FRIDAY, FEBRUARY 27, 1903.

UNITED WE STAND.

When the people of a town are united and work together for the common good, wonderful effects result. When they pull against each other, some trying to tear down, and others to build up, some with one hobby and some with another, the evil effect, the slow growth or decadence of the town, are sure and certain.

The experience of Jacksonville is one of the most striking on record. With the whole state injured by the freeze, wholesalers lost from retailers throughout the state, who in turn were bankrupted by the failure of their customers to meet their obligations. But the people of Jacksonville, when working for the common good, stood shoulder to shoulder and Jacksonville continued to grow and prosper. The politicians had their fights, and no one who knows will state that the political strife in Jacksonville was not most strenuous. But, if a factory or deep water was wanted, or anything else looking to the interest of the people in common, they stood together—and they got what they went after. Then came the fire. Thousands were ruined and homeless. But "the gods help those who help themselves," thousands of dollars poured into Jacksonville from people all over the United States, from people who could but admire the bravery, the patriotism of its inhabitants. The people of Jacksonville were united in prosperity, and adversity only heightened the bonds of unity. The result of this patriotism is shown by the remarkable progress Jacksonville has made since the fire.

Smaller towns in the state should benefit by the example set them by Jacksonville. When the people are prosperous they should unite and work in harmony for the common good; when adversity reaches them, they should be sure to reach all at one time or another—they should come closer together; they should clasp each other's hands in friendship and in fellow-feeling and in sympathy. Such a people no adversity can conquer, no trouble dismay. "United we stand; divided we fall."

It takes many men months and years to build that which the hand of an incendiary can destroy in one hour; God himself has allowed a man 40 years in which to reach the strength of his manhood—but the hand of an assassin can destroy in one minute that which required 40 years of God's fostering care to perfect.

The Pensacola News says: "Mr. Thos. Wentworth will today take charge of the city circulation of The News. He will take subscriptions and collect all accounts." Well, if he does, just send him this way, please, after you are through with him. The man who can "collect all accounts" due a newspaper is a daisy and should be passed along from town to town for the benefit of a suffering profession.

LIBEL SUIT DROPPED.

Through a private source The News is informed that Editor J. W. White of the Florida Fraternal Record has withdrawn his \$25,000 libel suit against Editor Carter of the Metropolis. This is well, and as it should be. Editors should settle their little differences with the pen, if they can; if not, then axes, shot-guns, bowie-knives, tomahawks and rocks should be used. But the news, notes.

Editor White issues the best Fraternal paper in the South; perhaps, in the United States, while the Metropolis has no peer in after-noon issues in the state.

teous, obliging gentlemen in the state metropolis. They are friends of all of us "weekly" fellows—and good friends, too.

THE NEWS congratulates Bros. White and Carter on the amicable settlement of their differences.

DAYTONA.

Items from the Gazette-News.

N. Erickson, the cabinet maker, has been busy lately turning out a number of kitchen tables for Bingham & Maley, a ping-pong table for the Clarendon Inn, and a very handsome checker set, including a table and four chairs, for Frank E. Bond.

George H. Ludwig has purchased the Maxwell place at the northeast corner of Second avenue and Ridgewood. He intends to remodel the house and beautify the grounds and when completed Mr. Ludwig will have one of the prettiest places in town.

Since the failure of E. J. Arnold & Co., the St. Louis turf investors, there are many poorer but wiser people in Daytona. It is estimated that fully \$8,000 was invested by residents of the place. The assets of the concern are practically nothing, and 160,000 of the last dividend checks sent out have been protested. This is but the usual ending of all get-rich-quick schemes.

Avery Smith's big auto coach caused lots of excitement Thursday afternoon. The South Bridge company forbade him crossing their bridge, but he contended he had a right to and made an attempt. As he was coming on the draw a timber was thrown across and the big auto stopped. The directors then chained the wheels together and there the auto stayed until yesterday. Mr. Smith, we are told, will bring a suit against the company, and the question as to whether he has a right to cross will be settled in the courts.

Dr. Hippolyte Baradue of Paris announces that he has discovered a way of photographing "radiating mentality" and recording the human emotions of love, hate, anger, jealousy, insanity or of any other kind of quality that may exist. It is useless to try to disguise them before the telltale sensitized plates of Dr. Baradue, who says his discovery makes it possible to prove the mental derangement of the most cunning lunatic and reveal the heart emotions of the most outwardly calm and placid lover.

The only mind safe from the searching inquiry of the sensitized plate is the normal one. It fails to make any impression, but a person in a fit of anger leaves on the plate an impression resembling the convolutions of a cyclone.

No camera is used. The sensitized plate, says a writer in the Chicago Tribune, covered with dull black paper, is brought into contact with the person whose emotions are to be recorded.

WAVE OF ANGER FROM FACE OF YOUNG GIRL.

