Sad Death.

It is with much regret that we have to chronicle the sudden death of the 7-year old son of Hiram Willis which occurred on the 27. Mr. Willis and his son were returning with empty wagons from Ft. Apache and the boy was lying down in the wagon behind. When they reached what is called postoffice hill the father went back to drive the boy's team down the steep grade. When he reached the wagon he found the boy dead. The cause of death is unknown, but may have been from the heat.

IS IT RIGHT

For an Editor to Recommend Patent Medicines?

From the News, Brevard, N. C.

It may be a question whether the editor of a newspaper has the right to publicly recommend any of the various proprietary medicines which flood the market, yet as a preventative of suffering we feel it a duty to say a good word for Chamberlain's Colic, Cholera and Diarrhoea Remedy. We have known and used this medicine in our family for twenty years and have always found it reliable. In many cases a dose of this remedy would save hours of suffering while a physician is awaited. We do not believe in depending implicitly on any medicine for a cure but we do believe that if a bottle of Chamberlain's Diarrhoea Remedy were kept on hand and administered at the inception of an attack much suffering might be avoided and in very many cases the presence of a physician would not be required. At least this has been our experience during the past twenty years. For sale by F. J. Watron, druggist.

A GOOD PLAN.

The California Consolidated Petroleum Company has issued a folder concisely setting forth its objects which is the prettiest piece of printing yet seen in connection with the oil industry, and it is well worth reading and passing around.

The plans of this company are more extensive than those of the ordinary oil company, in that they insure to the holders of its stock, profits in all the oil field of the state as it owns large holdings in all the fields. It owns the only hydraulic rotary drilling rigs in operation in twenty fields between Oakland and San Diego. On the first strike of oil its directors are confident its stock will jump above par value, as it has other sources of revenue to raise values. One of these is royalties it owns on 5,000 acres leased to capitalists for development.

Still further, the California Consolidated Petroleum Company has in its treasury two million five hundred thousand shares of the stock of fifty of the leading oil companies of the state.

This plan gives the stockholders an interest in the earnings of all the different fields. From the viewpoint of the investor this plan affords the surest, safest opportunity for profit it is possible to adopt. It is confidently expected, that by

July 16th, next, all the stock offered at fifty cents per share will be subscribed for, and the price raised to one dollar per share. As set forth in the advertisement, which appears in this issue, the Company's stock is absolutely non-assessable, there being no personal liability to the stockholder. This insures a square deal and prevents the "freezing out" of the small stockholder.

You will make no mistake in securing, while you can some of the stock of the California Consolidated Petroleum Company. This Company is the most formidable rival the Standard Oil Company has ever encountered, and having ample capital its success is assured. It does not require a prophet to foresee that its fifty-cent stock will be worth several times that amount.

Stock redeemable on demand at any time within thirty days from date of certificate. All money paid in installments refunded on demand at any time within 30 days from date of first payment. If you do not want your stock, send to Company and you will promptly get every cent of your money back.
