

OFFICIAL DIRECTORY.

TERRITORIAL OFFICERS.

Governor, GEO. A. TRITTE.
Secretary, H. M. VAN ARMAN.
Assistant Secretary, JOHN E. ANDERSON.
Attorney General, E. B. POHORYL.
Auditor, E. P. CLARKE.
Surveyor General, J. W. ROBINSON.
Treasurer, THOS. J. BUTLER.
Sup't of Public Instruction, M. H. SHERMAN.
Deputy to Congress, GRANVILLE H. COBT.
Sup't Territorial Prison, GEO. M. THURLOW.

SUPREME COURT.

Chief Justice, C. G. W. FRENCH.
Associate Justice, W. W. HOOVER.
Reporter Supreme Court, MURAT MASTERS.

DISTRICT COURTS.

Judge 1st Judicial Dist., W. W. HOOVER.
Judge 2d Judicial Dist., DANIEL H. PINNEY.
Judge 3d Judicial Dist., C. G. W. FRENCH.

U. S. OFFICERS.

U. S. Marshal, LEON S. THIBALL.
U. S. Deputy Marshal, W. C. ROUNDY.
U. S. Deputy Marshal, FLORENCE, J. P. GARDNER.

TUCSON LAND OFFICE.

Receiver, C. E. DALRY.
Register, HENRY COUSINS.

PRESCOTT LAND OFFICE.

Receiver, GEORGE SOUTELL.
Register, W. M. KELLY.

CUSTOM OFFICERS.

Collector, CHARLOTTE, ERNEST McCLELLAN.
Deputy Collector, TUCSON, W. T. SCOTT.
Inspector, S. M. BALLESTEROS and A. J. KEENE.

N.T.L. REVENUE OFFICERS.

Inspector, TUCSON, THOS. COBLENZ.
Deputy Collector, YUMA, H. N. ALEXANDER.

PINAL COUNTY OFFICIALS.

Sherrif, J. P. GARDNER.
Deputy Sherrif, B. J. WHITESIDE.
Treasurer, P. B. BRADY.
Probate Judge, G. L. WHEATON.
Clerk of District Court, F. MOSELE.
Recorder, H. B. SUMMERS.
Deputy Recorder, J. S. J. DEVINE.
Board of Supervisors, GEO. F. COOK, HENRY THOMAS, J. S. J. DEVINE, HENRY THOMAS.
Clerk of Board of Sup., G. L. WHEATON.
Supt. of Public Schools, G. L. WHEATON.
Justice of the Peace, at Florence, J. W. MILLER.
Justice of the Peace, at Pinal, W. H. BISSON.
Justice of the Peace, San Pedro, J. N. DODSON.
Deputy Sheriff at Pinal, K. K. KENNEDY.
Public Administrator, HENRY THOMAS.
School Trustees, W. H. HARVEY, B. H. DE ARNIT, JOHN MILLER.

Bishop Clark on Incorrect English.

Though the schoolmaster looks his receptions in almost every nook and corner of the land, there is a great deal of incorrect talking even among educated people. Bishop Clark gives a few specimens of these popular errors of speech in the form of a dialogue between a careless talker and his critical friend:
"Good afternoon, John, how long have you been 'settling here'?"
"I have been 'settling' here for 'about an hour watching to see these men 'set the stones in my wall'."

About Cats.

One of the nuisances of this city, says a New York letter in the Rochester Democrat, is its cats, and yet experience proves that they are a necessary evil. They have made Trinity churchyard their midnight resort and the sexton would be glad to expel them, but that is impossible. They are kept in most of our public buildings as a protection against rats, which are so very destructive. Walking into the Treasury lately I noticed a fine-looking cat, and in reply to an inquiry the janitor said they had procured two, one of each sex, and were determined to keep up the breed. The cat and kittens, he said, were less trouble than the rats. I asked him how the latter could get into a stone building which has not a crack and where sewer communication is broken by "traps." Oh, said he, I can't tell how they get in, but I saw one at least enter a basement window in broad daylight. As soon as he was inside he could hide among the boxes and piles of paper. The banks have the same trouble, which is much worse in the postoffice, where such supplies of food are found in the bags and leather pouches. One might suppose the postoffice to be rat proof, and yet these animals have become a perfect nuisance there. Hence the item of disbursement for "cat feed" which is so regularly audited by the department at Washington. Cat meat is also a specialty in our markets. Speaking of cats, it may be mentioned as a curious omission that this animal is not mentioned in the Bible, while the dog is so frequent. This is the more remarkable since the cat was an object of worship in a country where Israel was held in bondage for 400 years.

