precipitating Clarence Warren, timberman, and his partner who were working on the platform to the bottom amid a mass of falling timbers and rock. At the bottom of the set was Antonio Taylor who was completely buried in the debris at the bottom of the shaft where there was about four feet of water.

Warren was severely injured, receiving a serious scalp wound crushed hand and an ugly bruise on the thigh. His partner was more fortunate, escaping with a slight cut on the head and a few bruises.

The body of Antonio was recovered after reentering the shaft at about 9 p. m., a wound on the temple showing that death had been instantaneous.

An inquest was held at once and the body removed by the company's team to Tombstone for interment.

The election was conducted in a quiet manner, a full vote being cast; Mr. F. R. O'Brien running far ahead of the ticket, and deservedly so, owing to his popularity, as he also did in Wilcox.

P. T. O.

### WILL ADOPT MARCONI'S SYSTEM

### Revolution in British Telegraphic and Postal Service is Likely.

LONDON, Nov. 13.—The daily mail this morning makes the following announcement:

"The postal departmental commission which has been inquiring into the subject will shortly report, after some month of deliberation, in favor of the earliest possible adoption of Marconi's system of wireless telegraphy by the postal authorities."

### FILIPINO WARFARE.

### The Fighting as Carried On is Trying to Discipline and Valor.

WASHINGTON, Nov. 13.—General MacArthur, commander of the army in the Philippines, in his report just submitted to the war department, states that in guerrilla warfare during ten months, from November 1, 1899, to September 19, 1900, the Americans have lost 268 killed, 760 wounded and 55 captured; while the Filipino losses during the same time were 3,227 killed, 694 wounded, 2,864 captured. MacArthur says that the desultory warfare that has been going on requires more of discipline and as much of valor as was required during the period of regular operations, and he speaks in the highest terms of the American troops.

### Population of Colorado.

WASHINGTON, Nov. 13.—The census bureau today announced the population of Colorado at 538,700.

### Notice.

Spanish and piano lessons, by graduate of Snell's Seminary, Oakland, Cal. Address Mrs. Edward Zimmerman, Post Office, Bisbee, Ariz. 04-11

### Look Here!!!

You might not bet on a diamond ring or watch, but you can bet sure enough on the limberger and Swiss and other cheese Henry Collmann cuts up at the Brewery. He is the one and the only one who knows how to please and cater for his various guests. A man who never sleeps. Wholesale and retail. Delicacies delivered to families. n12-11

### 600

Miles from home, but you find what your tongue desires, and your heart will beat if you only see the layout you get at Henry Collmann's Brewery Caffe in the line of ham, cheese, liver sausage. n12-11
