

Crescent City News

Personal and Social.

Sheriff Kennerly was a visitor in town last Saturday.

Mr. and Mrs. Coe D. Smith are due to arrive this week.

Mrs. Capers has been spending the week in Jacksonville.

Col. Geo. T. Graham is at Lexington, S. C., on law business.

Mrs. C. T. King has joined the choir of the Presbyterian church.

Mr. and Mrs. Ira C. Pratt of Cropsey, Ill., are expected in a few days.

Mrs. J. L. Burton who has been seriously ill for some weeks, is reported as improving.

A. P. DeWolf and W. S. Newbold were visitors to Palatka the early part of the week.

J. E. Lorick returned on Saturday from a three weeks' visit to his old home in South Carolina.

L. A. Hurlbut was quite ill several days last week, but is now out again and steadily improving.

Rev. E. P. Butler, Miss Butler and her guest, Miss Edith Hubbard, visited Palatka on Monday.

Mr. and Mrs. Z. C. Herlong of Jacksonville came up on Sunday to spend a couple days with Mr. Herlong's mother.

L. A. Hurlbut has sold his crop of round oranges and tangerines to Mr. Nye of Orlando. Mr. Hurlbut will ship his grapefruit.

Arthur F. Lane was over from Huntington on Tuesday. He has only recently returned from a summer's visit in Massachusetts.

Dr. H. E. Johnson and Miss Johnson of Fairbury, Ill., returned last week and again at their winter home here for the season.

Geo. S. Crotty is building up a fine trade in his "seashipt" oysters. When you buy these oysters you buy nothing but the solid meat.

Mesdames L. A. Hurlbut and C. H. Preston will go to Ocala next Tuesday as delegates to the State Federation of Women's Clubs from the V. I. A. of this city.

The Crescent has been carrying out quite a large amount of fruit from the McCormick & Hubbs, the Williams, and the Glynn groves during the past week. These shipments are mostly of grapefruit and the earlier varieties of round oranges.

W. J. Braddock of DeLand was in the city a few hours Saturday evening. Mr. Braddock quite recently gave up the railroad agency at Huntington and sold his pretty home there in order to live in DeLand, the home of Mrs. Braddock's parents.

Rev. Mr. Meginnis of New York has been engaged as rector of the Church of the Holy Comforter (Episcopal) and it is expected will arrive in time to hold his first service on Sunday the 20th inst. Rev. Mr. Meginnis will also supply the church at Huntington.

Hon. James R. Howe of Brooklyn who has sold his real estate interests to M. H. Read, will not necessarily lose interest in the place for which he has done so much in the past. Mr. Read tells that he will continue to make short annual visits, and the News knows of no one whose coming could give more general pleasure to the people.

A. E. Lounds who has been supplying a temporary vacancy in the City County Drug Store at Green Cove Springs, finished his work there last week and came home for a few days before going to Sanford where he has accepted a position as prescription clerk in a leading drug house.

R. C. Middleton of Longs Station has purchased a new touring car automobile of the "E. M. F. 30" pattern and arrive here with it Saturday. The machine was purchased at Gainesville and Mr. and Mrs. Middleton came through from that place with it—the first trip of an automobile over the new Dunn's Creek bridge from Palatka to this city. The auto is a very pretty one.

Mr. and Mrs. C. T. Darling of Davenport, Iowa, who have leased the Benham residence on South Prospect street for the winter months, are expected here tomorrow. It will be remembered that Mr. Darling only recently purchased 200 feet on the opposite side of the street and running to the lake. It is probable that during his stay here this winter he will make arrangements to build a winter home on this property.

The ladies of the V. I. A. are arranging to give a "Peasant" dance Thanksgiving evening to which all will be invited to come in peasant costume. Arrangements will be made to care for all who may only wish to look on. There will be a grand march at 8 o'clock, then interesting peasant dances. The general admission will be 25 cents, with 25 cents extra for those who dance.

Shot Out. Rev. Mr. Waters—Look at Bill Burley, for instance. It was the demon sum that made him the one-eyed, low-browed sot that he is today. Cactus Charley—Not altogether, parson. It Charley made him a low-browed sot, but it was me that made him one-eyed.—Judge.

A Love Passage. "Love! Ah, love!" cooed the sentimental maiden. "I feel as if I could live on nothing but love."
"Do let me be your caterer," returned the ardent youth at her side.—Boston Transcript.

Whoever sincerely endeavors to do all the good he can will probably do much more than he imagines or will ever know.—Miss Bowdler.

BIG REAL ESTATE DEAL

M. H. Read Buys Entire Realty Holdings of Hon. James R. Howe, in Crescent City.

A deal was closed last week whereby Mr. Mathew H. Read of this city becomes the owner of all the real estate holding of Hon. James R. Howe in Crescent City.

