

PIMPLES

"I tried all kinds of blood remedies which failed to do me any good, but I have found the right thing at last. My face was full of pimples and black-heads. After taking Cascarets they all left. I am continuing the use of them and recommending them to my friends. I feel fine when I rise in the morning. Hope to have a chance to recommend Cascarets."

A Delicate Touch in Alaska.
While life in far-off Alaska may be uncouth in parts, it has its refinements. In Valdez there lived a man named "Jake" who kept a boarding house for dogs. When the prospectors returned from their sled trips they would place their teams in his charge until ready to start out again. As he fed his guests on garbage gathered by a house-to-house canvass he was known by every one as "Slop Jake."

Once upon a time he fell ill and the newspaper wished to chronicle the fact. No one, however, knew "Jake's" other name and it didn't seem worth while to waste the time of the editorial staff on so insignificant a detail. So the news was printed thus:
"Our well-known fellow citizen, S Jake, is confined to his house with a severe cold. It is hoped he will be out soon."

EVERY WOMAN WILL BE INTERESTED.

Cures female weaknesses and Backache, Kidney, Bladder and Urinary troubles. At all Drugists or by mail, 50 cents. Sample FREE. Address, The Mother Gray Co., Le Roy, N. Y.

Mrs. Roosevelt's Newest Gown.
Mrs. Roosevelt wore a gown at an official levee in Washington the other night which was the most elaborate she ever has donned for a White House affair, not even excepting such occasions as her daughter's debut and her step-daughter's wedding. It was of copper-colored satin of the twilled variety, and so heavy that it looked like velvet. The bodice showed a return to the Bo-Peep style, which has been predicted all winter. The paucity effect was incrustated in gold embroidery, and a deep hem of the same was outlined on the skirt. The bodice was trimmed in insets of gold embroidery back and front, and the yoke was soft, yellow lace studded in gold beads. The sleeves were long and tight and had rows of gold beads outlined against them as if to stimulate tucks. With this Mrs. Roosevelt wore a chaplet of gold leaves in her hair and a chain of dull gold about her throat. The whole creation was the work of an artist, and in the entire seven years of her stay in the White House the President's wife never has appeared in any other costume so well adapted to her fragile appearance.

Titled Ladies in Jail.
Over in England those women, who desire the privilege of voting are willing to suffer for their convictions. The other day Lady Constance Lytton, sister of Lord Lytton, and a number of other ladies of wealth and fashion were sent to jail because they disturbed the public peace and would not give security not to repeat the offense. In jail they are garbed in the uncouth, prison-made garments and their food is the plainest prison fare.

A cold on the lungs doesn't usually amount to much, but it invariably precedes pneumonia and consumption. Hamlin's Wizard Oil applied to the chest at once will break up a cold in a night.

Nutsell Tactics.
The stock argument against votes for women that they could not bear arms in event of war—is not unanswerable. History is explicit concerning women's efficiency as private soldiers, and at least one good regimental officer should be credited to the weaker sex. On the authority of Anatole France, Joan of Arc once declared her principles of leadership:
"I say, in among them, and I go in."

The soldiers of France followed, of course. Could male regular or volunteer better that?

WHAT DO YOU KNOW ABOUT OIL?

Did you ever stop and think what a great commercial agent is represented in the word "OIL"? And yet how little most of us really know about it.

The origin of oil in the earth—its occurrence in various portions of the globe—The production of oil—The distribution and marketing of oil—Refining and refinery products—Oil legislation—Reports on oil companies and oil stocks—Oil is the study of the age, superceding coal in the navy and displacing large coal contracts in every commercial line.

For all this information and more address The Oil Industry, 520 Citizens National Bank Building, Los Angeles, Cal.

Mathematical Genius.
Prof. Max Dessoir of Berlin University, recently introduced to his class in psychology Dr. Ruckle. He told the students that the doctor was a genius at figures, but was not to be looked upon as in the same class with "lightning calculators" who give public exhibitions, because Dr. Ruckle appeared before the students only to demonstrate what well-directed application could accomplish. He began by asking that 100 figures be placed in a row, making one great sum. Then he studied the line for about five minutes, and in that time memorized the combination so perfectly that he wrote the figures, from first to last and from last to first rapidly and without an error. Difficult problems in cube and square root, interest and compound interest were solved in an incredibly short time, always correctly and without the aid of paper or pencil. After an exhibition which caused wonder the students applauded vigorously, and the mathematical genius, as a further proof of his remarkable memory, repeated backward the 100 figures which had been given to him when his discourse began.

A CURE FOR FITS.
The Treatment is to Accomplish What Science Has Been Struggling to Attain for Centuries.

The intense interest that has been manifested throughout the country by the wonderful cures that are being accomplished daily by epileptics, still continues. It is really surprising the vast number of people who have already been cured of fits and nervousness. In order that everybody may have a chance to test the medicine, large trial bottles, valuable literature, History of Epilepsy and testimonials will be sent by mail absolutely free to all who write to the Dr. May Laboratory, 548 Pearl Street, New York City.

The "White" Rhinoceros.
If President Roosevelt expects to bag a really white rhinoceros in Africa he is likely to be disappointed, for there is no such thing, although there is a creature called by this name, says a writer. The animal is of a yellowish gray, not much lighter than some of its relatives that are not honored with the name of "white."

It is supposed that the hunters who first saw the creature viewed it against a very dark background and in bright sunlight. Apart from its color, however, the "white" rhinoceros has some distinctive characteristics. It is taller than others of its kind, and has a larger and squarer snout. It is more decidedly herbivorous. One of its two horns is sometimes dwarfed or wanting, which gave rise, as early as 1848, to the fiction of an African one-horned species of rhinoceros. Besides all this, the skin is closely covered with small tubercles.

The animal, like all African big game, has been rapidly disappearing, and by 1890 it had vanished from eastern Africa, except for a small reserve in Zululand. It is difficult to approach, as its scent is keen and its gait rapid.

Italy's New Labor Law.
Under the law promulgated this year by Italy persons of either sex under 12 years of age cannot engage in building operations, outside work of any kind, in mines or tunnels nor in industrial establishments.

Persons from 12 to 15 cannot be employed in any labor more than 11 hours a day, while females of any age are limited to 12 hours.

In addition the labor of women and children must be interrupted daily by one or several hours of repose.

Appliances are also insisted upon in the way of proper safeguards in eating rooms, dormitories, lavatories, toilet rooms, etc., and night work is forbidden for all females and all males under 15 years.