Society Notes.

A coolness, growing out of the following conversation, has sprung up between Gilbooth and his friend, Gus De Smith:
"I had a splendid time last night," said Gus. "I spent the evening at a little social gathering at the Goodman mansion."
"Get the Goodman nice people?" queried Gilbooth.
"Well, I should say so. They are very aristocratic. To get in their circle one must have a deal of money or a great deal of genius."
"You don't tell me so—and you say you were there?"
"Yes."
"You were invited, were you?"
"Of course."

A young farmer who had been reading a book which stated that "woman is the Sunday of man," thought he would compliment and please his wife by shouting to her one morning: "Daisy, you are my Sunday!" Daisy glared at him as though she imagined he was daft, and then quietly said: "Dan, I may be your Sunday, but I'm not going to give you any rest until you buy me a bonnet that's fit to wear to church."

An Officer's Situation.

When the Michigan cavalry brigade was sent West to wallopp the Indians after the close of the war, one of the companies in the Sixth was commanded by a lieutenant who was hated by every man in his command. He realized this fact, and lost no opportunity to make it warm for the boys. One evening when the regiment went into camp on the banks of the Platte, far beyond Omaha, the lieutenant rigged up a fish line and slipped off down the stream to try his luck. Rattlesnakes were plenty out there then, and it was well known that the officer had a horror of them. He was fishing away, getting a nibble now and then, when one of the boys stole forward to within ten feet of him and hoarsely whispered:
"For Heaven's sake Lieutenant, don't move hand or foot! There's a big rattler in the grass behind you!"

The officer was a man of nerve, and though he heard every word he made no move. He realized the situation, and after a moment replied:
"Can't you kill it?"

"No—he's too near you! I'll go to camp with a gun and come up on the flank!"

The officer heard the man crawl away and he sat like a statue. The fish began to bite, but he dared not move his arms. He saw the sun go down, and the darkness found him as rigid as a post. Forty minutes he could stand in no longer. Gathering his breath and muscle, he made a leap into the water, and after swimming and wading for thirty rods, he climbed out and struck for camp, as wet as a rat and loaded down with mud. The story had gone around the camp and at least a dozen went out to greet his return and question him regarding the length of the reptile. The officer took a solemn vow to make somebody sweat for that trick, but he fell before an Indian's bullet before he had secured his revenge.

Ismail Pasha's Baggage Seized.

How are the mighty fallen! An execution was recently laid on the trunks and other effects of the ex-khedive at the Grand Hotel. The baggage was, however, accompanied by a police commissioner, who was most obsequious. His highness was astounded at the claim. Many years ago he ordered wheeled vehicles, including broughams, landaus, phaetons, dog-carts, a mail-coach, and several prison vans. The bill amounted to about 100,000 francs. No doubt it was exorbitant, as French tradesmen, with whom the khedive's agents dealt, went on the principal of spoiling the Egyptians. A check for a third of the money had been sent back, and further payment refused. Ismail, who was very profuse with the money turn from felicity, but was always careful of his private fortune and closed with full hands, pretends to be hard up. He contests the validity of the claim and has applied to a special tribunal to regain possession of his baggage. The court declined to hear the case on its merits and ruled that Ismail was to deposit the sum claimed at the Caisse des Consignations. He might then plead if he chose before the civil tribunal. Ismail has often been in France since the wheeled vehicles were delivered at Cairo, and no application was ever made to him for the balance. The creditor admits that he never previously took any step to obtain what he alleges still remains due. If so, prescription must be against him, for the time granted in the country for the recovery of a simple contract debt is very short. Somewhat I imagine that while the trunks were in the hands of the bailiff the locks were tampered with and the khedive's letters read and notes made by the reader for the benefit of M. Joubert.—Paris Cor. New York Tribune.