This includes the valuable tract known as the Crescent Hill sub-division, one of the most beautiful residence locations in all Florida, all on high ground and with a frontage of more than a mile on beautiful lake Stella. Besides this there are some 20 grove lots of 5-acres each, suitable for groves and farms.

It is Mr. Read's purpose to put all this property on the market at prices bound to attract the attention of actual settlers.

Since coming into possession of the property Mr. Read has decided to deed to the town 10 lots, each 81 feet wide, and running through the entire south end of the Crescent Hill tract from east to west and along the north line of the Williams grove. This will make a wide boulevard to connect with Rossville and will make another outlet to the junction. Mr. Howe had already arranged for the deeding of four lots to the town—two blocks north from Summit street—but Mr. Read has added six more lots, thus opening the street through the entire tract.

The county surveyor has just completed a survey of the new road through the Williams grove to connect with the Seville road through Crescent Hill, and when this road is completed it will provide a decided advantage to people living west of Prospect street.

That there is to be an active demand for Crescent Hill lots Mr. Read can attest. Several new homes have recently been erected and a number of other lots sold. This is undoubtedly to be the growing part of the town, and all will concede that it is the most sightly and beautiful.

Now that the property is in Mr. Read's hands and he is on the ground personally to look after its sale it is a safe prediction that it will not be his fault if prospective settlers are not located.

Both Bordeaux mixture, in the usual strength of 5 pounds of rock lime and 5 pounds of copper sulphate to 50 gallons of water, and ammonia solution of copper carbonate, in the proportion of 3 ounces of copper carbonate and 5 pints of ammonia (26 degrees) to 50 gallons of water, have proved effective in checking this disease. Spraying should be done with the aim of hitting the fruit, keeping the spray as much as is practicable from the leaves, branches, and trunk, where beneficial fungi may be present.

Spraying Experiments. Although the complete results of experiments now being carried on in six different groves by the Experiment Station, or under its direction, will not be at hand until the end of the picking season, the following beneficial effects have already been noticed from the use of either Bordeaux mixture or ammonia solution of copper carbonate.

The fruit on one lot of badly diseased grapefruit trees was sprayed three times with Bordeaux mixture on September 12, 14 and 29. A similar lot of diseased trees, next to these, was left unsprayed until September 29, when it was also sprayed. On October 11, at which time it was too soon for much of a result from the last spraying to appear, it was sprayed. Later counts are expected to show many fruit had dropped from those trees which had been sprayed only once, as from the same number of trees which had been sprayed three times.

In a second experiment in the same grove, ten orange trees were sprayed with Bordeaux mixture on September 12 and 29, and ten similar trees next to them were left unsprayed. On October 11 there were counted nearly twice as many dropped fruit under the ten unsprayed trees as under the ten sprayed trees. Later counts are expected to show still greater effects from the spraying.

Last year every alternate tree of a block of forty grapefruit trees was sprayed twice with ammonia solution of copper carbonate. On December 4, 1910, and December 14, 1910, there were one-third more dropped fruit (counted), picked up from under the unsprayed trees than from the sprayed trees. Considering the lateness of the time, this was a rather good showing in favor of the spraying.

These experiments show that both the sprays are useful in checking this disease. The sprays are most effective when used early, while the fruit is still green; but they will do much good even when used at this late season. Among other experiments which are being conducted, is a test with a combined fungicide and insecticide, to find out whether it can be substituted for the Bordeaux mixture or the ammonia solution of copper carbonate. It is desirable that such a substitute should be found, because of the damage done by these two sprays in allowing an increase of scale insects.

Observations in Citrus Groves. As the season advances there is an increased amount of Stem-end Rot showing in some localities, while in others there appears to be less than last year. Previous to the storm of October 18, in some groves as many as 5 to 10 per cent of the grapefruit and oranges have already dropped from this disease.

Stem-end Rot is present and destructive on all characters of soil, and in groves fertilized in all sorts of ways, providing the fungus causing it is present. Later counts are expected to show low damp groves and higher and drier land. Although laboratory experiments show that the fungus may penetrate the skin of healthy fruit, observations in the grove indicate that it is the stems which are weakened, and as the fruit by any cause, such as scale insects, are most likely to be attacked. Even in the grove, however, perfectly sound fruit may also be attacked.

Symptoms of Stem-end Rot. The presence of this disease is indicated by the dropping of the fruit, followed by a softening at the stem end, which softening takes place within a few days to three weeks after the fruit has fallen. Only in rare cases does the softening at the stem end occur before the fruit drops. Dropping of the fruit may, however, take place from other causes, such as wither, thorn punctures, etc. Decay of fruit may also occur without the presence of stem-end rot. But dropping of fruit, together with a large percentage of softening and decay at the stem end, are signs of the presence of Stem-end Rot. Sometimes a premature coloring at the stem end is an indication that this part of the fruit will in time soften and decay. On one grove the decay progresses rather slowly, advancing inward most rapidly along the central core and the inner white part of the peel, and finally breaking down the juice sacs. The diseased portion of the fruit becomes brownish or coffee-colored, in ripe fruit the discoloration is gray behind the softening.—Press Bulletin, Florida Experiment Station.

