

Crescent City News

Personal and Social.

Rev. R. L. Cate is recovering from an attack of fever.

The Misses Clarissa and Bessie A. Williams visited Palatka last Wednesday.

Watermelons were brought into town on Saturday last for the first time this season.

C. A. Cheatham of Jacksonville was here during the past week on a visit to relatives.

Rev. G. H. Ward will officiate at the Episcopal church next Sunday morning at 10:30.

Miss Mollie Icenhour of Jacksonville, arrived last week for a visit with her aunt, Mrs. M. H. Read.

Mrs. E. L. Waterman of DeLand arrived on Saturday for a week's stay, and is the guest of Mrs. A. B. Torrey.

It is understood that Crescent City is to have a Fourth of July celebration. The Fourth is but a short way off.

The Young People's social club gave a very pleasant dancing party at V. I. A. Hall on Thursday evening of last week.

Mr. George F. Carpenter and his wife, Mrs. Hale, left on Friday last for their summer home in Attleboro, Mass.

Rev. E. P. Butler and daughter, Miss Edith, expect to leave for a two months' vacation in Massachusetts the last week of this month.

Mrs. K. Borson has made \$100 net profit on the sale of ice-cream, which amount she will turn over to the Presbyterian chapel fund.

Up to last Saturday Campbell & Hunter had shipped more than 2000 crates of peaches, and have about 1200 more crates to ship. The prices are low.

Miss Linda Payson, who left here some four weeks ago for her home in Massachusetts, it is reported is now quite seriously ill with typhoid fever.

Mrs. Dr. A. I. Spencer now sells ice cream every Saturday under the big oak tree back of the bank. There was a large crowd round the ice cream tables last Saturday.

Miss Katherine Crawford arrived from DeLand last week on a visit to her mother, Mrs. W. B. Saunders. She expects to leave to-day for her usual summer vacation in the north.

Mr. Duffey a Jacksonville contractor is doing the brick work on the new Catholic church, which will soon be ready for the carpenters. Mr. Eaton will have charge of the latter work.

Clay Grable a former citizen of this place expected to arrive on Sunday. Mr. Grable has been living in Manatee county for several years, and may decide to come back. All his old friends are hoping so, at least.

Rev. D. Spencer the well-known Baptist minister of this place and Mrs. Betty Tillman were married at the Baptist church, Palatka, last Sunday at the conclusion of the morning service, by Rev. W. C. Foster.

Mr. and Mrs. John A. Crosby of San Mateo expect to leave early in July for Islesboro, Maine, going all the way in their big touring car. Mr. and Mrs. C. S. Gowen of this place have been invited to join the Crosbys in this trip and will probably do so.

Crescent City has recently had set out some 150 palmettos and a lot of oak trees on their already pretty streets. An example that will be followed by other towns in Putnam county, in fact Putnam county could not spend money to better advantage than to plant trees the entire length of their new system of hard roads. Fifty dollars per mile would about do the trick.—San Mateo item.

The Children's Day exercises at the Presbyterian church last Sunday night brought together a large congregation. The service was one of song, recitations and responsive readings and was in charge of Supt. W. C. Norton. Rev. E. P. Butler, pastor of the church, made a short, but appropriate talk to the children, and one that held their attention. The Presbyterian Sunday school seems to be growing.

Mr. V. J. Herlong, who some weeks ago purchased the Hawkins place on Park street, and has since moved into the house with his family, has been lying at the point of death for nearly two weeks. On Monday his condition was very critical and it was not thought he could live the day out. Members of the family have all been summoned and are with Mr. Herlong in his sickness, to watch and care for him.

Albert E. Lounds returned last Friday from Philadelphia where he has been for the past ten months taking his final course in the Philadelphia College of Pharmacy, and from which he was graduated with high honors. Mr. Lounds is now a full fledged pharmacist, with a certificate from one of the oldest and best colleges in the country, or the world, for that matter. He will go to the Lounds Drug Co. here.

F. S. Cone has purchased all of block 27, better known as the Carl place, but which was sold more than a year ago to Mr. Salls of Burlington, Vt. The residence on this property was destroyed by fire last winter, and Mr. Salls has moved back to Vermont. It is understood to be Mr. Cone's purpose to divide the block into small lots and sell to those who want building lots in town.

The property is located in the center and on about the highest point of ground in town—and in what is regarded as the best residence section. The deal was made by Mr. M. H. Read.

Dr. Miller, the dentist, will be at Crescent City, June 18th for balance of the month.

Dr. Miller, the dentist, will be at Crescent City, June 18th for balance of the month.

Dr. Miller, the dentist, will be at Crescent City, June 18th for balance of the month.

