Col. Hafford sent some claims and several seals from Half Moon bay California to Ben Whiston which is a source of much curiosity. One specimen which was sent, shows the curious formation of the claims in a solid piece of slate and is worth one's while to take a look at it.

Sheriff White sold today at sheriff's sale the property of Pasqual Nigro at Bisbee to satisfy judgment given in the district court in the case of Reilly vs Nigro. The property was bid in by Judge Reilly at \$570.

The wounds are not serious.

FIRE!

It Destroys a Barn and Contents—A Valuable Horse Roasted to Death.

A fire broke out in the upper part of town this afternoon about 2 o'clock, and upon arriving at the scene of the conflagration proved to be a stable owned by Wm. Tomlinson.

All three fire companies were on hand, but the Protection Hose Co. soon had the fire subdued unaided.

Upon investigation it was found that a horse belonging to Mr. Tomlinson had been literally roasted alive, being unable to escape from the burning stable. There is about a ton of hay in the stable, which is ruined, as is also saddle, harness, etc.

Mr. Tomlinson fed the horse about three hours before dinner, and was up town when the fire took place. The origin of the fire is a mystery. The horse was a valuable one, the owner having several times refused \$150 for him.

An ex-Judge Plead Guilty by Sending Forth His Son-in-Law to Do Battle.

(Tucson Star.)

Yesterday about noon, as the editor of the Star was engaged in conversation with some gentlemen on Congress street, John Martin, who is the son-in-law of his father-in-law, came across from the Fashion saloon, and after an apparently friendly good morning to Mr. Hughes, which was returned, Johnnie said: "I don't want you to say anything against me or my family in the Star," to which Mr. Hughes replied: "Why, certainly not, I don't see any reason why I should." He then said: "Are you responsible for what appeared in the Star this morning?" Mr. H. said: "Yes, I am responsible for everything that appears in the Star, but there is nothing there that refers to your family, is there?"

Mr. Hughes was standing with his hands in his coat pockets, carelessly at ease, when the St. Louis thug dealt him two blows in quick succession in the face, which staggered him somewhat, but he soon recovered, and the little thug soon found that he had more than he could manage, and after a few rounds he retreated to the middle of the street under the protection of Policeman Johnson, who appeared to be more of a disturber of the peace than the contestants. The St. Louis thug was fined \$10 for disturbing the peace. The Citizen of last evening says:

Yesterday there appeared a short editorial in the Star to the effect that the man who drinks bad whiskey, smokes cheap cigars, swears and runs with the slums, is not made of the right material for a United States senator; and again this morning, that the Pima county Democracy has no candidate it desires for that high office.

If the above was the cause of the escapade, by what right had that St. Louis carpet bag thug to take it to himself? But then he said the offensive articles appeared in yesterday morning's Star. Now as the Star is at a loss to know what we referred to we conclude it must be one of the following:

Oh, no, there will be no fee for the howling demagogue in Tucson's land grant. No, he can't get his claws in this time.

And again: I, has been some months since the land court has been established. What are the attorneys for the settlers doing? Thus far nothing but filching fees seems to be accomplished. A little less political chattering with the settlers' rights, and some honest legal services for the fees received would look much more honorable.

Now if the above are the articles objected to, probably a communication or two from some victims or attempted victims might be of interest to the son-in-law of his father-in-law. There has been some very questionable work attempted with the poor struggling settlers on more than one of the so-called land grants of southern Arizona, and the Star proposes to protect them from dishonest, shysterish political demagogues as well as from the land grant claimants.

The report of the city treasurer of the indebtedness of the city to Dec. 31 1890, shows the totals as follows: Warrants issued \$ 8,714 52 Interest 3,294 75

Total \$12,009 27 Adding the interest of the \$8,714.52 for two years at 10 per cent shows the indebtedness of the city to Dec. 31, 1893, and which amount they will fund.

The talk in the southern part of Pima is largely upon proposed county division. If the county be divided during the coming session of the legislature, Nogales will probably be the county seat as it has a large Mexican as well as American vote. Crittenden is making a strong bid for it and positions are in circulation favoring each place. The latter is favored by many mining men as offering United States land free for buildings, as being central and the natural geographical location.—Citizen.

During the year 1892, 30,190 head of cattle were inspected at Wilcox for shipment out of the territory. Over 6,000 were shipped last month, which is the largest month's shipment next to May, when 8,289 were loaded out.—Stockman.

The Copper Queen Con. Mining Co. have appointed as their assistant physician at Bisbee, Frank Gaylord Eastman, M. D. Dr. Eastman will arrive on the 24th. He comes from Pawtucket, R. I., where he has been engaged in private practice. He is a graduate of Brown University, of the College of Physicians and Surgeons of New York city, and of the Rhode Island Hospital at Providence.

