

IDLE MONEY

Money often lies idle awaiting opportunities for investment; but these opportunities do not come every week, month, or even year. In the meantime this money should be earning something; and it can, if you place it in this bank.

A PLANET OF GREAT PEAKS.

Popularity of the Ring Mountains of the Moon.

The moon is really and truly a great planet of mountains, its whole visible surface being dotted with elevations of curious shapes and of extraordinary height. We say "its whole visible surface" and hasten to explain that we make this statement simply because the eye of man has never seen but one side of the surface of the moon. What we see convinces us that the little planet is extremely mountainous, for on the "end" exposed to our view there are no less than 30,000 peaks, varying in height from 2,000 feet to four miles. When we consider the fact that this lunar world is only one thirty-second part as large as the earth we can easily see why it deserves the title of the "planet of great mountains." There is a peculiar thing about these 30,000 moon peaks. Each and every one of them has a ringlike form, the open end of the conical point being of greater or lesser diameter, according to the height of the mountain. In a low grade telescope these peaks resemble true volcanoes, but when viewed through a high grade glass it is seen that the depression in the center of the queer "ring mountain" is often so great as to be below the general level of the surrounding country. The depth of these depressions is calculated in a curious manner, by figuring on the relative shadows they cast when the sun is shining full upon them. The diameter of these "ring mountains" varies greatly, some of the larger ones being 50, 100 or even 150 miles, while the smaller look like post holes when viewed through a good telescope.

Nowadays He Wants the Earth.
Times have changed since the poet wrote "Man wants but little here below."—Chicago Tribune.

THE BREATH OF LIFE.

It's a significant fact that the strongest animal of its size, the gorilla, also has the largest lungs. Powerful lungs means powerful creatures. How to keep the breathing organs right should be man's chiefest study. Like thousands of others, Mrs. Ora A. Stephens, of Port Williams, O., has learned how to do this. She writes: "Three bottles of Dr. King's New Discovery stopped my cough of two years and cured me of what my friends thought consumption. O, it's grand, for throat and lung troubles." Guaranteed by Barclay & Groover, druggists. Price 50c and \$1.00. Trial bottle free.

Could Tell It Another Way.
Many years ago an old and well to do farmer in western New York had something of a reputation as a litigant. He had a peculiar twist about his mouth when he talked, due to some muscular affection, which gave a striking effect to his utterances. His old neighbors tell of a trip that he made to see his lawyers on a certain occasion when he had made up his mind to have a lawsuit. He sat down with his lawyer and laid out his case before him at length. The lawyer said, "Well, on that statement you haven't any case." The old man hitched his trousers nervously, twitched his face and hastily replied, "Well, I can tell it another way."—Case and Comment.

The Dominion of Canada.
The Dominion of Canada came into existence on July 1, 1867. The province of Canada was divided into upper and lower Canada, which divisions are known now as Ontario and Quebec respectively. It was subsequently augmented by the province of Manitoba and the Northwest Territories in 1870, by British Columbia in 1871 and Prince Edward Island in 1873 and now includes the whole of British North America.

Wireless Whispers.
Mrs. Windfall—Just imagine, Hiram! One of the sailors just told me that this boat is now in communication with her sister ship. I wonder what the conversation is about. Mr. Windfall—Humph! Most likely each is asking the other if her cargo is on straight!—Puck.

Fitness.
Author (invited to a very poor dinner, to himself)—A miserable dinner! I'll have to take care that I don't let anything witty slip out.—Fliegende Blätter.

Neutrals are soused from above and singed from below.—German Proverb.
