

The Daily Sun

Printed at the Post Office at Gainesville, Fla., as second-class mail matter.

H. H. MOORMARY, Editor and Publisher. W. W. ASHLEY, Associate Editor. JESSE E. HURTZ, City Editor. LOUIS J. BRUMBY, Gen'l Traveling Agent. P. M. FREWITT, Supt. Composing Rooms.

OFFICE: PORTER BLOCK, 405 W. Main Street, S. TELEPHONE 43-2

THE DAILY SUN, published every morning except Monday, delivered by carrier in the city, or mailed to any part of the United States, postage free, for \$5 a year; \$2.50 six months; \$1.25 three months; or 50 cents for five weeks—strictly in advance.

Reading notices in local column 10 cents a line for first insertion, and 5 cents for each additional insertion.

Notes for display advertising made known on application.

The Twice-a-Week Sun is an eight-page, forty-column paper, published every Monday and Thursday, and contains all the news of the week, local, State and general, and will be mailed, postage free, to any part of the United States or Canada, for \$1.00 a year—in advance.

All advertising bills become due after first appearance of advertisement, unless otherwise stipulated in contract. Parties not known to us will be required to pay for advertising in advance. Address, THE DAILY SUN, GAINESVILLE, FLA.

Alcohol will be used as a power in Cuba. It has been developed as a power in this country for many years.

Will some one write a book about "What we didn't know about the big insurance companies" six months ago?

The man who advertises in The Twice-a-Week Sun should bear in mind that it reaches 1,800 subscribers twice each week.

After many papers have ceased "slinging mud" in regard to the East Coast railway Key West extension, the company has got down to business and has commenced to "sling dirt" on the big enterprise.

The localities where wool is grown have numerous woolen mills, and it stands to reason that in the localities where cotton is grown there should be cotton mills. Is there any good reason why Gainesville should not have a cotton mill? Every cotton mill in the South is making money for the promoters.

The investigations to be inaugurated by W. R. Hearst in New York City will no doubt reveal some very peculiar work. If the frauds can be shown as stated, McClellan's election by the smallest plurality on record for any mayor in that city may be knocked out. Hearst has Jerome and Ives to help him, and the bottom of the crookedness may be reached.

Whether The Index intended it for a joke or not, we are unable to state; but following an article in this week's issue of that paper, in which a series of resolutions are published complimenting Judge Wall for his fairness and impartial rulings at the term of the circuit court at Lake City, is an advertisement of a remedy for constipation all enclosed in the same cut-off rules.

"While out strolling last evening," says a reporter, "we passed a house from which emanated the inspiring strains of music from a piano and the throat of a charming young lady." The only words the reporter caught from the song were something about "dear mother." Passing on and turning down a side street the reporter saw through the kitchen window the dear mother with her arms buried almost to the elbow in a pan of dough, the sweat streaming down her wrinkled face and the hot range enveloping her. She was singing: "We'll Work Till Jesus Comes."—Exchange.

A feeding expert has figured amounts of corn it takes to produce various amounts of pork under normal conditions. One bushel of corn will produce 10-18 pounds of pork, from which you can easily determine whether it is better to sell corn or pork. Careful experiments have shown the following facts in regard to feeding corn to make pork: Fifty pounds of corn, fed ground and raw, make 15 pounds of pork. Fifty pounds of corn, fed whole and raw, makes 10 pounds of pork. Fifty pounds of corn, fed ground and fermented, makes 17 pounds of pork. Fifty pounds of corn, fed soaked and fermented, makes 20 pounds of pork.

FOREST RESERVES TIMBER.

The indiscriminate slaughter of forests has caused the Government to inaugurate plans for the operations to logging operations, and the increased demand for the purchase of timber from the forest reserves has called for detailed working plans for the more important timbered areas within them. In order to avoid delay without jeopardizing the future welfare of the forest, and that these working plans may be well considered, they are being made as rapidly as possible for those forest areas from which the sale of timber is probable in the near future. In many cases they are made before the actual application for purchase is received.

Those who purchase timber from the Government are required to observe Forest Service regulations in logging, which guard against waste and provide for the reproduction of the forest. Considerable variety exists in the character and requirements of the forests in any one reserve, so that each working plan must be based on a close study of local conditions.

When setting about the preparation of one of these plans the first question is, What areas in the reserve are adapted to the same scheme of management? After these areas have been selected they are thoroughly studied from every aspect.

The location of the timber is noted and a rough estimate is made of its amount. Then the character and condition of the stand are carefully determined. Its age, overripeness, injury from fire or insects, the possibility of improving it by logging, and the kind and amount of young growth are principal points, all of which must be taken into consideration in settling whether it is advisable or inadvisable to cut.

