There is room for the manipulation of a very stiff broom.

We never could quite understand some of the Courier's nonsense, at any rate. This week's issue vouchsafes the astonishing information that Indianola is the starting point of all stages in Southwestern Nebraska and Northwestern Kansas. The case is just about like this, either the Courier is densely ignorant of the fact that there are three or four daily stages running out of Mc-Cook to Oberlin, Hayes Centre, etc., or else its localizer purposely prevaricates and misrepresents. Either is inexcusable. It is beyond our ken why any such statement should ever appear in a pener that pretends to give reliable rum, in the presence of ladies, should information. The fact is undeniable stage facilities, that there are none better in the entire Republican Valley than many of the objective points for landseekers, and has the best of roads. Since Bro. Bishop has resigned his post-office appointment, and built himself a building, and enlarged his paper, and secured the valuable services of his brother as local rustler, his list of subscribers has suddenly become so large that he has actually found it necessary to reduce his price of subscription—for fear of being overwhelmed with new subscribers, you know. The only precedent for such untold occurrences we know anything about is the circumstance related of Lord Byron, who retired one night and awoke the following morning and found himself famous. So with the Courier, whose list of subscribers seems to have doubled in numbers in a single night. Come, come, G. S., we will take a few facts in ours.
