

IT OPENS TO-DAY.

The Home Savings Bank

Resumes. CASH FOR THE DEPOSITORS. Coin Fresh From the Mint Ready to Be Paid Over the Counter on Demand.

The People's Home Savings Bank will open its doors for business this morning. Since the bank closed on June 23 the management, both under Mr. Farnum and his successor, has directed its efforts toward...

It will be remembered that the Savings Bank closed only on account of sympathy for the Pacific Bank, which was its treasurer, and when it was decided to close that latter institution the directors of the Savings Bank were fearful that a run would be at once inaugurated, and thought that it would be better for all concerned if they should close until the trouble should blow over; but, being once closed, they could not reopen until the Commissioners had made their examination and the Attorney-General ordered them to resume.

All of this took time, and it was only within the last few days that the opinion was published. In this Attorney-General's opinion it is shown that the bank is worth \$24,308 63, and says that "it can and should resume business as a savings bank as soon as sufficient of its assets can be collected to warrant its doing so."

As now the opinion was published the directors of the bank met and adopted the following resolution deciding to reopen the bank for business:

Resolved: That a general pro rata distribution among all depositors of 2 per cent of the amount deposited by each of said depositors respectively be and the same is hereby made.

"Yes, we are going to open in the morning," said Frank V. McDonald last night, "and we are not going to stop until we continue in business. The time has come for it, and we are satisfied it is the correct move."

The bank is to have an opening with the expectation that there will be something of a run for a few days, but we do not think it will be for long, and after a few days we hope to be able to revoke the rule of paying only 2 per cent of course if we pay more than that it will be better for us to choose to and not because the depositors have a right to demand it. The law permits us to make such a pro rata payment as we see fit in making, but even this amount will send quite a bit of coin in circulation in the city.

"We have about two millions in deposits, and 2 per cent of that will be \$40,000, and we do not expect to have a run, but we will be withdrawn, at the same time, of course, we have more than that on hand. In fact, we have as much, if not more, in coin in proportion to our deposits than any other savings bank in the city."

"Commercial deposits will come under the same rule as the ordinary savings accounts. As soon as we closed they became practically of no value, and we will draw interest in the same way. The dividend to depositors which was declared on July 1 was at once credited to their accounts, and has also been drawing interest from that date."

"Of course, no one can draw more than 2 per cent of his deposit until a new appropriation is made. That is, he can not draw 2 per cent of his deposit until the next day to draw again. But we are in hopes that after a few days it will not be necessary for us to take advantage of this rule."

The clerks in the bank were busy yesterday arranging great trays of silver and gold, wheeling them into the vaults and preparing for business to-day. A supply of gold has just been received from the mint, and the anxious depositors who lined up this morning will be comforted by the sight of the sacks of money, even if their money is not paid in full. All who ask it will be paid in full from their deposit, whether they come first or last.

THE FIRE DEPARTMENT.

Recommendations of Chief Sullivan to the Supervisors.

The report of the Fire Commissioners for the fiscal year was filed with the Board of Supervisors yesterday. Its principal feature is a communication from Chief Sullivan making the following recommendations: That the chief of the department be renewed the recommendations of my predecessor in office, David Scannell, to increase the efficiency of the fire department by reorganizing it into a fully paid system where the entire force will be continually on duty.

The alarming increase in the number of fires each year is a warning of an increasing danger and should be heeded. One large conflagration may at any time sweep our city into ashes. Nearly every city of note in the world has at some time or other been visited by large fires, and no one knows when San Francisco's time may come. Our city has never before been visited by fires which have cost her enough money to maintain a properly equipped department of fire generation.

It was decided to hold the championship games on Saturday, October 14, at a place to be hereafter agreed upon. The selection of the place for the games was made by the committee on the subject, and was located a home that cost \$11,000 almost at the bottom of the steep grade that begins at Church street.

Five years later Mrs. Alice Pease purchased the place and built her home and her two daughters still reside there. The ones most affected by the proposed change of grade, Mrs. Pease says she was very careful to ascertain the exact official grade before she bought the premises, and she never knew the grade had been changed till a little while ago when the contractor started in to do the filling. She was not moved, either before or after the change in the grade was made, she does not know of the change in time she made no protest. Now it is too late to claim damages against the city for almost \$100,000 of property, and the lady and her two daughters are naturally greatly alarmed at the state of affairs that threatens them. The new grade, if continued as mapped out, will depress the house of Mrs. Pease about twenty feet below the level of the street, whereas it is now about on the same level.

But Mrs. Pease and her charming daughters are not the only ones wrought up over this vexed Liberty-street grade question. Recently the City and County Surveyor has caused a very careful survey to be made of this entire neighborhood. When this was completed he put on his thinking cap and wrestled with the problem, which now was: How to grade Liberty street between Church and Sanchez so as to cause the least trouble and expense to all the property owners interested? For him to know that the people on the south side of the street purchased and built their homes in good faith, grounded on the official grade that was fixed five years ago.

