Father Monfort returned on Wednesday from a visit to Tucson.

The old race course is being put into thorough repair for the Fourth of July races.

On Tuesday evening Mr. Robert Brady left for the Brady stock ranch near Cottonwood mountain.

Mr. L. S. Williams, of Tucson, passed through Florence on Saturday, homeward bound from a trip to Pinal.

Mr. Gus Heyman was in Florence again this week. He has made several very large investments here.

Many strangers are seen upon the streets of Florence these days, and every week brings in new comers who purpose remaining here.

The Spinus brothers have just completed eighty feet of stone cattle troughs at their ranch near the Owl Heads. They are enterprising and industrious citizens.

The schools of Pinal county are considered to be in such a flourishing condition that the Territorial superintendent has not found it necessary to visit them so far.

Every portion of southern Arizona excepting Florence, has reported a high degree of heat during the past week. In this place the thermometer has not reached 95 degrees this summer.

The Florence Hotel is undergoing a system of thorough repair and renovation, and new floors and ceilings are being put into many of the rooms, and many other improvements are being made.

Mr. T. D. Reymert, of the Southern California Fruit Grower, made a flying visit to Pinal county this week. He went to Silver King, Pinal and DeNoon on Wednesday, returning on Thursday.

The travel to the Vekol has improved so greatly of late that Mr. E. A. Saxe has found it necessary to put on another stage, and a daily stage line now runs between Casa Grande and the great camp.

Mr. J. M. Woods, of Casa Grande, was in Florence this week, trying the speed of horses with several owned here. He will probably contest the Fourth of July races with the scores or more entries that will be made.

Under Sheriff Hinson Thomas returned Sunday from his assessing trip. Generally speaking he found the country in a flourishing condition, although the stock interests have suffered heavily for want of pasturage and water.

Word is brought from the Vekol that a large and new body of high grade milling ore has been opened on the Great Eastern claim, owned by Messrs. Chilson & Hinds. The minerals of this camp have not yet been half told.

Mr. Frank G. Houser, wife and child, of Silver King, went to Casa Grande Sunday evening. Mrs. Houser took the train for a summer's visit to Chicago, and Mrs. Hawley goes to New York.

Mr. J. D. Rittenhouse has been appointed one of the county board of school examiners, by Superintendent Straus. Mr. Rittenhouse declines the honor, however, owing to the demands made upon his time by his extensive business engagements.

Mr. J. V. Wilson is experimenting in the production of sugar cane on his ranch in this valley. He uses the Louisiana cane and has several rows growing with a thrift and vigor that promises success. Mr. Wilson will make a business visit to Louisiana next month.

District Attorney R. E. Sloan received the pointed attentions of a large sized scorpion on Tuesday night. The sting penetrated his right arm near the elbow, and the only bad effect produced, after ammonia had been applied, was a numbness of the arm for a day.

Experiences have demonstrated the wonderful fitness of this valley for the growth of oats, and small fields, sown for hay, have shown a growth of eight to ten feet in height. For the production of a crop of hay nothing surpasses them, for they grow equally well no matter when they are sown.

The new drug store of Messrs. Weedon & Meek is almost ready for its supply of goods. They have fitted up the interior in handsome style, and there will scarcely be a better appointed drug store in the Territory. Among other appendages they have ordered a fine soda fountain and will dispense the cooling beverage a few weeks hence.

Mr. W. J. Howerton after a pretty thorough acquaintance with all portions of Kansas, Colorado, Texas, New Mexico, and Arizona, has at last found a country about Florence that suits him in every particular. He is about to take up a tract of splendid farming land, and a few years hence he will possess a home worth thousands of dollars.

Mr. Fuller has presented the ENTERPRISE office with a bunch of alfalfa, out on his ranch a short distance above Florence. It measures from seven to nine feet in length and is but a sample of the growth in his entire field. Much difficulty is experienced in cutting such heavy grass, and the mower makes slow progress, notwithstanding the care taken to remove the cut grass from its path.

The stage from Casa Grande now leaves the railroad station at 2 o'clock a. m., after the arrival of both passenger trains, and reaches Florence at 7 a. m. This change avoids the ride during the heat of the day and better accommodates the business men by giving them their mail nearly six hours earlier. The fare for the round trip has also been reduced to \$3. No other change in stage time has been made.

The Star learns from Sam Hall, who visited Tucson from the Owl Heads, that water enough has been developed to run the mill night and day, and that during the 14 days' run, the clean up was 225 pounds of silver. At a depth of eighty feet a cross cut shows forty feet in width of free milline ore that will average \$10 per ton. Mr. Hall thinks the Owl Heads (Tortillita Company's mines) a great property.

EGYPTIAN WHEAT.

