Why We Are Stronger.

The old Greeks and Romans were great admirers of health and strength; their pictures and statuary made the muscles of the men stand out like cords.

As a matter of fact we have athletes and strong men—men fed on fine strength making food such as Quaker Oats—that would win in any contest with the old Roman or Greek champions.

It's a matter of food. The finest food for making strength of bone, muscle and nerve is fine oatmeal. Quaker Oats is the best because it is pure, no husks or stems or black specks. Farmers' wives are finding that by feeding the farm hands plentifully on Quaker Oats they get the best results in work and economy. If you live in a hot climate buy Quaker Oats in hermetically sealed tins. It keeps sweet and fresh.

Last Saturday a spark from the steam roller at work on North Beach street, in St. Augustine, ignited a strip of cotton cloth stretched along the roofing at the front of the Vet Cave cigar factory. The dead fans of some palmetto trees in front of the building were also set on fire and it took some time and hard work to keep the fire from spreading. Very little damage was done.

Refused to Promise to Obey and Was Deserted at Altar

PITTSBURG, Pa., Sept. 23.—Because in January, 1841, she declined to promise to "obey," Mary E. Torrence, nee Powers, was deserted at the altar after the marriage ceremony had been performed making her the wife of James Torrence. After almost sixty-eight years, Mrs. James Speer of Elizabeth township proved to the satisfaction of the orphans' court at Pittsburg Tuesday that she is the child that was born of this strange

wedding, and the court awarded her half of the estate of her father, James Torrence, who died worth \$3,000,000, many years ago.

It was not until Mrs. Speer produced lockets which had been exchanged between her mother and father almost seventy years ago that the court was convinced and ordered that half the estate be given to Mrs. Speer, who is now gray-haired and tottering.

The Witches' Tree.

Country people speak of the elder tree as "the witches' tree" and planted it near farm buildings and dairies to keep off witches. They also say that the roots should never come near a well, still less grow into it, or the water will be spoiled. Evelyn's opinion was also unfavorable. He says: "I do by no means commend the scent of it, which is very noxious to the air."

"We learn from Biesius that a certain house in Spain, seated among many elder trees, diseased and killed nearly all its inhabitants, which, when at last they were grubbed up, became a very healthy and wholesome place."

Cattle scarcely touch the elder, and the mole is driven away by the scent. Carters often place branches on their horses' heads to keep off flies. Nothing will grow well in the company of the elder, and when it has been removed and all its roots carefully grubbed up it is some few years before the ground becomes perfectly sweet and good for anything.—Selborne's Magazine.
