George Hennessey and Edw. Willan the Rio Puerco stockmen who have been on the cattle round-up for the past two weeks, rode into town today and are shaking hands with their many friends here. It is said that no attempt will be made to prevent their attending the ball tonight, as such an attempt would be worse than useless. Well, what's the "Merry month o' May" made for anyway if not to enjoy ourselves.

One of Uncle Sam's ambulances was here again during the week for the purpose of meeting Col. J. W. Pope, Chief Quartermaster of the Department of the Colorado, who is on an inspection of his branch of the service of all the army posts in this department, which includes Fort Apache. The Colonel arrived here Sunday morning and left for the post at about one o'clock same day arriving at Showlow, a distance of fifty miles, the same evening, and reaching Ft. Apache about noon the next day. Relays of teams along the route made it possible to cover the distance from Holbrook to Ft. Apache in about twelve hours of continuous driving or an average of eight miles an hour.

When We Are Angry.
According to Dr. Maurice de Fleury, a distinguished French scientist, every time one becomes angry one's vitality sinks. After even the most artfully suppressed signs of bad temper the vitality becomes smaller and smaller, until finally nothing is left. Anger is a certain kind of cerebral excitement, explains Dr. de Fleury. The hypersthenic subject is always on its verge, while the neurasthenic becomes infuriated only by a sudden bound of reaction excited from without. But at that moment when they are let loose the two are alike, save that the strong man is a blinder brute, while the weak man is somewhat of an actor and seems to aim at effect.

Prof. Lange, of the University of Copenhagen, holds that "all emotions are due to disorders of the circulation of the blood, and anger, in particular, to a very intense dilation of the small arteries of the brain." He describes redness and swelling of the face as a constant sign of anger, forgetting the "white rage" which is so frequent and impressive.

But he has brought into strong relief this capital fact—that anger is a state of general hyperenergetation. The whole organism, the muscles and glands—for anger has its tears, sweats and foaming of the mouth—set in action by a superabundance of nervous influx, begin to work to excess, acting for the mere sake of acting. In disorder, without aim, without utility, solely to relieve overtension.

Must Be Hard Work.
In Russia there is a cheap reaping machine which has a reel, but no automatic rake. A man sits on the platform and rakes off the grain with a pitchfork. The name of this machine is "lobogreika," and since "lobo" means "brow," and "greika" is "a beater," the whole can be translated "brow-sweater."

C. H. BROWNELL, Agent.

Officially Ignored.
On the relief train that had been rushed to the scene of the railway wreck was a newspaper reporter.

The first victim he saw was a man whose eyes were in mourning and whose left arm was in a sling. With his hair full of dirt, one end of his shirt collar flying loose, and his coat ripped up the back, the victim was sitting on the grass and serenely contemplating the landscape. "How many people are hurt?" asked the reporter, hurrying up to him. "I haven't heard of anybody being hurt, young man," said the other. "How did this wreck happen?" "I haven't heard of any wreck." "You haven't? Who are you, anyhow?" "I don't know that it's any of your business, but I'm the claim agent of the road."—Chicago Tribune.

A Disciplinarian.
Miss Hobson was most popular with the two young and unmarried members of Centreville's school board. They did not propose to have any change of teachers in District Number Three. "Do you think Miss Hobson pays quite enough attention to discipline?" suggested one of the elderly, married school committeemen one day. "Discipline! Why, of course she pays a great deal of attention to it," asserted Ed Porter, hastily. "We never had anybody else begin to pay as much," said Henry Lane. "Why, one afternoon I was in there at Number Three, and Miss Hobson spent the whole time—every minute of it—preserving order in that schoolroom."
