

THE RAWEST STREET JOB YET.

Bleeding the Mission People.

INCE the Street Com. has ordered the improvement and building of streets in, around, over and under that lump on the fair face of nature known as Liberty heights...

Property owners cried out in protest against the jobs that were eating away their homes, but all to no purpose. They are still within the grasp of the boomer and the robbery goes on.

The extension of Nineteenth, Twentieth, Twenty-first, Twenty-second and Twenty-third streets through the towering hills to Corbett road is the outrage against which the people of the assessment district are protesting and will continue to protest.

What they want is legislation to free them from the tolls of the topographers and the improvements which are not due for twenty years or more. To ask the few owners of real estate in a thinly populated district to pay for the building of streets through almost uninhabited hills is simply to deprive them of their small holdings. They assert, and reasonably, too, that the improvements are not needed.

SOME OF THE ROUGH WORK ON LIBERTY HEIGHTS.

petition will be presented for signatures asking the Mayor and Board of Supervisors to take immediate action toward having the present unjust street law repealed by the Legislature.

By the repeal of the law the assessments now imposed will be annulled and the property-owners escape the burden of payment. No assessed property-owner, no matter in which district he may be, should fail to attend the meeting and in the repeal of the law make jobbery possible. It is a duty they owe to themselves and to the city.

Animals living in the vicinity are "lento" and occasionally reverse while going down hill, the stomachs of the animals are a source of complaint. The dead ones came from a distance and fell an easy prey to street improvements.

Two deep parallel ruts in the loose gravel along the middle of the street show where the middle of the street was skated down the grade with its brakes and teeth tilted up. He must have published his article in the Milpitas Standard, and he does not leave it to the editor to get it out of his mind.

Two deep parallel ruts in the loose gravel along the middle of the street show where the middle of the street was skated down the grade with its brakes and teeth tilted up. He must have published his article in the Milpitas Standard, and he does not leave it to the editor to get it out of his mind.

Thinking people living in other parts of the city were unable to understand the situation, but they are beginning to get the heights and the district which is the object of strenuous streets in their midst.

BLASTS OF WINTER Winds Sweeping from the North Pole.

HEARD THEIR BONES CREAK.

It was so cold in New York that a few men dared venture to face the blizzard. The thermometer registered 26 degrees below zero.

Up in the State they are having even colder weather. In the Mohawk Valley the thermometer registered zero at 6 o'clock this evening, and it is becoming still colder. In Buffalo the thermometer registered 10 degrees below zero.

From Dover, Delaware, comes the report of a genuine Western blizzard. High winds have blown from the north, and the snow is almost at a standstill in the State this evening, and two passenger and two freight trains are snowed in about one mile south of there.

At Stanton, Va., the mercury registered two degrees above zero. The thermometer at Rock registers four degrees above, and at Potsville, Pa., there was a regular blizzard from the northwest all day, blowing at the rate of fifty miles an hour. The thermometer registers six degrees below.

The East Franklin colliery, at Trenton, Pa., owned by the Reading company, was obliged to suspend operations, because of the heavy snow and weather, and other collieries, it is reported, will also suspend work temporarily.

The coldest place so far heard from is Lindsay, Ontario, with a temperature of 22 degrees below zero. Detroit, Mich., Jan. 10.—Not since 1889 has Michigan experienced such cold weather as prevailed throughout the State last night and to-day.

At St. Paul, Jan. 10.—The mercury continued to drop rapidly during the night, falling nearly as much as in the previous twenty-four hours. During the night it touched 20 to 30 degrees below zero in different parts of the city, with an average of 25 degrees below.

At St. Paul, Jan. 10.—The mercury continued to drop rapidly during the night, falling nearly as much as in the previous twenty-four hours. During the night it touched 20 to 30 degrees below zero in different parts of the city, with an average of 25 degrees below.
