The latest news concerning the abduction of a young girl by Indians is taken from the Journal-Miner of Tuesday last which says: A man, whose name we failed to learn, came in yesterday from following the trail of the girl abducted by the two Indians, mention of which has been made before. He stated to parties here that he had been with the posse for three days and that the trail led up into Red Rock country. He left thirteen men still in pursuit of the girl and her captors, but as it had commenced to snow, it was feared the pursuit would have to be abandoned. He states the girl lived at or near Yuba City and was on her way to Flagstaff to attend school when overtaken.

ACROSS THE PACIFIC.

The salary of the king of Samoa is only \$840 a year. His legal adviser is much better remunerated. His pay is \$5,000 a year.

The Chinese not infrequently condemn a prisoner to keep awake until he dies. A criminal in such circumstances usually lives nine or ten days.

The sacred nuts of Japan are so called because they are used in certain forms of worship, where they are placed on the altar and burned with a hot, bluish flame. The fumes are supposed to be acceptable to the gods.

The Chinese make a curious tassel of rice, which is capable of being used with good effect as a mantel decoration, at one corner. This tassel is about twelve inches long, and has a triple head of brass balls, which harmonize, with the red-and-green bead-like formation.

OUR BOUNTIFUL HARVESTS.

A FARMER at Mission Bottom, Ore., dug up a turnip in his patch the other day that weighed fifteen pounds.

The Dalles (Ore.) Chronicle tells of a wagon load of produce recently brought to that city which consisted of but six heads of cabbage, the half dozen filling the wagon-bed.

The biggest apple of the season was plucked from a tree in Sharpsburg, Md., by T. D. Andrews, of Waterbury, Conn. When picked it weighed twenty-six and one-half ounces, and measured sixteen inches in circumference.

A Big Horn Glacier.

A member of the United States geological survey, who discovered a glacier in the Big Horn mountains of Wyoming, says he believes that in his recent explorations in that country he penetrated where no white man had ever set foot before.

The mountain from whose summit he first saw the glacier was 13,500 feet in height and he gave it the name of Cloud Peak. As he stood on its highest pinnacle the glacier broke upon the sight, stretching its fields below him. He calculated that it was five miles long. It extended into a lake a distance of three quarters of a mile. From one point of the glacier there was a sheer descent of 1,000 feet, so that a man standing there could drop a stone into the lake below.

The Foot of an Emperor. Eugenie's small and elegant foot, once the admiration of the French court, has now, it is said, become swollen out of shape by gout and rheumatism. This foot, in the days of its fame, was so Cinderella-like in its tenuity that its discarded shoes could be worn only by children, for there was no woman in all Eugenie's train whose foot was small enough to fit them.

Reilly vs the City.

The case of James Reilly vs the City was before the district court this morning. This case has attracted wide attention as it carries with it the right of a municipal corporation to commence a suit to quiet title to its property if it considers said property in jeopardy.

Goodrich and Smith undertook to set aside the patent to the Mountain Maid, for \$1,000. Half was paid down and the other half was to be paid upon the winning of the suit. The latter was won in the district court. Judge Berry appealed the case to the supreme court.

In the meanwhile Ben Goodrich moved away from Tombstone and did not feel as though his engagement by the city bound him to carry the case beyond the district court. The city thought otherwise and insisted upon the case through the supreme court before paying him the other \$500.

At this point James Reilly stepped in and on his own responsibility secured an assignment of the Goodrich-Smith claim against the city for \$500 and took the case to the supreme court where the lower court was sustained.

Here the matter dropped, with the exception that Judge Reilly demanded the \$500, but the city refused to pay it. It is for the recovery of this \$500 that the plaintiff sues the city. One of the lessons to be learned from the testimony in this case is that too great pains cannot be taken in recording in the minutes every action taken by a body corporate.

District Court. In the district court this morning the following business was disposed of:

Tuesday, Feb. 16. Haggin vs Bradley: C. S. Clark instituted as attorney for defendant. Case set for 18th.

Blackledge vs Blackledge—referred to clerk to take testimony. Wellman vs Downing—J P McAllister appointed trustee with bond fixed at \$2,000.

In the matter of writ of habeas corpus in case of J Nemo—set for 19th at 1 p m.

Reilly vs City—Tried and taken under advisement.