A determined effort ought to be made to admit Arizona and New Mexico as states at the present session of congress. Those territories have been discriminated against simply because they are Democratic. The Republicans of the senate might as well make a virtue of necessity and allow them to go through, as that body after the 1st of March will be Democratic anyhow. It is simply a case of manifest destiny.—L. A. Herald.

Gold in the San Juans.

It seems to be a settled fact now that there is gold in the San Juan and plenty of it, says the Coconino Sun. There is also plenty of water and all the placers now used is development. There has been a great rush to these placers. They came from this section and the last one was from Colorado, and it is estimated that upward of 1500 people went into the San Juan from that state alone, many of them old miners and many of them tender feet.

A good many are still going in from Flagstaff, but it is probable that there will be no great rush until spring, as the weather is too cold on the San Juan to work during the winter.

About all the ground along the San Juan has been located. The locations extend from a point about 35 miles above Bluff City to the mouth of the San Juan, the entire distance being considered good placer ground.

The rich pay dirt is in the gravel and on hard pan but this is hard to get at, owing to the loose formation. Like all new discoveries exactly opposite reports are made, and some will find riches, and others will fail.

An Enemy Hated.

There is an enemy with whom thousands are familiar all their lives, because they are born with a tendency to biliousness. With this enemy they are constantly battling with ineffectual weapons. Hostetter's Stomach Bitters will banish it. Mere purgatives will not reform a disordered condition of the liver, indicated, not by constipation alone, but also by sick headaches, yellowness of the skin and eye balls, nausea, furred tongue and uneasiness, more particularly upon pressure on the right side upon and below the short ribs. Avoid drastic purgatives, which gripe and weaken the intestines, and substitute this world famous anti-bilious cordial, which likewise removes malarial, stomachic and kidney complaints, rheumatism and nervousness. As a laxative of the bowels, painless but effectual, it improves appetite, sleep and the ability to digest, and possesses the additional advantage of a standard tonic.

Laid to Rest.

The funeral of the late Walter T. Walsh took place yesterday afternoon as arranged. After a prayer at the house by the Rev. Granjon the cortege formed, preceded by Engine Co. No. 1, Rescue Hose Co. No. 1 and Protection Hose Co. No. 3, who turned out in uniform to escort their dead comrade to his last resting place, and proceeded to the Catholic church, where the ceremonies were very impressive. A solemn requiem mass was said by the Rev. Dolje assisted by Rev. Granjon, and Miss Nettie Rafferty, accompanied by Miss Flora Cohn rendered beautiful music appropriate to the sad occasion. At the grave Rev. Granjon repeated a touching prayer, and all that was mortal of Walter Walsh was hidden from the sight of those who loved him.

The floral offerings were numerous and beautiful, some especially exquisite flowers having been received from California.

The funeral was one of the largest ever seen in the city and testified to the high esteem entertained for the deceased and his family.

C. and St. Louis southwestern limited passenger train, consisting of an engine and four coaches which left here this morning for the east, ran into a switch about half a mile north of Wann, and crashed into a train consisting of seven tank cars standing thereon. Among the theaters raided were the Tabor Grand Opera House and the Wonderland. The places were permitted to get under way, and large audiences were present at all the theaters when they were closed.

The police were forced to make the arrests by Rev. H. M. Hart, dean of the Episcopal church, who has inaugurated a crusade against Sunday amusements and insists upon the enforcement of a law which heretofore has been a dead letter. After the theaters were closed immense crowds gathered on the principal streets and talked the matter over, much excitement existing. Suddenly a move was made for Dean Hart's house, and in a short time about 2,000 people surrounded it and after hooting and cat-calling, stones were thrown, smashing the windows. An alarm was rung and the police soon arrived and dispersed the crowd without making any arrests. Nobody was in the bombarded building at the time, the dean and his family having been removed by friends a short time before the mob arrived.

The Princess and the Hat. Lately the little sons of the emperor of Germany were shown the mysteries of a champagne-cloque or crush hat. Shortly afterward, in the anteroom of their father, they found a tall hat and immediately desired to test their skill in shutting it up. Being an ordinary hat and without the elastic mechanism it naturally refused to shut. At last one little prince, growing impatient, said to his brother: "Sit on it, Fritzchen." Fritz obeyed; there followed a loud crack and a roar of laughter from the authors of the mischief. The emperor sent out to ask the cause of the disturbance. Pointing to the crushed hat, the young crown prince replied, with a military salute: "The obstinate thing wouldn't shut at first, but among us we managed to make it change its mind!" The wrecked hat was replaced by a new one, which the owner will doubtless keep as a souvenir of a very amusing episode in the life of his country's future head.—Manchester Times.