Placed over the heart and left there for fifteen minutes, the work is done. A person in a high fever leaves globular spots all over the plates, anger sweeps across it in spirals like a cyclone, religious fervor appears in the shape of pearly beads, while intense religious enthusiasm is pictured in flame-like tongues radiating from a common center. Grief and sadness show a chaotic tangle of lines and circles, while joy is shown in expanding radiations extending from the central focus.

To Steady Tripod Legs.

A very simple method to prevent tripod legs from slipping on polished floors is to choose a piece of rubber tubing with an opening the size of the tripod legs and cut off three two and a half inch lengths. In one end of each length place a tightly fitting cork, and the other end is fitted over the tripod legs. If the rubber, projects slightly beyond the cork, an air space is formed, which causes suction under pressure and holds the tripod legs firmly. Of course the rubber rim must be cut on a slant, so as to rest squarely on the floor.

Recent Labor Saving Device.

Henry Finne, Norwegian of Stavanger, has invented a machine which has marvelous capacity for making the boxes in which sardines and anchovies are packed. Hitherto a skilled laborer could make about 300 tins per day, but by the use of the machine about 12,000

State News

A lodge of the Fraternal Union will be organized at Boynton, Dade county.

Lake City's board of trade has been reorganized, and is again working for the common good.

Leesburg has reorganized her board of trade and will go to work to induce new settlers and capital to go there.

St. Petersburg wants a big hotel. Better be satisfied with several small ones. They do a town more good than a large one.

Many new lumber firms have recently established lumber offices in Jacksonville and are now doing a large business.

Over 200 pounds of melon seed have arrived at Umatilla. The growers there will plant a greater acreage of melons than ever before.

Sanford celery growers are thankful for the little frost of last week. Some of the celery had been threatened with blight, as a result of the hot weather. Sanford people have 75 acres planted to celery.

The Federal grand jury, in session at Tampa, has returned several indictments against C. C. Post, Helen Wilkins Post, and their son-in-law, C. F. Burgman, on the charge of using the mails for fraudulent purposes.

A Plant City man sold 14 head of cattle fed on velvet beans for \$25 per head or \$350 for the drove. These cattle were worth \$14 per head on the range. It is thought they will average 400 or 500 pounds each.—Bartow Courier-Informant.

The Times-Union is making a valiant effort to have Florida represented at the St. Louis exposition next year. If the state is represented there at all, it should be well represented, with a fine building and displays and advertising matter from every county in the state.

E. O. Painter, who gives his residence as Jacksonville, is one of the incorporators of a company called the "Central Florida and Indian River Railroad Company." The notice of intention to apply for charter is now being published in the Melbourne Times. The road as proposed will run from Melbourne, in Brevard county, to Orlando and Bartow. The capital stock will be \$2,000,000.

I. E. Cooper, a white man, has been arrested charged with the murder of Marshal Bowman of Punta Gorda. Cooper has been committed to jail without bail. This was one of the most foul murders ever committed in the state. Bowman was sitting in his home, with his baby in his arms and two other children at his knees, when he was shot dead through an open window, several buckshot penetrating the brain. The children were mercifully spared from the assassin's bullets.

WINTER HOUSE PLANTS.

How to Raise Flowers For the Home From Bulbs.

The flowers that grow from bulbs are well suited to indoor gardening, says the New York World. Hyacinths in all their pretty hues will keep in bloom throughout the winter, tulips will grow with vivid color as a reward for a little attention, while the jonquil, narcissus and crocus, spring's harbingers, will mistake the warm room for a sun-drenched thawed earth and peer forth when all outdoors is frozen.

The pink and yellow primrose grows well in small pots and lends graceful adornment to a table. Calla lilies are universal favorites. Snail and ivy can be trained to throw their graceful sprays wherever most desired.

A hardy plant called the Wandering Jew is so true to its name that from a few small cuttings it will spread in a few weeks all over the face of the earth that surrounds it and roam at will round its flowerpot or vase.

Chrysanthemums should surely not be omitted from a list of winter house plants. Transplant them before frost, let their new soil be just like their old soil, give them water in moderation, with sunlight in abundance, and your chrysanthemum corner will be a thing of beauty and a joy all through the winter.

Philosophy Ancient and Modern.

"Epictetus said all philosophy lies in two words, 'restrain' and 'abstain.'" "Well, Epictetus may have had it figured out all right in his day, but in these times philosophy seems to be pretty fully expressed in the two words 'gain' and 'retain.'"—Chicago Record-Herald.

THE DEATH PENALTY.

A little thing sometimes results in death. This a mere scratch, insignificant cuts or puny boils have paid the death penalty. It is wise to have Bucklen's Arnica Salve ever handy. It's the best Salve on earth and will prevent fatality, when Burns, Sores, Ulcers and Piles threaten. Only 25c. at W. A. Allen's and G. W. Fisher's drug stores.

In an interview with a representative of the European Herald, S. F. Edge, the winner of the Coupe Internationale, made some remarks that should be of interest to every chauffeur. He stated that the great value of the pneumatic tire is its absorption of the obstacles to speed offered by the ordinary road. Every time a solid tire strikes an object in the road there is more work for the engine to do and a consequent loss of speed. A pneumatic tire, on the other hand, leaps over a stone or ridge in the road, the tire allowing the obstacle to sink into its elastic surface. Thus the amount of power necessary to surmount the obstacle is diminished.