In the matter of clerk fees in case of Joel Seymour, trustee, vs Neptune Mining Company—J H Slaughter ordered to pay \$13.50 to clerk.

R J Fisher vs Joe Hafner—all papers in Justice Alvord's court ordered transmitted to district court in relation thereto.

Reilly vs Berry, appeal suit—continued for submission of authorities. Henry Edwards et al vs C B Kelton—taken under advisement.

Dixon vs Dixon—referred to clerk to take testimony.

Consumption cured.

An old physician, retired from practice, having had placed in his hands by an East India missionary the formula of a simple vegetable remedy for the speedy and permanent cure of Consumption, Bronchitis, Catarrh, Asthma and all Throat and Lung Affections, and a positive and radical cure for Nervous Debility and all Nervous Complaints, after having tested its wonderful curative powers in thousands of cases, has felt it his duty to make it known to his suffering fellows. Actuated by this motive and a desire to relieve human suffering, I will send free of charge, to all who desire it, this recipe, in German, French or English, with full directions for preparing and using. Sent by mail by addressing with stamp naming this paper, W. A. Noyes, 820 Power's Block, Rochester, N. Y.

The nations of the old Latin Union are banking largely on a silver currency in the ratio of 15 to 1, or at the rate of \$1.33 1/3 per ounce—France to the extent of fully half her currency; Belgium, Holland, Spain, Portugal and Italy almost wholly so; also Austria Hungary, Russia, the Levant and Egypt.

Big things were raised in Maine last season. One farmer has a beet of the golden variety that is a foot in length and about seven inches in diameter. Another has a common turnip beet that weighs four pounds and three-quarters and is twenty-two inches and a quarter in circumference.

SALESMEN WANTED.

Small line of samples from manufacturing corporation offered a live man. One traveller earned an average of \$350 per month for six years past. P. O. Box 109 New York.

The greatest gambling ever seen by Fannie B. Ward, the South American woman traveler, was on a steamer between Copiapo and Talcahuano, when a prospector who had "struck it rich" in the copper mines of Atacama lost \$50,000 in a single night.

FOR CLEVELAND.

CHICAGO—A combination is said to have been engineered during the past ten days to throw the votes of five northwestern states solidly to Cleveland at the Democratic convention.

NEWS BY WIRE.

STAY WITH IT.

WASHINGTON—The silver men have secured 120 names to the petition asking that the silver will be made a special order in the House. There are a large number of members absent from the House, and for this reason there are many members to whom the petition has not yet been presented.

None but Democrats who, it is believed, will vote for free coinage, are being asked to sign. About fifteen of these, to whom the petition has been handed, have declined to sign on one ground or another. Some have said that they thought it was giving too much prominence to the silver issue and making it paramount to the tariff question, and others that they thought it might embarrass the speaker.

The silver men say that notwithstanding statements to the contrary, they are confident of their ability to secure consideration for the bill. They are determined to put every man in the House on record on the question. With this object, if any disposition should be made apparent to prevent a vote on the bill, they will move its passage under a suspension of the rules when an opportunity offers. This, however, will not be attempted except as a last resort.

SHORT OF MONEY. WASHINGTON—The treasury balance to-day is stated at \$28,490,047, the lowest per cent reached for many years. This amount includes \$13,374,211 on deposit with national banks \$14,673 of subsidiary coin, and \$402,442 of minor coin. The reduced balance is due to recent heavy disbursements, including \$77,000,000 on account of pensions and \$1,000,000 on account of a refund of direct tax collected from Kentucky and Maryland.

SPECIE IMPORTS AND EXPORTS. NEW YORK—The exports of gold from New York for the week ending to-day were \$390,300; of silver \$716,333. Imports of gold were \$911,381; of silver \$27,992.

MRS. BLAINE WINS. ST. PAUL, Minn.—The famous divorce case of Blaine vs Blaine is practically settled. The defense will not put in an appearance and the decree will be granted to Mrs. Blaine by default.

HILL. NEW YORK—The Richard county Democrats nominated Hill delegates to the state convention.

BUFFALO—The twenty-five wards of this city to-night elected Hill delegates to the state convention.

