

# Be sure to use a Cream of Tartar Baking Powder

ROYAL Baking Powder is Made of Cream of Tartar and is Free From Alum or Phosphoric Acid

Royal Baking Powder is pure and wholesome beyond question. There is never any doubt of the healthfulness nor of the superiority of the food it leavens.

Consumers are sometimes solicited to buy baking powders other than Royal because they cost less. It is evident to cost less they must be made of inferior ingredients.

Low-priced baking powders—10c., 20c., 25c., etc.—are made from alum, phosphate or other harsh acid

At most, an alum powder would not lessen the cost of a cake or batch of biscuit more than the fraction of a cent. But can you afford for any sum to endanger your health by making your food with a dangerous baking powder?

"I regard the use of alum baking powders as highly injurious to the health of the community, and believe that their sale should be forbidden by law."—Geo. F. BAKER, M.D., University of Pennsylvania.

Dr. E. W. Yours truly,