How to secure health.

It is strange any one will suffer from derangements brought on by impure blood, when SCOTT'S EMERALD AND STILLINGIA or BLOOD AND LIVER SYRUP will restore health to the physical organization. It is a strengthening syrup, pleasant to take, and the BEST BLOOD PURIFIER ever discovered curing scrofula, syphilitic disorders, weakness of the kidneys, erysipelas, malaria; nervous disorders, debility, bilious complaints and diseases of the blood, liver, kidneys, stomach, Wm. Hall's Balsam, and be convinced that CONSUMPTION CAN BE CURED. I can positively say it has done more good than all the other medicines I have taken since my sickness.

Simplicity Preferred.

How astonished some fair American brides, preparing their trousseaux, must be to read that the new Duchess of Westminster, wife of one of the richest men in Europe, was married in a dress of white foulard, a short dress, of walking length. The Hon. Katharine Cavendish, for that was the young lady's name, had not the column of description before her imagination in which her wedding dress would be read by an admiring world, or if she had, she preferred that the account, as well as the bill, should be a short one. "Jennie June," in a letter from Saratoga, would seem to show that the only way to be distinguished at this monstrous social exchange is to be governed by a similar taste. She described an exceedingly young woman, who has put on all her "jewelry," an expensive silk, and a loaded bonnet, wishing with all her heart that she could change places with the "belle," who is charming in a pale blue chambray gingham, trimmed with Hamburg edging, and a coarse white straw hat. The white dress of the Duchess of Westminster probably cost 75 cents a yard, and the blue gingham of the admired American 25 cents. Gradually our people are learning that it is not the material, but the way it is worn, that shows the lady. And the shopkeepers, who are very anxious to get their best to make the idea an easy one to carry out. The present generation will never see the old-fashioned "levy," and yet some of the prettiest goods in cotton foulards are being shown now marked with the (disappeared) coin, valued at 12 cents. Any woman can be as well dressed in this style as in any other she chooses. Indeed, between the cotton and the silk it would be hard to say which has the most lustrous surface or promises the longest wear.

Leaf Photographs.

A very pretty amusement, especially for those who have completed the study of botany, is the taking of leaf photographs. One very simple process is this: At any druggist's get an ounce of bicarbonate of potassium. Put some into a pint bottle of water. When the solution becomes saturated—that is, when the water has dissolved as much as it will—pour off some of the liquid into a shallow dish; on this float a piece of ordinary writing paper until it is thoroughly moistened. Let it become dry in the dark. It should be a bright yellow. On this put the leaf—under a piece of soft black cloth, and several sheets of newspapers. Put these between two pieces of glass (all the pieces should be of the same size) and with spring clothes pins fasten them together. Expose to a bright sun, placing the leaf so that the rays will fall upon it as nearly perpendicular as possible. In a few minutes it will begin to turn brown; but it requires from half an hour to several hours to produce a perfect print. When it has become dark enough, take it from the frame and put it in clear water, which must be changed every few minutes till the yellow part becomes white. Sometimes the leaf-veinings will be quite distinct. By following these directions it is scarcely possible to fail, and a little practice will make perfect.

HOSTETTER'S CELEBRATED BITTERS. Remember that stamina, vital energy, life-principle or whatever you may choose to call the resistant power which battles against the causes of disease and death, is the grand safeguard of health. It is the garrison of the human fortress, and when it waxes weak, the true policy is to throw in reinforcements. In our work when such an emergency occurs, a course of Hostetter's Bitters. For sale by Druggists and Dealers, to whom apply for Hostetter's Almanac for 1883.

KIDNEY-WORT FOR THE PERMANENT CURE OF CONSTIPATION. PILES. This distressing ailment is cured by using Kidney-Wort. It is a powerful cathartic, and will cure all kinds of Piles even when physicians have failed. It is a safe and reliable medicine. PRICE 50 CENTS. USE DRUGGISTS SELL.

