NICHOLAS WILL NOT RETURN TO CAPITAL

Emperor of Russia Decides to Spend Winter at Sorokoe Selo.

POLES CLAMOR FOR FREEDOM

Union Delegations Are Working to Secure Co-Operation of Workingmen's Organizations to Assist Them in Demands for Self-Government.

St. Petersburg, Nov. 15.—Emperor Nicholas and the Russian court will not come to St. Petersburg this winter. A short time ago it was announced that the emperor was about to return to the winter palace in an annex of which Count Witte has installed himself but his majesty has now decided to go from Peterhoff back to the Sorokoe-Selo, where he has been living for almost two years with the exception of the last months spent at Peterhoff. Except on the occasion of the ceremony of blessing the waters last January, when the emperor narrowly escaped death, owing to a mysterious charge of grape being fired into the direction of the imperial party by a saluting battery, the emperor has not stepped inside the winter palace for over eighteen months. His decision not to come to the capital is regarded as unfortunate, not only for its moral effect but because it keeps him surrounded by court influences and out of close, immediate touch with Count Witte who at the present time should have daily and almost hourly conferences with the emperor.

Members of his majesty's entourage have strongly advised against the emperor being in St. Petersburg when the national assembly meets, as well as on account of the danger of popular disorders of the capital this winter, recalling to the emperor's mind not without effect, the fatal results of Louis XVI agreeing to leave Versailles and place himself at the mercy of the populace of Paris in 1789.

The Polish delegation here are working to secure the co-operation of the Liberals, Social Democrats and workmen organizations in other general political strike in aid of the Poles' battle for autonomy, but thus far, while they have met with much sympathy, no action has been taken for their assistance.

Count Witte, whom the deputation saw was extremely firm, declaring emphatically that the government would do nothing for Poland under compulsion, and that martial law could not be abolished until the separatist movement comes.

The premier declares that the most of the Poles could expect in addition to the rights granted under the reform manifesto was a separate general manifesto for Poland and municipal self-government.

The Polish delegates say that over 7,000 Pole prisoners are languishing in the jails of Warsaw. The radical press today is not sparing in the denunciation of the government's action in putting all Poland under martial law, declaring that it is a plain violation of the spirit of the reform manifesto.

It is evident that the government has recovered its nerve, and is determined to use severe measures if necessary to restore order.

The agitation throughout the country at the exceptional powers conferred on the aides-de-camp of the emperor who will be dispatched to the central provinces where agrarian disorders are spreading is proof of this. At the same time half a dozen governors, including the governors of Odessa, Tomsk and Kalesa, willfully failed to prevent disorders, have been summarily dismissed at Count Witte's instigation.

The clergy with other classes continue their interest for the Cross staff members, 131 of whom are reported to have been sentenced to death. A hundred orthodox priests at a meeting held at the residence of the Metropolitan Antonov, formulated and dispatched an appeal for mercy to the emperor.

A number of army officers have

at the action of Lieutenant Froloff, of the imperial horse guard, who recently sabred Professor Tarle, of the Polytechnic institute, have joined in a proposal to boycott Froloff and all the other officers of the horse guards unless the lieutenant clears himself of the charge or resigns within a month.

DISTRIBUTION OF SEEDS.

The Government Will Give Away Packages Aggregating 38,000,000.

Washington, Nov. 15.—The annual distribution of vegetable and flower seeds by the department of agriculture will begin on Dec. 1, and before planting time it is expected the entire amount, aggregating 38,000 packages will be in the hands of the people in all sections of the country. Congress for the past several years has appropriated \$290,000 for this purpose the proportion of the amount is used for the experiment work and other kindred matters. The bulk of the thirty-eight million packages is subject to the order of senators and representatives for distribution among their constituents, the secretary of agriculture serving one-fifth of the entire amount to supply the statistical crops correspondents, the weather bureau and for other purposes. The country has been divided into six sections with especial regard to climate and special seeds will be sent only to those localities in which their propaganda and believed to be especially adapted. In addition to those of the vegetable and flower variety, department sends out quantities of cotton, forage and field seeds to localities to which they are best suited and from which it is thought good results may be obtained.

WILL IMMIGRATE TO AMERICA.

Russian Jews Will Come to This Country to Escape Persecutions.

New York, Nov. 15.—Jacob H. Schieff at the annual meeting of the educational alliance last night referred to the conditions in Russia and also spoke of the Jewish race. He said: "The turmoil in Russia must have some serious consequences to the United States. It will mean an immense immigration and this country must keep its doors wide open to allow those who flee from that country to enter. The Jew has a large and generous heart for those afflicted, and will aid great hospitals and like institutions. But when it comes for a Jew to contribute for the head, for education, nothing good can be said. There are many races of the Jew, five or six at least.

"The Jew races cross in this country and they will unite in making the greatest Jew that ever existed, the American Jew. If we want this, we must do our duty to that race and in the end the world will get the benefit."

To Decide Canal Question.

Washington, Nov. 15.—The question whether the Panama canal shall be a sea level or a lock canal will have to be decided within a very few days. All the members of the board of consulting engineers have returned to the city of Washington and expect to meet every day of this week until the final conclusion has been reached. Such the secretary has been observed during the meeting that it is as yet impossible to make a definite statement as to the result. After it has been decided which type of canal to adopt, a short report will be made indicating briefly its nature, but not going into any details. By that time the leave of absence of most of the foreign delegates to the board will have expired and they will leave for their respective countries during the last days of this month.

SECOND SESSION OF LABOR FEDERATION

Many Important Questions Before National Body.

FIGHT AGAINST CHILD LABOR

An Assessment is Levied on All Members of American Federation of Labor to Assist the International Typographical Union in Its Fight.

Pittsburg, Nov. 15.—The second day's session of the American Federation of Labor convention was called to order promptly at 9 o'clock by President Gompers. He called John Mitchell, second vice president, to the chair and James Duncan, first vice president, read the annual report of the executive council. It gave in detail many of the points covered in the reports of the president, secretary and treasurer. Two meetings of the council were held during the year, the last occurring in this city Saturday night. The jurisdictional disputes were again brought up and recommendations made, most of which have been complied with.

The coppermiths made application for a charter, but it was denied and the organization was urged to affiliate with the Amalgamated Sheet Metal Workers' International alliance. Arrangements have been made for the consolidation of the two organizations.

In the matter of the protection of children the executive council had bills introduced in the legislatures of many states, particularly in the south, prohibiting the employment of children in mills, factories, mines and industrial establishments. Some progress was made, but results during the year were not entirely satisfactory.

President Gompers was authorized to enlist the assistance of other organizations in securing the passage of legislation in all states prohibiting the employment of child labor.

It was decided that in the future the executive council shall not interfere with disputes between labor organizations unless the unions involved have exhausted all means to bring about an adjustment of the differences.

An assessment of 1 cent a member a week, for a period of four weeks was levied on the entire membership of the Federation for the benefit of the International Typographical union in its efforts to establish an eight-hour workday in the job and commercial printing establishments in the United States and Canada.

The Typographical union has levied a substantial assessment for that purpose, and all organizations are urged to render assistance to the printers in their effort to establish the eight-hour day by Jan. 1, 1906.

The protest was filed by representatives of the five great labor organizations connected with the railroads, the engineers, firemen, conductors, switchmen and the trainmen. The members of the delegation which called on the president, represented the several organizations. They pointed out to him that railroad rate legislation logically meant the lowering of rates. This, they contended, will be followed by a lessening of the earning power of the railroads and consequently by reduction eventually of the wages of railroad employees.