Now, if the present grade is not maintained or the old official grade returned to these southside homes will be left standing high in the air, and the owners thereof must build twenty-foot bulkheads in front of their lots in order to keep them from sliding down.

Thomas F. Hagerty, who owns the house and lot on the top of the hill, very near Sanchez street, is a stickler for the present official grade. It will save him many steps up and down to reach his home of the street, besides many dollars that must otherwise be expended in a stone bulkhead.

He has several neighbors in the same boat. R. H. Bell is one of these. "As it is I have had to build bulkheads all over my property to keep the lots above me from toppling over into my back yard and to keep my back yard from coming down into the kitchen," he explains, "and now they want me to build another big bulkhead in front of my property. I only want justice done me. I bought in good faith on the present grade, and it will

A CASE OF GRADE.

The Liberty-Street Hill

Troubles. IT IS BULKHEADS OR CUTS. A Mighty Problem That the Board of Supervisors Must Soon Wrestle With.

To the residents of the neighborhood of Liberty and Sanchez streets the one vital question to-day is that of bulkheads. It is closely allied to, in truth, follows along as a sequence to that enormous problem of grading Liberty street.

Once peace and harmony prevailed among the few inhabitants of these hills. Now all is discord, distrust and apprehension.

Behold the inhabitants of one side of the street bitted tooth and nail against those who live on the other side. It is really a battle of the north and the south.

When the Supervisors get back from their summer vacations they will have to grapple with that grade problem. They will have to settle definitely whether those on the north side of Liberty street, between Sanchez and Church, must build bulkheads to keep themselves from being buried beneath the new grade of the thoroughfare.

And so the matter stood when the City and County Surveyor put on his thinking cap and went at the problem. After various attempts, the official came to the conclusion that the most equitable way of dealing with the difficulty was to establish a grade that was level and between an intermediate grade.

His proposal is to raise the grade at Sanchez and Twentieth streets 6 feet, and lower it at Church and Twenty-first streets 7 feet. He also wants an independent grade established at Sanchez and Liberty streets, 12 1/2 feet lower than the present grade, or back again to what it was when Mrs. Pease purchased her property.

But this is not all. The City and County Surveyor is bent on pleasing everybody, and he proposes a sidelong grade of 5 feet, which will make the street slope from the south to the north.

In April last this scheme was reported to the Supervisors. In their wisdom that body referred the matter to the Street Committee. Protests began to come in from some of the property-owners, for the sidelong intermediate grade did not please everybody. And the Street Committee, recognizing its own lack of wisdom in the matter, just put it off and put it off. Then it deferred the subject for awhile. Then vacation came.

Now vacation is nearly over, and when the board reassembles that Street Committee will be called upon for a report on the Liberty-street grade.

And the question cannot be shelved nor postponed any longer. A majority of the property-owners of the block, it is claimed, are in favor of the intermediate grade and are going to see that the question is definitely settled at once.

AH FAT'S GAME.

Chinese Try to Bribe a

Prison Guard. JOHN MALONEY THE TEMPTED. The Directors are Investigating the Matter, and Believe It the Result of Mistaken Mercy.

It has been somewhat of a puzzle to the members of the State Board of Prison Directors to ascertain whether or not they have been duped in pardoning an old resident of San Quentin named Ah Fat. As it is the board is investigating two cases of attempted bribery in connection with the case.

About twenty years ago Ah Fat was convicted of the murder of a Chinese interpreter in Sacramento. He was sentenced to a life term. From the moment that he passed between the prison gates, Ah Fat's friends never ceased interceding for his release. All sorts of influences were brought to bear upon successive directors. The favorite plea of the convict's intercessors was that he was not the murderer, but that he had been made the scapegoat of the guilty man by members of the Chinese company.

This latter argument was repeated so often to members of the present board that they finally became convinced of its probability, although all the San Quentin officials, as well as the Sacramento authorities, were satisfied of Ah Fat's guilt. About a month ago the board proposed to pardon him, provided he would return to China and never re-enter the United States.

Ah Fat demurred slightly to this arrangement. He expressed his perfect willingness to leave his country to remain away, but he said that he had important business interests at Chihuahua, Mexico, and he moved to amend the board's proposition to pardon him, instead of back to China. The directors declined to give him such a prime opportunity to slip into Southern California. It must be China or nothing.

The convict then begged to be deported and asked for his discharge. The directors required that his friends should pay into the warden's hands \$50 for a ticket to Yokohama. The money was furnished by a prosperous-looking Chinese, who came to San Quentin with a large bundle. He was allowed to see Ah Fat and conversed with him at length in their native tongue. He then gave the warden a bundle to Ah Fat's traveling garb.

No objection was made to his wearing the clothes, and on the 16th inst. he came to this city in his clothing. He gave the bundle to the warden, and the warden placed his prisoner on board the steamer City of New York, leaving on the following day. It is believed that he remained on the ship until he reached San Francisco, instead of back to China. The directors during the few hours that he was in the city offered inducements to allow Ah Fat to remain in the city. He was made well-to-do Chinese and after a few days' stay, he returned to his country.
