Omaha Put Under Martial Law.

ALL THE SALOONS SHUT.

Steps Taken to Prevent Mob Violence.

STRIKERS KEEP THE PEACE.

But They Make Life a Burden for the Troops Sent to Quell Them.

OMAHA, Neb., Aug. 10.—Several more companies of troops from the interior of the State arrived to-night, and were at once rushed into South Omaha. The strikers are quiet and offer little opposition to the soldiers. But the troops have not relaxed their vigilance on the peaceful appearance of things, and squads of soldiers constantly patrol the streets, and a Gatling gun is unlimbered at the intersection of the two principal streets, where it can sweep in all directions. Several of the members of the strikers' executive committee expressed themselves as being perfectly satisfied that the troops had been called out, but the men on the street did not take as kindly to it as did the committee. They say it was not necessary to bring in soldiers, and privately intimate they will have revenge.

ARID LANDS AND EXHIBITS.

Subjects to Which the House Devoted its Attention.

WASHINGTON, Aug. 10.—The House devoted itself to-day to discussing projects for a Government exhibit to cost \$200,000 at the Atlanta exposition, and to give each of the arid land States 1,000,000 acres of land to encourage the reclamation of their deserts, contained in the Senate amendments to the sundry civil bill. The former furnished opportunity for patriotic speeches from the Northerners on a reunited country, and a majority voted to instruct the House conferees to support a substitute, having practically the same effect as the amendment. No decision was reached upon the arid land project so that the conference report on the sundry civil bill will come up again to-morrow.

TESTING ARMOR PLATE.

Uniform Textile Strength is the Thing to be Desired.

WASHINGTON, Aug. 10.—The investigation of the alleged Carnegie armor-plate frauds was resumed to-day. Captain Simpson, chief of the Ordnance Bureau of the Navy Department, was a witness. The principal matter of interest was his opinion of the method of treatment of plates by piecemeal, concerning which he said that a plate hardened in one section and softened in another was not to be depended on. Captain Simpson said a plate could not be considered uniform if specimens of different parts varied 20,000 pounds in tensile strength. In an extreme case a difference of 5000 or 10,000 pounds might be permitted.

BALTIMORE, Md., Aug. 10.—A letter from Miss Lulu E. WEATHER CROP CONDITIONS.

Both Corn and Wheat Have Badly Damaged.

WASHINGTON, Aug. 10.—The monthly report of the agricultural department shows a decline in corn of nearly 26 points since July 4. The average for the entire breadth is 63.5 against 57 for the month of July. The condition for August, 1894, was 96. The great decline is due almost wholly to the extensive and unprecedented severe drought that set in since the last report, and to hot dry winds, that swept over the States of Nebraska, Kansas, Iowa and parts of other Western States. In some localities the crop has been injured beyond recovery, while in others timely rains would go far toward assuring their yields. The averages for the principal States are: Ohio 79, Kentucky 80, Indiana 88, Illinois 75, Iowa 45, Missouri 82, Kansas 49, Nebraska 33, South Dakota 29.

CONFEREES DISAGREE.

The Sundry Civil Bill Goes Back to the Two Houses.

WASHINGTON, Aug. 10.—The House conferees on the sundry civil bill reported back to the House to-day an agreement of all the Senate amendments except fourteen, most of those embodying new radical legislation. One is the proposal to give each of the arid land States one million acres of arid public lands for reclamation; the appropriation of \$200,000 for a Government exhibit at the Atlanta Exposition, which will probably be satisfactorily adjusted when the Senate conferees meet; and a third, an item of \$250,000 to purchase the Mahon square as a site for the Government Printing Office.

MISCELLANEOUS.

What Paine's Celery Compound Did for Sheriff Sinnott.

While the sun shines the farmer makes hay.

Men and women whose state of strength and nervous energy has fallen so low that it barely keeps them through the day should fill their veins now with fresh blood full of red corpuscles, and store the million tiny nerve cells with energy by means of Paine's celery compound while it is summer and the sun shines.

There are now few drafts upon the strength of the body; no winter colds to resist, no spring languor to drag one back. It is amazing how rapidly it is now possible to lay up nerve force and vigor over and above the daily expenditure.

Those who suffer from kidney troubles, liver or stomach weakness, and rheumatism find no time so suited as the present to overcoming these diseases by giving these over-worked poorly-fed organs blood that is rich and pure in quality and sure to invigorate.

This is what Paine's celery compound is doing all over the country while it is summer and while every one feels that now is the time to get well.

That most remarkable blood and nerve remedy of this country—Paine's celery compound—makes vigorous blood; removes disease from vital organs by richly feeding worn-out nerve tissues all over the body and building up the strength of the body—that is why it makes people so quickly well.

Prof. Edward E. Phelps, M.D., LL.D., of Dartmouth College, first prepared Paine's celery compound. It has met the hearty approval of physicians and scientific men all over the world.

It makes people well. Says Deputy Sheriff John Sinnott of Whitehall, N. Y., whose portrait is given above:

"In my opinion, Paine's celery compound is the best remedy in the world. I have been troubled with inflammatory rheumatism some twelve years, sometimes crippled for three months at a time. A friend told me to try Paine's celery compound, and I am now on my twelfth bottle and it has made a new man of me. I heartily recommend it to every one troubled with rheumatism."

It makes people well.