VERDICT FOR DEFENDANT. DENVER—In the case of the Standard Mining Company, of Kansas City, against the Della S Mining Company of Aspen, which has been on trial in the United States circuit court for two weeks, a verdict was rendered last evening for the defendant company. The question at issue was whether the J. C. Johnson vein was a continuous one or whether it had been broken by a fault, the Della S. claiming below the fault.

HILL OUR MAN. WASHINGTON—The report which has been circulated that Senator Hill will vote with the free coinage men in the senate, has been confirmed by the senator's most intimate friends. With this understanding it is positive that he will get the western and southern delegates to the convention and his nomination will be assured. It is believed by those nearest to him that he can carry New York state at the election and get the solid south and several western states now counted as republican. It is considered the boldest move ever undertaken by a presidential aspirant.

THE NAVAJOES. ALBUQUERQUE—Clark M. Carr, a prominent ranchman from the vicinity of the late Navajo trouble, and son of Col. Carr who was stationed at Fort Wingate with his famous Sixth Cavalry soldiers, says that the difficulty is not over yet. The Indians have been

roaming all over the country without regard to the lines of the reservation, and killing of cattle with impunity so long without interference by the government or any other authority, that they no longer hesitate to slay or steal anybody's animals wherever they find them. And they do not confine themselves to killing enough to supply their wants, but will pick out the best steers, shoot them and take the choice parts and the hides, and leave the rest of the carcass for the coyotes. The ranchmen say they have stood this until forbearance has ceased to be a virtue, and if the government cannot and will not give them the protection to which they are entitled, they will have to take measures to protect their property themselves.

MORE TROUBLE THREATENED. SAN ANTONIA—There is a prospect of the recurrence of trouble on the San Antonio and Aransas Pass. The men say that extra men are being discharged without cause and that if they can get the support of the employees of the connecting lines they will strike.

NEW ROAD. SANTA FE—Engineers of the narrow gauge road from Salt Lake to Deming are in western Socorro county looking up a line through the coal fields. The engineer says one hundred miles of the road will be built the coming year.

WILL APPEAL. NEW YORK—John W. Mackay has filed a notice of appeal to the general term of the supreme court from the judgment of \$90,166 obtained by Edward Stokes in the suit growing out of the telegraph deal.

BISBEE COLUMN.

Feb 14. HOW THEY LOVE EACH OTHER. How some love their neighbors: Man does it by kicking his dog. The plan adopted in Bisbee last week was somewhat more ingenuous and not quite so niggardly. He first spent some money in buying poison and some chicken feed. He, or she? Stayed up at night with it to set it out; perhaps the light of day would have spoiled the virtue of the loving act. The dish with the dainty mixture was placed in the corner of the beloved neighbor's yard where the hard-working, scratching hens could get at it conveniently. They enjoyed it very much, and by noon next day twenty-three of the beloved neighbor's hens were beyond the need of scratching for a livelihood any more. The meal was sufficient for the rest of their days.

ALMOST A TRAGEDY. A fight between Thomas Molino and Jose Estrella above the O K corral last night may result in the death of one, and of the other being held on a charge of murder. Molino received a blow on the left temple, probably from a revolver, and was picked up for dead and carried into an adjacent house. Dr. Wright was summoned, and on examination found the patient suffering from a fracture of the skull. The doctor performed the operation of trepanning and removed bone that was crushed in on the brain tissue, and leaving the brain exposed to the size of a silver dollar. Officers Bowman and Bruner caught Estrella below town, on his way to the Mexican line, and have him safely in jail.

G. A. E. BALL. The annual ball of the Stebbins Post No 8 occurred Saturday night. In spite of rain and cold, such as Bisbee rarely experiences, as early as 9 o'clock the hall was comfortably filled with the fair daughters and stalwart sons of the heroes, who thirty years ago went forth to battle for freedom and her cause. Soon thereafter the hours were being chased with flying feet to the inspiring strains of the B. B. B. About 150 persons were present, and it was the unanimous verdict that it was good for us to be there. At 12 o'clock carriages began to arrive, and the ball of '92 was only a pleasant memory. Long may our citizen soldiery live to prove her sure defense against foreign foes, as an enlightened citizenship is her best guarantee against domestic wrangles.

NOTES. A new tramway was lately built above the smelter.

All men working on coks dump and driving carts have to stop on account of the stormy weather.