Rescued from Death. William Coughlin, of Somerville, Mass., says: "In the fall of 1876 I was taken with bleeding of the lungs followed by a severe cough. I lost my appetite and flesh, and was confined to my bed. In 1877 I was admitted to the hospital. The doctors said I had a hole in my lung as big as a half dollar. At one time a report went around that I was dead. I gave up hope, but a friend told me of Dr. WILLIAM HALL'S BALSAM FOR THE LUNGS. I got a bottle, when to my surprise, I commenced to feel better, and to-day I feel better than for three years past. I write this hoping every one afflicted with diseased lungs will take Dr. WILLIAM HALL'S BALSAM, and be convinced that CONSUMPTION CAN BE CURED. I can positively say it has done more good than all the other medicines I have taken since my sickness."

How to secure health. It is strange any one will suffer from derangements brought on by impure blood, when SCOTT'S EMERALD AND STILLINGIA or BLOOD AND LIVER SYRUP will restore health to the physical organization. It is a strengthening syrup, pleasant to take, and the BEST BLOOD PURIFIER ever discovered curing scrofula, syphilitic disorders, weakness of the kidneys, erysipelas, malaria; nervous disorders, debility, bilious complaints and diseases of the blood, liver, kidneys, stomach, Wm. Hall's Balsam, and be convinced that CONSUMPTION CAN BE CURED. I can positively say it has done more good than all the other medicines I have taken since my sickness.

Remarkable Escape. John Kulin, of Lafayette, Ind., had a very narrow escape from death. This is his own story: "One year ago I was in the last stages of consumption. Our best physicians gave me up. I finally got so low that our doctor said I could not live twenty-four hours. My friends then purchased a bottle of Dr. Wm. Hall's Balsam for the lungs, which benefited me. I continued until I took nine bottles. I am now in perfect health having used no other medicine." From the above it is plainly evident that there is a cure for consumption, even in the most hopeless cases, and that cure is Dr. Wm. Hall's Balsam for the lungs. Cures all coughs and colds. Cures all diseases of the lungs and chest. Cures pneumonia and sore throat, and is a sure cure for consumption, cough, and all pulmonary troubles.

NOTICE TO TAXPAYERS. Sheriff's Office, Florence, Pinal Co., Sept. 12, '82. You are hereby notified that the Territorial and County Taxes for the year A. D. 1882, are now due and payable at my office in the town of Florence. They will become delinquent on and after December 11th, A. D. 1882, at 6 o'clock p. m. J. P. GABRIEL, Sheriff and Tax Collector.

JOE POHEIM, THE TAILOR, MAKES THE BEST FITTING CLOTHES IN STATE. Business Suits to Order From \$20.00 up. Latest Dress made to order from \$40.00 up. Pants to order from \$5.00 up. PACIFIC IRON WORKS. 1850 1882. RANKIN, BRAYTON & CO., 127 First St., San Francisco, Cal.

Mining Machinery. Plants for gold and silver mills, embracing the latest and most improved machinery and processes for lease and free use. Water jacket smelting furnaces for silver, lead and copper ores, with new and important improvements, superior to any other make, hoisting works, pump machinery, chloridizing furnaces, etc. We offer our customers the best results of thirty years' experience in this special line of work, and are prepared to furnish the most approved character of mining and reduction machinery, superior in design and construction to that to any other make, at the lowest possible prices. We also contract to deliver, in complete running order, mills, furnaces, hoisting works, etc., in any of the mining states and territories. Estimates given on application. Send for illustrated circular.

MUNN & CO. PATENTS. We continue to act as solicitors for patents, caveats, trade-marks, copyrights, etc. for the United States, and to obtain patents in Canada, England, France, Germany, and all other countries. Thirty-six years' practice. No charge for examination of models or drawings. Patents obtained through us are noticed in the SCIENTIFIC AMERICAN, which has the largest circulation, and is the most influential newspaper of the kind published in the world. The advantages of such a notice every patentee understands. This large and splendidly illustrated newspaper is published
