CITY AND COUNTY OFFICIAL PAPER

FREE COINAGE 16 TO 1

For President and Silver:
W. J. BRYAN, of Nebraska.

For Vice-President:
ARTHUR SEWALL, Maine.

UNDER WHICH FLAG?

"We are unalterably opposed to the single gold standard. We demand the immediate restoration of the free coinage of gold and silver at the present legal ratio of 16 to 1, without waiting for international agreement for the aid or consent of any other nation. We demand that the standard silver dollar shall be a full legal tender, equally with gold, for all debts, public or private, and we favor such legislation as will prevent the devaluation of any kind of legal tender money by private contract." — Democratic platform, Chicago.

SILVER reached the lowest figure for some time this week, when in New York commercial bars sold at 65c. Later they rallied and sold at 67c. Mexican silver dollars also declined, reaching 51c. from 53c.

There are a whole lot of aspirants for the various county offices this year, but their extreme modesty prevents them from making their aspirations known. We are not supplied with X-ray apparatus, and therefore cannot put their names before the people until they let us know who they are.

The editor of the New York Sun reports having asked Henry Watterson in Paris if he did not intend to be in America on the day of the presidential election. "No, not I," said Watterson. "I'm going to let the fools and the frauds have it out between themselves."

Pioneer's Recommendation.
Mr. J. W. Venable, of Downey a pioneer of Los Angeles, County, Cal., says: "Whenever I am troubled with a pain in the stomach or with diarrhoea, I use Chamberlain's Colic, Cholera and Diarrhoea Remedy. I have used it for years, know it to be a reliable remedy and recommend it to every one." For sale by Druggists.

The National Matte Smelter.

A practical and simple method of smelting sulphide ores, such as nickel, copper, gold and silver ores. In localities where lead ores and fuels are scarce and almost unobtainable, our pyritic water jacket Matte Smelter has been recognized with highly satisfactory results, and has been thoroughly tested on various pyritic, sulphide and arsenide ores, in capacity of a 20 ton per day. It is the most practical, cheapest and simplest method of gold and silver ore smelting and concentrating that is known today.

It requires no extraordinary skill, no lead ore, no fluxing material, and no fuel of any kind for the smelter after it is started. The sulphur in the ore is its natural fuel only, and its cost has no comparison with any other process of concentrating.

We are prepared to furnish any size or capacity plant complete with steam boiler and engine, set up and furnish our men to run it for them on easy payments. Price and specifications furnished with references and testimonials on application.
