

TOMBSTONE PROSPECTOR

JANUARY - - - - 15, 1889

LOCAL NOTES.

Heavy snow storms are reported in the northern part of the Territory.

Oh, the snow, the beautiful snow—Funeral to-morrow from the orphan asylum.

The music box rattled at Bisbee last Saturday night was won by D. C. Jones by a throw of 42.

Representative-elect G. W. Cheney, of Tombstone, left for Prescott this afternoon, via Los Angeles.

Four cars of beef steers and one of calves, were shipped from Benson yesterday by E. Sterns.

H. B. Maxon has received the appointment of engraving clerk in the Nevada Legislature.

The importance of the new gold camp in Yuma county as a news center is assured. Wyatt Earp is there.

Nellie Cashman has purchased a supply of goods at Phoenix and started for the new diggings again to open a restaurant.

Nothing new from the new gold camp, and there will be nothing of importance till capital takes hold of the mines and shows up something.

Another rich gold strike of more fabulous richness than Centennial mines is reported in the Agua Fria, about 60 miles northwest of Phoenix.

The Phoenix Tribune is the name of a new weekly paper to be started in the city of that name. Phoenix can soon be termed the newspaper center of Arizona.

The committee appointed by the citizens of Phoenix to locate a short, feasible route to the new mines have reported the shortest one to be 35 miles.

A Southern California paper is authority for the statement that W. K. Gird is having a cane made of iron-wood, which is to be mounted with silver from the Tombstone mines.

The product of the Silver King mine for 1888 consisted of 69,226.44 ounces of fine silver; 612,708.09 ounces fine silver in concentrations, and 34,867.32 of fine silver in sulphides.

St. Paul's Guild Society will hold a meeting to-morrow (Wednesday), at 2 p. m., at the residence of Mrs. C. N. Thomas, corner of Fremont and Second streets.

The Prospector is informed that the party who did the shooting at Bisbee was not Sid Harris but another man whose first name is Wilmer, and that he came from New Mexico about two months ago.

Attention is called to the ad of Mrs. L. T. Trask, of the Trask House, Benson. Her rooms are always warm and comfortable after the trains arrive from both East and West, while breakfast is always furnished to those desiring it.

The WEEKLY PROSPECTOR has started off on a regular boom. One hundred and twenty-eight subscribers the first week is a pretty good beginning and still they come. Several improvements will be made in next Saturday's issue.

The first killing at the new camp in the Harqua Hala mountains, occurred on the 12th inst. Peter Burns shot and killed Alonzo Johnson. The killing was said to have been justifiable. Johnson was the driver of the stage from Sentinel to Centennial.

Dr. Goodfellow, who left here on Sunday night last, was taken from Fairbank to the end of the track within three miles of Bisbee on the engine in just fifty-five minutes. He found the injuries to the parties, to attend whom he had been sent, in pretty good shape with the exception of one who had his collar bone broken and was suffering intensely.

The ore resources of the Con. Ca. and Virginia mine on the Comstock are marvelous. During the past two years over 300,000 tons has been extracted, producing above \$7,000,000 in bullion. Notwithstanding this tremendous drain, the mine is now still yielding a daily average of 400 tons of ore, the area of which is added to by frequent new discoveries in advancing explorations.

Further Particulars.

The shooting in Bisbee of Bob Clark who was well-known in Tombstone was the topic of conversation yesterday. From G. S. Bradshaw who drove the stage over yesterday the Prospector learns that the wounded man was still alive when the stage left Bisbee at 1 o'clock p. m. Dr. Goodfellow, fortunately happened to arrive in camp just before the shooting occurred, and performed a most remarkable operation on the wounded man. He opened his abdomen, took his intestines out and laid them on his chest, took about two quarts of blood from the cavity, he having bled internally, picked out the bullet, sewed up several places in the intestines which had been cut by it, and replaced them, sewed up the skin, and the wounded man was conversing with the doctor in a short time afterward. The doctor was assisted by Mr. Perkins, who has a drug store in the camp.

Harris, who shot Clark, is in custody. The young lady who was walking with him at the time of the difficulty was shot through the arm by a stray bullet from Harris' pistol. Clark was unarmed, although it is claimed by Harris that he was, and that he fired the first shot. No pistol was found on him or near him, his own pistol being found in its accustomed place at his house. The number of shots fired are variously estimated by those who heard them to have been all the way from two to four.

Returned.

John McDonough, who left Tombstone about ten days ago for the new strike in the Harqua Hala mountains, returned yesterday. He thinks the camp may make a good one in the future but at present no work has been done by which any one could judge of its merits. John A. Cassidy also returned to-day at noon and from him the Prospector learns that there are about 50 men in the camp and none of them are doing anything toward developing their properties. No work of any importance has been done and he believes it will be a long time before sufficient work has been done to tell the story. While there he talked with Lyle, who is examining the properties for the Bonanza crowd, and he scoffed at the idea of the owners refusing \$50,000 for the property and intimating that he wanted nothing to do with it. Mr. Cassidy says that the trip did him good as it proved to his satisfaction that Tombstone is the best camp in the Territory.

