

How Perfumes Are Made.

Glass sheets held by frames a few inches apart are smeared rather thickly with lard, and between these sheets the freshly picked blossoms are scattered, touching the frames but not being pressed by them. In one day the oil of the flowers exudes, and the lard absorbs the precious drops. If the flowers are plentiful they may be changed every six hours, and in the case of jonquills thirty times; Jasmine is usually changed eighty times before the layers of lard are entirely saturated. When the lard has dissolved as much oil as possible from the flowers, it is melted and dissolved in purified alcohol made from grain. When this mixture is filtered, the concentrated extract may be redissolved in spirits, diluted, or mixed with other oils according to the strength or quality desired.

Attar of roses and neroli, the base of eau de cologne, are made by a different method. The perfume may be extracted by an ordinary process of distillation if a very even heat is obtained, but the usual method is the bain-marie. A large kettle of lard is immersed in a tub of water at the boiling point until the grease reaches a uniform temperature and is entirely melted. Into this warm lard the petals of orange blossoms or of roses are thrown. The petals remain a day or less in this bath, and then the inodorous wilted flowers are removed and fresh ones submerged until the mixture attains the desired strength. The women beat the mixture into a cream. After the pomade is made, the oil may be shipped in this state, or distilled and sold in its concentrated form as attar of roses or neroli, or diluted to the strength of "perfume" or eau de cologne.

Twenty thousand pounds of rose petals are required to make one pound of attar of roses, valued at about \$200. A thousand pounds approximately of the petals of the bitter orange are necessary to make a pound of neroli, valued at \$20 on an average.—Jane Rosmond White, in The World To-Day.

Accordingly, it is not claimed that Syrup of Figs and Elixir of Senna is the only remedy of known value, but one of many reasons why it is the best of personal and family laxatives is the fact that it cleanses, sweetens and relieves the internal organs on which it acts without any debilitating after effects and without having to increase the quantity from time to time.

It acts pleasantly and naturally and truly as a laxative, and its component parts are known to and approved by physicians, as it is free from all objectionable substances. Delay Meant Death From Kidney Troubles.

Mrs. Herman Smith, 901 Broad Street, Athens, Ga., says: "Kidney disease started with slight irregularity and weakness and developed into dangerous dropsy. I became weak and languid and could do no housework. My back ached terribly. I had bearing down pains and my limbs bloated to twice their normal size. Doctors did not help and I was fast drifting into the hopeless stages. I used Doan's Kidney Pills at the critical moment and they really saved my life."

ECZEMA SEEMED INCURABLE.

Body was Raw—Discharged from Hospitals as Hopeless—Cuticura Remedies Cured Him.

"From the age of three months until fifteen years old, my son Owen's life was made intolerable by eczema in its worst form. In spite of treatments the disease gradually spread until nearly every part of his body was quite raw. He used to tear himself dreadfully in his sleep and the agony he went through is quite beyond words. The regimental doctor pronounced the case hopeless. We had him in hospitals four times and he was pronounced one of the worst cases ever admitted. From each he was discharged as incurable. We kept trying remedy after remedy, but had gotten almost past hoping for a cure. Six months ago we purchased a set of Cuticura Remedies. The result was truly marvelous and to-day he is perfectly cured. Mrs. Lily Hedge, Cumblewell Green, England, Jan. 12, 1907."