SPRAYING FOR WHITE FLY.

Interesting Government Experiments Carried on at Orlando.

(From Fla. Fruit and Produce News)

While there is now in press a circular written by Dr. A. W. Morrill and myself forming a preliminary report on sprays used in Florida against white flies, it seems best at this time, in view of the frequent requests for information received at this office and the approach of the season when spraying can again be done to advantage, that the results of these preliminary insecticide tests be stated briefly in your paper.

The general problem of the control by spray mixtures of the citrus and spool-wing flies is now being made the subject of special experimental investigation by the agents at Orlando and a full report on spraying will be issued later. During the past winter several groves, including over 2,500 trees of all sizes, have been sprayed with good results with both power and hand sprayers. As this work is to be continued on an even larger scale during the coming season, and as it is desirable to settle once for all just what can be accomplished under varying conditions by spraying when careful attention is given to details, I shall be glad to get in touch with citrus growers who expect to spray.

Enough work has already been done to emphasize the fact that the poor results many obtain from spraying are not due so much to inferior insecticides as to careless application. To entirely remove this last factor, the relative value of the sprays mentioned below has been determined by actual dipping the infested branches into the insecticide, thus thoroughly drenching the entire leaf surface. In this way it was found that Carboleneum, Creocidol, Laundry Soap, Derror's Tree Fluid, Lime Sulphur Wash, Sealcide and Thrup Juice are practically worthless as white fly destroyers. It was further found that the addition of Carboleneum and Creocidol to sprays does not appear to enhance their value. It is doubtful if Derror's Tree Fluid killed a single insect, although it was used at various strengths. Hick's Death Dope was found to be more expensive than whale-oil soap or Schnarr's, and of no practical value as a winter spray, although when used 25 per cent stronger than recommended it killed nearly all the young larvae in summer. It frequently burns the skin of the operator and does not kill the insects through the leaf, as has been claimed.

Gold Dust and Keroseene Emulsion were found to have some value, but until further experiments are concluded they are not recommended for general use. Montgomery's Insecticide was used experimentally at Orlando. But, even when used at the weakest strength recommended, is not cheaper than Schnarr's, and is no more effective. As much damage is apt to follow the use of the resin washes and emulsions, and as these solutions did not give the best results, they are not recommended until further experiments are made.

All things considered, whale-oil soap, Schnarr's and Target Brand have been found the most satisfactory. Whale oil soap is doubtless the most injurious to the tree of all sprays, but does appear to be more effective in killing the fly than Schnarr's or Target Brand. Used at 11 lbs. to 50 gallons it is a trifling expensive and less efficient than Schnarr's in killing power during winter months. It has the disadvantage, requiring heating to best mix with water. While it does not remove the sooty mold as quickly as the miscible oil sprays, this is not a drawback, unless it is especially desired to clean up the fruit before picking.

Schnarr's Insecticide has given excellent results with the agents at Orlando, both in limited tests and in field operations on a large scale. It is the cheapest per gallon of final spray of any insecticide now in general use. It loosens the sooty mold quickly, has not caused excessive shedding with its claim to be overlapping has occurred, and is ready for immediate use. It has the disadvantage of not mixing well with hard water although this feature is said to be now overcome. It should not be used stronger than recommended.

Target Brand as at present manufactured has not been as extensively tested as either whale-oil soap or Schnarr's, but limited experiments have shown it to be thoroughly effective at 1 to 45 in killing all pupae (no weaker strength was used). It mixes very readily with soft water and its claim to mix with hard water. It also removes the sooty mold well, and at Winter Park, where an equal number of trees were sprayed with Schnarr's, 1 to 39, and Target Brand, 1 to 37, no difference could be detected in the effectiveness of the two sprays, except the price. Target Brand costs more than Schnarr's and is apparently no better.

I wish to strongly emphasize the fact that the above statements regarding proprietary insecticides refer to them only as they are at present offered for sale. Any change in their formula might render them worthless. It should also be remembered that, unless otherwise stated, the remarks refer to the action of these insecticides on wintering-over flies.

E. A. BACK, Agent and Expert, White Fly Investigations, Orlando, Fla.

In every home where there is a baby there should also be a bottle of McGEHEE'S BABY ELIXIR. It may be needed at any time to correct your stomach, wind colic, diarrhoea or summer complaint. It is a wholesome remedy, contains no opium, morphine or injurious drug of any kind. Price 25c and 50c per bottle. Sold by Ackerman-Stewart Drug Co. and J. H. Haughton.

LAKE COMO.

Claude Monjar was a visitor at Jacksonville, recently.