It might be thought that it surely would not take much power to lift an automobile over such stones and ridges as may be encountered in an ordinary road, but when it is considered that an automobile at high speed frequently covers forty yards in a second and that many such little obstacles would probably be found in this distance it is evident that with no pneumatic tires to lift the automobile over them there would be a serious decrease in the efficiency of the engine and a consequent falling off of speed.

Electrical Timekeeper.

As a result of the failure of the human timekeepers at the Deauville races, when one of the stop watches became deranged and lost several seconds, thereby much astonishing the world by new records, some new automatic apparatus has been considered necessary. Among the devices of this character which have recently been proposed is an electrical timekeeper. The apparatus consists of a box containing a chronometer regulated to work without gaining or losing. The mechanism includes toothed wheels, which unwind a reel of thin tape or paper marked off in millimeters.

CURED CONSUMPTION.

Mrs. B. W. Evans, Clearwater, Kan., writes: "My husband lay sick for three months; the doctors stated he had quick consumption. We procured a bottle of Ballard's Horehound Syrup and it cured him. That was six years ago, and since then we always kept a bottle in the house. We cannot do without it. For coughs and colds, it has no equal." 25c, 50c, and \$1.00 bottle at all druggists.

Red Color in Battle.

The number of soldiers slain in battle depends a great deal on the color of their uniforms. The more conspicuous the helmet and jacket the better the target, and consequently the greater the mortality. Red attracts the eye most readily, and twelve men wearing that color are killed to seven in rifle green or six in blue or five in either brown, blue-gray or gray.—London Answers.

ARE YOU RESTLESS AT NIGHT?

And harassed by a bad cough? Use Ballard's Horehound Syrup, it will secure you sound sleep and effect a prompt and radical cure. 25c, 50c and \$1.00 bottle at all druggists.

Wasp's Method of Attack.

Belt in his "Naturalist in Nicaragua" draws attention to the methods of attack used by different species of wasps. One, accustomed to animals and not to man, takes care to crawl down the out-standing hairs to the skin before inserting its sting, while others which live in the midst of human dwellings fly straight at a man's face. The first species, true to inherited instinct, when it attacks unfamiliar human beings attaches itself to their hair or their beards. But there must have been a time when the second species discovered that the face was the vulnerable part, and the discovery was the outcome of the action of brain.

It Keeps the Feet Warm and Dry.

Ask to-day for Allen's Foot-Ease, a powder. It cures Chills, Swollen, Sweating, Sore, Aching, Damp feet. At all druggists and shoe stores 25c.

It doesn't follow that the man who boasts of his rural origin will enjoy being told that he looks like a farmer.—Ohio State Journal.

Mother Gray's Sweet Powders for Children, Successfully used by Mother Gray, nurse in the Children's Home in New York, Cure Feverishness, Bad Stomach, Teething Disorders, move and regulate the Bowels and Destroy Worms. Over 30,000 testimonials. They never fail. At all druggists, 25c. Sample FREE. Address Allen S. Olmsted, Le Roy, N. Y.

THE HAWAIIAN CABLE.

We have had a string to Hawaii a long time, but the cable is more substantial.—Omaha World-Herald.

Having cable communication established with Hawaii, we are now realizing the fact that the amount of news Hawaii has to send us is not overwhelming.—Pittsburg Dispatch.

The Hawaiian cable is certainly all right. These two names were signed to the first message to President Roosevelt, and they came over whole: J. Kalaniana'ole, D. Kawanakoa.—New York Commercial.

PUTS AN END TO IT ALL.

A grievous wail oftentimes comes as a result of unbearable pain from over-taxed organs. Dizziness, Backache, Liver complaint and Constipation. But thanks to Dr. King's New Life Pills they put an end to it all. They are gentle but thorough. Try them. Only 25c. Guaranteed by W. A. Allen and G. W. Fisher, druggists.

EMORY COLLEGE

1836— OXFORD, GEORGIA. —1903

OXFORD is situated on a high ridge in the healthiest section of Middle Georgia, where there are no local causes to breed sickness. The college will continue to make every effort now, as in the past, to send forth young men well furnished in physical strength, in mental training, and in zealous Christian character.

Courses leading to the three degrees—A.B., Ph.B., and S.B.—are designed to lay broad foundations for any walk in life. After the Sophomore year, opportunity is given for election of studies in the direction of the student's special aptitudes.

The Central Dining Hall will offer good food at actual cost, not to exceed eight dollars per month. Furnished rooms are let at one dollar per month for each lodger. This system is under the immediate supervision of a member of the Faculty, who is assisted by a competent and experienced matron.

All necessary expenses for the college year may be brought within \$175.00.

FALL TERM OPENS SEPTEMBER 17, 1902
