Effect of the Visitation at St. Louis and Cincinnati—Predictions of the Signal Service.

Special Dispatches to THE MORNING CALL.

CHICAGO, June 29.—A cool breeze, beginning late this afternoon, ended the heat in this city, at least temporarily. The breeze did not put in an appearance, however, until the excessive heat had made a record of eight fatal cases of prostration in this city since daylight. A large number of other persons succumbed, but up to this evening no other deaths were apprehended. The preceding twenty-four hours marked the culmination of an almost unprecedented period of warmth. According to the revised police reports there were eighteen deaths from sunstroke and 117 other cases of which are pronounced critical.

Four more deaths were reported up to midnight. All four occurred early in the day in remote parts of the city.

Dispatches from many points in Illinois, Iowa and Wisconsin tell of slight relief, but the temperature to-day, but not enough to afford very much relief and cases of prostration are still quite numerous and there were quite a number of deaths at various points to-day. All the cities in the States named report an alarming increase in the mortality list, the worst being especially severe in children and invalids.

St. Louis, June 29.—The hot weather which prevailed during the week past was checked somewhat this afternoon by a heavy shower, which cooled the atmosphere to a considerable extent. But there is still a great deal of suffering, as immediately after the rain the sun shined brightly and the sun set the thermometer near the hundred mark again. Yesterday's list of prostrations numbered 21, 8 of which were fatal.

Eleven prostrations are reported, two of them fatal.

St. Louis, June 29.—Eighteen cases of heat prostration to-day, of which two were fatal.
