9:00 p.m.	Scottsdale	6:15 a.m.

### LOCAL NOTES.

Silver is quoted at 65 1/2.

Dr. L. C. Toney of Bisbee, is a visitor to Tombstone on business.

C. A. Overlock, Bisbee's prosperous butcher came in last evening from the copper camp on business.

Dr. Gaff and wife have returned from Mexico and it is understood the doctor intends to locate in Tucson.

On Monday the teachers' examination takes place. Four applicants for teachers' certificates will be present to undergo the examination.

Cranberries, eastern apples and Buckwheat flour at WOLCOTT'S.

Gus Barron and William Garrett left yesterday for the Huachuca mountains where Mr. Barron has valuable mining property on which they go to do the assessment work for 1896.

A Mexican miner fell down one hundred feet through a perpendicular mine in the Creston mine, at Minas Prietas the other day from the eighth level to the ninth without receiving any serious injury.

Mr. and Mrs. Guy Powell, of Minas Prietas, Mexico, formerly of Tombstone, were called upon a few days ago to mourn the death of their little three months' old baby boy. Norwood Gould Powell, which occurred on Sunday last.

Yuma Sentinel: A high toned social scandal is about to burst loose and is liable to end in a divorce suit, in which case it will be served up with all the verbal trimmings usual in cases when big holes have been knocked in the seventh commandment.

### AT SOUTH PASS.

The Mother Ledge Supposed to be Found.

Parties in from South Pass state that that section is destined to again come to the front in another gold excitement.

It appears that several prospectors in that vicinity have made a rich find which is believed to be the main ledge from which the rich float and rock that caused so much excitement several months since was found, the title to the main discovery of which is yet involved in law. This latest find, however, is located on the same belt only on the west side of the road, being close to the Rider and Sweeney group.

The rock was found to be extremely rich, after little work the ledge, a well defined one, was revealed, considerable free gold being visible. A large number of locations have been made and filed for record.

With further work some rich developments may ensue as this is a highly mineralized section and plenty of float with free gold in it has been found hereabouts which was developed at the recent excitement there.

### A BURIED CITY.

It is Found in the Deep recesses of Mexico's Mountains.

A New York dispatch of recent date gives the following description of a city recently discovered in Mexico:

"Puried and forgotten for ages amid the rank vegetation of a tropical forest a prehistoric American city has been discovered by a New York explorer—Wm. Nevins—in the mountains of Mexico.

Quechomiltlan, by which name the city is known, is in the canton of Guerrero, and Nevins says the ruins cover an area of a thousand acres. The temples and pyramids he has found and the specimens dug up prove the city was at some time one of the great centers of wealth and power of the American hemisphere.

"I have been four weeks riding among the ruins of the great prehistoric city, and I find it covers a much wider area than what I had at first supposed—something like one thousand acres. I have dug into some subterranean chambers of the largest buildings and found them filled with broken pieces of plaster painted bright red and white, under the floors beads, axes, idols and broken pottery. In one excavation which I made, at a place called Guayabo, I found at the depth of nine feet from the surface, under an altar, an olla of terra cotta filled with dirt and mixed among it were seventy-two objects of mother of pearl, all perforated, and five of them were heads of kings with crowns nicely carved.

"I found at other places bones of strange animals, and have carefully packed some. I have already taken over two hundred pictures, fifty of which I have developed, and lost only two. I found the ruins of twenty temples and two great pyramids."

### THE INDIANS.

What it Costs Uncle Sam to Look After His Wards.

Estimates for the entire Indian service for the fiscal year ending June 30, 1898, will be submitted to congress at the opening of the session calls for an appropriation of \$7,290,000 in round numbers. This is \$190,000 more than the appropriation of the current fiscal year. The increase is due to the policy of the government adopted at the last session of congress abolishing gradually the contract Indian schools and to place all the Indian schools absolutely under government control.

### NOTICE.

Office of the Board of Supervisors of Cochise County.

Notice is hereby given that the Board of Supervisors will sell at private sale the following described real estate, situate in said county, the same having been duly sold and by deed conveyed to the Territory of Arizona by the Tax Collector of said county to recover the unpaid tax and charges against each tract or parcel of land, as the same appears of record in the office of the Tax Collector and Recorder of same, to-wit:
