W. R. Scorse invited us to his house Monday and while there showed to us the things he had done with water. The first place he has a complete water system from his well, even to a fish pool. In his yard he has as fine blue grass as ever grew in old Kentucky, then he has roses, flowers, vines, berries and trees of almost every kind. He has a garden and has his own grown vegetables and fruit and all this is grown because he has taken the trouble to put a little water on the soil.

Sure of His Ground.
The young man who had been calling so frequently on Mary at last came to see Mary's father. There was a little hesitation as the two men met. Finally, says a writer in the Philadelphia Inquirer, the suitor began: "It is a mere formality, I know, this asking for your daughter's hand; but we thought it would be pleasing to you if it were observed."

Mary's father stiffened. "And may I inquire," he asked, "who suggested that asking my consent to Mary's marriage was a mere formality?" "Yes, sir," replied the young man, simply. "It was Mary's mother."

A severe sand storm prevented the engine crew from seeing the man until they were upon him.

After a Fashion.