Something quite remarkable in the growth of what is now on exhibition in the ENTERPRISE sanctum, and although it is nothing unusual in Florence it would absorb the exclusive attention in agricultural departments of any exposition.

The specimen is an ordinary sample gathered at random from the field of Mr. John Guillani, a short distance above Florence, on the Alamo Anarilla canal, and his neighbor, Mr. Chas. Trinker, also has a fine field of it. The sample, grown from a single seed, has fifty-two distinct stalks, each of them bearing full heads of grain, while more than one-half the number of heads are double or treble ones, the auxiliary heads having sprouted from the base of the main head.

A few years ago Mr. Guillani found a stray plant of this grain growing in his field. He was attracted by its attention and he carefully watched its growth and protected it from harm. From the seed he produced ten pounds of wheat of the following year, and the present season many acres have matured.

The yield is simply enormous, and the grain is heavy and produces good flour. It grows to a height of five feet, with strong straw that is not easily broken down by wind or rain.

A gentleman who recently inspected the cereals displayed at the exposition in Los Angeles, says this sample far surpasses the best display they can make, and that it is an exclusive production of the Gila valley too important to possess without letting the world know something about it.

The bank of Tucson and Mr. D. Henderson's bank will consolidate on the 15th, under the name of the Consolidated Bank of Tucson. Mr. B. M. Jacobs will be president, D. Henderson, vice-president, and Mr. M. P. Freeman, cashier.

At Indio, on the Southern Pacific railroad, in the midst of the great Colorado desert and at a point below the sea level, a flow of artesian water has been secured. The railroad company conducted the enterprise and at four hundred feet the bore tapped a fine stream, sufficient to irrigate a large area of the fertile land in that vicinity. No frost ever visits that warm section and all kinds of tropical fruits and flowers thrive there.

Trouble Ahead.

When the appetite fails, and sleep grows restless and unrefreshing, there is trouble ahead. The digestive organs, when healthy, crave food; the nervous system, when vigorous and tranquil, gives its possessor no uneasiness at night. A tonic, to be effective, should not be a mere appetizer, nor are the nerves to be strengthened and soothed by the unaided action of a sedative or a narcotic. What is required is a medicine which invigorates the stomach and promotes assimilation of food by the system, by which means the nervous system, as well as other parts of the physical organism, are strengthened. These are the effects of Hostetter's Stomach Bitters, a medicine whose reputation is founded firmly in public confidence, and which physicians commend for its tonic, anti-bilious and other properties. It is used with the best results in fever and ague, rheumatism, kidney and uterine weakness, and other maladies.

Mr. Frank Shields, of Dudleyville, the cattle man and beef contractor for Pinal and other points, was in Florence on Saturday and Sunday. He had just returned from a trip to the Mogollons where he had driven a band of cattle. Mr. Shields says that in his neighborhood calves as high as fourteen months old are still running at large without brands. This evidence of the honesty of the Dudleyville atmosphere is not given for the benefit of those who brand the calves at a time when they are smaller than the branding iron, nor for that other class whose talents run to mavericks.

Drew & Bamrick are the mail contractors to Silver King and Pinal. The best stock and quickest time made.

And soon the six-z-fiz-z of the festive Soda Fountain will be heard in the land. The young man before escorting his best girl down the street, or to the picnic, will first "take stock" and see if his pocket book will "invoice" the price of at least 6 sodas, half a dozen oranges, candies and car hire. But, young man, our modern girls are getting very particular about their beverage. They want a pure, healthy drink, and not the vile stuff, all foam, usually called "Soda". Now let us whisper a word of warning: find where pure soda can be had; if there is no fountain in town dispensing such, just refer your favorite restaurateur to the Soda Fountain made by Chapman & Co., Madison, Ind. In the 23 years that these Fountains have been in use all over the civilized world they have steadily gained in public estimation; the beverage drawn from them is absolutely pure; the fountain is cheap costing from \$35 to \$80, and is an ornament to any store, besides being portable, which makes them suitable for public gatherings.

There will be a musical and dramatic entertainment given by the pupils of St. Teresa's school, in Florence, on June 23d, at 5:30 p. m. Tickets 50 cents. A very interesting programme has been arranged.

There is a peculiarity about the miners and mill men at Silver King and Pinal worthy of emulation in every permanent mining town in the Territory. Among the employees of the Silver King company are men who have worked there steadily for many years, saving up their earnings until they have accumulated snug fortunes. It is not unusual to find among these hard toilers men entitled to respect and esteem in any capacity in life; men of sterling worth, whose frugality and steady habits stamp them as honorable and trustworthy gentlemen. In this peculiarity the employees of the Silver King company are pre-eminently conspicuous.