The question of markets, and the logging facilities, are also taken into account, as well as the present local demand for timber, and the kind of timber required. In connection with these problems attention must be given to the nature of the country, the accessibility of the timber, and the existing roads and drivable streams, because the actual value of the timber is in a large measure dependent upon the ease and economy of its removal.

Reproduction, by which alone the forest can maintain itself, is essential where logging is to be done. For this reason the reproductive capacity of the forest is noted with careful detail, and the effect which fire and grazing may have upon it becomes a question of the first importance.

The data, therefore, which the working-plan study has gathered form the basis of the terms of the contract in agreement with which the purchaser of Government timber removes the timber which he has purchased. These terms include the diameter limit below which the timber may not be cut, the number of seed trees of various species which must be left to reseed the ground, the maximum height at which the stumps may be cut, and the diameter to which the tops must be utilized, and other stipulations insuring clear, conservative logging. Especially, also, they provide for the disposition of the slash, so that the forest floor may safely be cleaned of inflammable material, on which uncontrollable forest fires might feed.

The restrictions imposed by the Forest Service upon timber purchasers are meeting with the intelligent approval of all who are performing logging operations under them. It is more and more clearly understood that they are necessary for the permanent good of the forest, that they are of a purely practical stamp, and that their observance means the continued productivity of the forest and, therefore, the husbanding of the timber supply and all that depends upon it.

Beware of Ointments for Catarrh That Contain Mercury.

As mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the mucous surfaces. Such articles should never be used except on prescriptions from reputable physicians, as the damage they will do is ten fold to the good you can possibly derive from them. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, O., contains no mercury, and is taken internally, acting directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure be sure you get the genuine. It is taken internally and made in Toledo, Ohio, by F. J. Cheney & Co. Testimonials free. Sold by druggists. Price 75c per bottle. Take Hall's Family Pills for constipation.

STATE FAIR NOTES.

One of the most brilliant features of the opening day of the great Florida State Fair, to be held at Tampa November 15 to 30, will be a grand banquet and reception at the Tampa Bay Hotel, given by the Fair Association in honor of the newspaper editors of Florida, who have done more to make the Fair the great success it will be than any other agency. Members of the Legislature will also be invited to attend this banquet, as well as Governor Broward and other State and National officials. The opening exercises will be the most brilliant event of Florida's history. Any editor overlooked in sending out invitations is requested to so notify F. L. Huffaker, secretary, as once, as the list of newspapers on file at Fair headquarters is not complete, owing to the constant changes and increase in number.

Don't fail to attend the great State Fair to be held in Tampa November 15 to 30, as in every feature it will be the most successful State Fair ever held in the South. Every building on the Fair grounds, seven in number, has been completed and is ready for use. The buildings and grounds are the largest and most beautiful in the South. Governor Broward will conduct the opening ceremonies, and it is probable that Hon. Leslie M. Shaw, the distinguished secretary of the treasury, will assist him. The parade feature will be the grandest ever seen in the State. Extremely low rates from all sections of the State, and ample accommodations at reasonable rates assured the thousands attending. A bureau of information has been established at a central point in the city, from which visitors will be directed to pleasant homes, and men employed for the purpose will meet all incoming trains.

Forty of the finest amusement attractions ever brought South will be seen at the Florida State Fair, to be held in Tampa November 15 to 30. Principal among these will be the great spectacular production, "Fighting the Flames," which has never appeared before except at Coney Island and Toronto, Canada. Troop C, Twelfth United States Cavalry, the most noted in Uncle Sam's service, will also prove a great attraction, the maneuvers of the troop being given in connection with the great fireworks and electric production, "Eruption of Mount Pelee." Every attraction secured is novel and up-to-date, and absolutely nothing of an unclean nature will be allowed on the grounds. Neither will any gambling be allowed. Not less than 150 of the finest race horses in the country will enter the races, for which purses amounting to \$10,000 have been offered.

Seven new business places have been built in this city within the past summer, and they are all occupied now. New concerns have opened up for trade, and it is apparent that these will all do a fair-trade. All the new houses that have been built are also occupied, which shows that Gainesville is going ahead and the people have confidence in its future. While many people have complained of the unusually warm summer just past, the health of the city has been good, and there has not even been the least uneasiness from fear of anything that might be in the form of an epidemic or contagion. The health of Gainesville is in every way all right.

The people of Westville are surprised at the weather, as they have not had a frost this season so far.

Panacola wants \$5,000 to relieve the suffering in that city from the effects of the yellow fever.