Harshaw.

From Mr. J. Suttenger, of Harshaw, the Nogales Record learns that the Harshaw and Hermosa mines, in that district, are improving in richness, and the machinery for a five-stamp mill is now being placed on the Hermosa and will be ready for business about the 15th of February. A Mr. Linden has taken a lease on the Harshaw, and 200 ounces ore has lately been discovered. The Trench mine has closed down; the Blue Nose is running; a new and rich strike has been made on the Eureka. From this report it would seem that Harshaw is "looking up."

Prof. Pickering of Harvard is in San Francisco and will soon go to Los Angeles, in pursuance of an arrangement with the University of Southern California to make a study of Wilson's Peak, upon which it is proposed to construct a greater telescope than the famous one on Mount Hamilton, that under consideration to have a lens 40 inches in diameter, while the Lick lens is but 36. At Wilson's Peak, Prof. Pickering will mount a 16-inch telescope, with which he will make observations to test the conditions. He is also to find a suitable location to place a 24-inch telescope for astronomical photography.

The Phoenix Herald is authority for the statement that the Rev. Thomas W. Haskins, recently of this city, proposes opening a school for girls at Glendale, in the San Fernando valley, some six miles north of Los Angeles. For this purpose he has secured the large hotel building put up at Glendale during the boom and expects to open the school early in February. He quotes terms at \$280 to \$400 per school year.

THE NEW CAMP.

Pronounced a Fraud by the Bonanza Experts.

The following dispatch was received by the Prospector just before going to press, and is published without comment: Tucson, Jan. 15.—Wm. Tickett, of the Quijota mines, and Wm. Lyle just returned from the new Harqua Hala mines and they say a very rich pocket was found on the surface, but the further they sink the poorer the ore gets. They claim that after sinking six feet the ore is only twenty dollars assay. They report much suffering among those who have gone in there.

George Christ, of Arizona.

This gentleman, well known to many of our citizens, arrived from the East yesterday, says the El Paso Tribune, and after making us a very friendly call took the S. P. train this morning for Nogales, A. T. He was born in Kutztown, Pa., in Berks county, where many persons, it is alleged, go to the polls regularly, and suppose they are still voting for Andrew Jackson. The family removed to Iowa at an early day, and in 1884 came southwest from that State.

He was appointed special agent of the Treasury Department under President Garfield, and so continued until Secretary of the Treasury, Daniel Manning, removed him for offensive partisanship. Subsequently that lamented and wonderful Treasurer became intimately acquainted with Mr. Christ and suggested to his friends that if Senator Allison requested his reinstatement, he Secretary Manning, would gladly reinstate him.

While east, visiting friends, he was induced by Chairman M. S. Quay, to assist in the conduct of the National Republican campaign, which he did, and rendered such valuable service as will warrant President Harrison to appoint him Governor of Arizona. The Tribune is for governor George Christ, first, last and all the time.

Substantial New Year Present.

Sam Davis, of the Carson, Nev., Appeal acknowledges the receipt of an acceptable present in the following manner: "With the first of the year the Appeal was treated to a new office towel. The game little rag had served the office all through the trying year of 1888 and was at its post when the old year closed. In all that time it absorbed the dirt of the composing room and the vernal hand of no Chinese laundryman ever handled it."

"It was laid away in its little grave in the rear of the office on the 1st and now it is gone forever. Farewell, old friend, farewell! Thy work was for the good of all and thou never shirked thy duty. The new towel of pure white was hung up behind the engine on Friday and next morning the first typo who saw it floated dead away."

The Silver Market.

The report for the week ending January 13th will be of interest taken from the mining press of San Francisco:

The market held steady at 92 1/2 @ 93c up to Monday, when an advance was established in sympathy with an upward movement abroad. The obtainable supply of silver bullion in this market is light, and as there is a good demand, buyers are compelled to pay from 1/2 to 1c an ounce above New York quotations. The silver-producing mines are not, as yet, turning out as much bullion as was expected, but the outlook is said to be favorable for a gradual increase from now on. Sales of silver were made in this market at 93 1/2c on Monday and 93 1/2c on Tuesday. Yesterday, Wednesday, buyers bid 93 1/2c in sympathy with a decline at the East and also abroad. Silver shaded off to-day in London to 42 1/2d and in New York to 92 1/2c. In our market 92 1/2c is bid, although an advance, it is claimed, would be paid on this price.

An English paper says that the magnitude of the rabbit pest in Australia and New Zealand may be estimated from the fact that up to the present time 70,000,000 rabbit skins have been exported from New Zealand alone. The destruction necessary to secure these skins has not perceptibly lessened the number of rabbits. They swam over Australia and New Zealand, rendering agriculture a great burden.