Regulate the bowels when they fail to move properly. HERBINE is an admirable bowel regulator. It helps the liver and stomach and restores a fine feeling of strength and buoyancy. Price 25c, 50c and \$1.00 per bottle. Sold by Ackerman-Stewart Drug Co., and J. H. Haughton.

The Marriage Rate. In this country the marriage rate is found to fluctuate with the rise or decrease of exports and of employment.

Rub a sore throat with HALLARD'S SNOW LIXIMENT. One or two applications will cure it completely. Price 25c, 50c and \$1.00 per bottle. Sold by Ackerman-Stewart Drug Co., and J. H. Haughton.

Get Well

If you are sick, you wish to get well, don't you? Of course you do. You wish to be rid of the pain and misery, and be happy again.

If your illness is caused by female trouble, you can quickly get the right remedy to get well. It's **Cardui**. This great medicine, for women, has relieved or cured thousands of ladies, suffering like you from some female trouble.

TAKE CARDUI

For Women's Ills

Mrs. Fannie Ellis, of Foster, Ark., suffered agony for seven years. Read her letter about Cardui. She writes: "I was sick for seven years with female trouble. Every month I would very nearly die with my head and back. I took 36 bottles of Cardui and was cured. Cardui is a God-send to suffering women." Try it.

STEM-END ROT OF CITRUS FRUITS-IV

By H. S. Fawcett.

Both Bordeaux mixture, in the usual strength of 5 pounds of rock lime and 5 pounds of copper sulphate to 50 gallons of water, and ammonia solution of copper carbonate, in the proportion of 3 ounces of copper carbonate and 5 pints of ammonia (26 degrees) to 50 gallons of water, have proved effective in checking this disease. Spraying should be done with the aim of hitting the fruit, keeping the spray as much as is practicable from the leaves, branches, and trunk, where beneficial fungi may be present.

Spraying Experiments. Although the complete results of experiments now being carried on in six different groves by the Experiment Station, or under its direction, will not be at hand until the end of the picking season, the following beneficial effects have already been noticed from the use of either Bordeaux mixture or ammonia solution of copper carbonate.

The fruit on one lot of badly diseased grapefruit trees was sprayed three times with Bordeaux mixture on September 12, 14 and 29. A similar lot of diseased trees, next to these, was left unsprayed until September 29, when it was also sprayed. On October 11, at which time it was too soon for much of a result from the last spraying to appear, it was sprayed. Later counts are expected to show many fruit had dropped from those trees which had been sprayed only once, as from the same number of trees which had been sprayed three times.

In a second experiment in the same grove, ten orange trees were sprayed with Bordeaux mixture on September 12 and 29, and ten similar trees next to them were left unsprayed. The "Herd Laddie"

Some discussion is taking place over the birthplace of Wylie, the famous "Herd Laddie," probably the greatest checker player that the world has known.

According to one authority, the late Mr. J. Hedley, who wrote a biographical sketch of Mr. Wylie's career in 1898, he was born in Piershill Barracks, Edinburgh, or "Jock's Lodge," as it was known locally, in the year 1822. His father was a sergeant in the celebrated Scottish regiment of horse, "the Scots Greys," and this regiment was stationed in the above barracks shortly after their memorable engagement at Waterloo, and remained there for a number of years.

—London Graphic.

Mothers-in-law in Bethlehem. The married women of Bethlehem are renowned for their remarkable headresses. They are large and entirely conceal the hair. It was told that the foundation is a fez, stiffened and covered with cotton. Chains of silver on which are strung rows of silver coins ornament the front, and a great white felt made of cotton gives the finishing touch. Strongly built and active, the matrons of Bethlehem look very imposing. I should scarcely think they live in great subjection to their husbands. That they make alarming mothers-in-law I can well believe. There is a proverb in Palestine, "Were the mother-in-law to love her daughter-in-law, dogs would go into paradise."—Century.

A Great Player. Sir Walter Parratt had an extraordinary memory. Some eight or ten men were assembled one evening in one of the lodges attached to St. Michael's college, Tenbury. Sir Walter Parratt and Herr von Holst played in turn upon the piano such music as was asked for. This went on for some time until at last the chessboard was brought out. Sir Walter then proposed to play two men at chess in consultation, still remaining at the piano and playing from memory what was demanded either from Bach, Beethoven, Mozart, Chopin or Mendelssohn. Without even a glance at the chessboard he won the game in an hour.—London Globe.

Put His Foot Down. "What we must do," thundered the politician, walking rapidly down the street beside his bored acquaintance—"what we Englishmen must do is to put our foot down firmly on these foreign imports." And, to show that he could practice as well as preach, at that moment he put his foot down on the skin of an imported banana. And his friend walked on alone.—London Globe.
