Mr. C. M. Craigmiles has been under the weather for several days.
The first two days of the new year were simply delightful. They could hardly have been improved on.
Do you like The Tallahasseean? If so, subscribe for it, and send it to your absent friend during the ensuing year.

They were thirty-one days making the passage from Manila to San Francisco, and experienced some rough weather off the coast of Alaska.

Stop the Blight

It is a sad thing to see fine fruit trees spoiled by the blight. You can always tell them from the rest. They never do well afterwards but stay small and sickly.

It is worse to see a blight strike children. Good health is the natural right of children. But some of them don't get their rights. While the rest grow big and strong one stays small and weak.

Scott's Emulsion can stop that blight. There is no reason why such a child should stay small. Scott's Emulsion is a medicine with lots of strength in it—the kind of strength that makes things grow.

Scott's Emulsion makes children grow, makes them eat, makes them sleep, makes them play. Give the weak child a chance. Scott's Emulsion will make it catch up with the rest.

This picture represents the Trade Mark of Scott's Emulsion and is on the wrapper of every bottle.

On the night of December 31st the people of Tallahassee were aroused from their peaceful slumbers by a terrific clanking of bells and tooting of whistles. WANTED—At once, traveling salesmen; experience not absolutely necessary; \$60 and expenses. CENTRAL TOBACCO WORKS CO., Pickens, Va.

TEETHINA was first used by Dr. Charles J. Moffett, a graduate of Jefferson Medical College, Philadelphia, Pa., in his extensive and successful treatment of children in Georgia in overcoming the troubles incident to teething and hot summers. TEETHINA (Teething Powders) counteracts the effect of hot weather and keeps the digestive organs in a healthy condition, and has saved the lives of thousands of children in the doctor's native State, where physicians prescribe and mothers give it, and it is criminal in mothers of our section to allow their babes and little children to suffer and perhaps die when relief can be so easily obtained by giving TEETHINA. It costs only 25 cents at druggists; or mail 25 cents to C. J. Moffett, M. D., St. Louis, Mo.

The constant demand for barrels in Tallahassee to be used for syrup barrels ought to be a hint for some enterprising individual with cash to spare. A prominent syrup dealer recently remarked that he could have sold over four thousand barrels during the past season. He became so boisterous that Lieutenant Dendard found it necessary to run him in again.

The stenographer must know how to read, write and spell. She must have quick ears and eyes. She must concentrate her attention. She needs a good memory, and some general information does not come amiss. The more intelligent the person, the better will be the work done. On the whole, the stenographer needs brains.—Ladies' Home Journal.

A wreck occurred on the Seaboard Air Line railroad near Aucilla at 10 o'clock Tuesday night. As the east-bound freight train approached that place the engineer noticed an open switch, too late to stop his engine. The fireman jumped from the train, but the engineer stuck to his post and finally succeeded in stopping the engine, but not before considerable damage was done. The track was torn up for quite a distance and no trains passed that point during Wednesday. A wrecking crew was sent from Tallahassee at 12 o'clock Tuesday night, and the track is now in good shape. No casualties.