Mrs. Carter of Jacksonville is the guest of her sister, Mrs. J. C. Sanford.

Mr. and Mrs. Skilton and J. C. Fulton, were visitors at Crescent City, recently.

A silver tea was held recently at the Highland House, Mrs. A. Skilton being hostess. A number were present and many vocal selections were enjoyed, the artists being Mesdames Mitchell and Skilton and Mr. Skilton. Refreshments of cakes and lime juice were served.

Services were held in the M. E. church Sunday morning—Willie Gable led a very interesting League meeting in the evening.

If you have the itch, don't scratch. If you don't cure the trouble and make the skin bleed. Apply BALLARD'S SNOW LINIMENT. Rub it gently on the affected parts. It relieves itching instantly and a few applications removes the cause thus performing a permanent cure. Price 25c, 50c and \$1.00 per bottle.

Sold by Ackerman-Stewart and J. H. Haughton.

Give Your Land the Right Kind of Fertilizer—the Only Kind it Needs

When you feed your live stock you give the kind of food best adapted for the development of milk, meat or muscle, whichever is wanted.

When you fertilize your land you should be just as careful to use the plant food that is best adapted to give you quickly the quality and quantity of crop wanted.

It is just as necessary to have the right kind of fertilizer for the crops as it is important to have the proper feed for your stock.

We make a specialty of special fertilizers for special crops on special soils. No manufacturer can make one, or even two, brands of fertilizer suitable to all conditions of the soil, or conditions of the crops. Tell us the kind of soil and the kind of crops to be grown and we will tell you the kind of fertilizer to use.

E. O. PAINTER FERTILIZER CO., Jacksonville, Florida.

Lovers of Sports. The Anglo-Saxons love sport. No matter in what part of the world they are found the spirit is strong among them. Wherever the restless Anglo-Saxon dominates the love of sport is dominant. The Americans are—at least the most of them—descendants of this virile race, and nowhere is the love of sport so much exhibited as in this country. Our people are patrons of horse racing, of baseball, of golf, of football, of all out door sports as no other people. The English are great sportsmen, but not to the extent that Americans are. For the reason that the opportunities are greater here.—Nashville American.

Bad Advice. Friend—What's worrying you? Manager—The prima donna of my company refuses to sing oftener than twice a week. I am making only hundreds where I ought to be making thousands. Friend—I'd settle that. If I were you I'd marry her. (A year passes). Friend—My gracious, you look seedy! What's happened? Manager—I took your advice and married the prima donna, and now she won't sing at all.

Reciprocity. There is one word which may serve as a rule of practice for one's life. That word is "reciprocity." What you do to others.

Friendship—One soul in two bodies.—Pythagoras.

A regular morning operation of the bowels puts in the shape for the day's work. If you miss it you feel uncomfortable and cannot put vim in your movements. For all bowel irregularities HERBINE is the remedy. It purifies, strengthens and regulates. Price 50c. Sold by Ackerman-Stewart and J. H. Haughton.

AWED THE STUDENTS. Jean Richepin's First Lesson as an Instructor in Literature.

At the age of twenty-two Jean Richepin, the French poet and dramatic author, accepted a place as instructor in literature in a school which prepared students for the military college of St. Cyr. His employers warned him that the future army officers took very little interest in belles-lettres and that their principal occupation in class was raising chaos.

Richepin's first lesson began amid a storm of whistling and catcalls. But the young instructor's voice boomed out above the uproar and imperiously commanded silence. "Gentlemen," he said, "I am not here because I like it. I am here for my living. Is any one of you going to stand in the way? If there is, I should be obliged if he will tell me so face to face on the Place du Pantheon, where I am ready to meet him at any time. And inasmuch as we are all of us about the same age, you understand, of course, that the interview will be with bare fists."

And, so saying, young Richepin brought his clenched hand down upon the desk, and the desk broke in two, and he and his pupils lived happily ever afterward. Thus runs the official legend.—Argonaut.

JELLO ICE CREAM Powder

Woman's Beauty

Some women retain their beauty to an advanced age. But women, who regularly endure pain, age rapidly, for suffering leaves its lasting marks on them.

Nearly all women suffer more or less with some form of female trouble. It should not be neglected. Avoid the pain—treat yourself at home by taking Cardui, as thousands of other women have done. Begin at once and give Cardui a fair trial.

TAKE CARDUI

It Will Help You

Mrs. Katie Burison, Goreville, Ill., tried Cardui and writes: "I suffered with female troubles, and was so sick I could not stand on my feet. Finally I began to take Cardui, and soon began to mend. Now I am able to do all my household work and am in much better health than I was before." Try it.
