**MARSHAL** Griffith and Secretary Akers have been confirmed and the senate has yet taken no action on the appointment of the Governor.

Arizona produced 125,980 ounces of gold last year, an increase of 30,908 over the preceding year.

Now it is a 50-story building, 700 feet high, which is to be built in New York city, indicating that the top has not yet been reached in sky-scraping construction.

A nineteen story building has recently been erected in New York on a lot but twenty-two feet in width. If there is ever an earthquake in New York somebody is going to get hurt.

Arizona must have two senators at Washington before she can make an entering wedge in Uncle Sam's pocket book. Statehood must come before we can look the future in the face without a sigh.

Cochise County is maintaining her record as the banner mining county in the territory. With the possibilities of making the Sulphur Spring valley a paradise, irrigated with artesian water, we will soon begin to climb to the top round of the agricultural ladder.

The commercial tourists give Arizona and New Mexico credit for being the best fields in their line. They report larger orders and better collections from the merchants of these two Territories than in the Eastern States.

The Buffalo Times says: "Powdered borax will drive them away." If the editor speaks from personal experience and can convince the world that they can be got rid of so cheaply, his discovery will sound the death knell of the Keeley cure.

Albuquerque proposes to give a fair this fall that will eclipse anything has heretofore attempted in that line. The managers are anxious to have exhibits from northern Arizona, of all descriptions, vegetable or mineral, indigenous, transported or manufactured. The railroad company will give reduced rates, and the director promise to give Arizona productions prominent positions.

The closing of our churches for the summer on account of the hot weather, says the Tucson Star, calls to mind an incident which occurred at Phenix two summers ago. One of the churches had posted on its front door: "Closed for the summer on account of heat." Some one sketched the picture of Satan underneath with the words, "Not too hot for me!" There is a practical lesson in the incident for the pulpit to contemplate.

The following persons were appointed by Gov. Franklin as delegates to the Trans-Mississippi congress which convenes at Salt Lake City, July 14: C. T. Hayden, Tempe; N. A. Morford, Phenix; C. W. Wright, Mose Breckman, Tucson; W. O. O'Neill, J. W. Norton, Prescott; E. E. Ellinwood, Flagstaff. There yet remain three more delegates to be appointed.

The 4th of July celebration in Tombstone will be quite an affair.

**Tossed on the Foaming Billows**

You may never have been, but if you cross the Atlantic, no matter how smooth the watery expanse, without sea sickness you are—well, a luck voyager, that is all. Old tars who have spent their lives on the ocean waves, who were almost born, so to speak, with their "sea legs on," suffer now and then from sea sickness in very temperate weather. Sea captains, tourists, commercial travelers and yachtsmen say that there is no finer safeguard against nausea than Ho-teter's Stomach Bitters, and it has been equally reliable as a preventive by invalids who travel by steamboat and railroad, and who sometimes suffer as much in those conveyances as ocean travelers do in steamships. Biliousness, constipation, sick headaches and disorders of the stomach, caused by oppressive climatic influences or unwholesome or graced stomach food or water, always yield to the Bitters speedily. This popular medicine also remedies rheumatic, kidney and nervous disorders, and the infirmities incident to increasing years.

**BISBEE NEWS.**

BISBEE, June 16, 1897.  
COPPERINGS.

Watermelons are now in the market.

Joe Reilly is again at his post after a brief absence in Guaymas.

Mounted Inspector King was noticed about town today as one of our visitors.

The Mexican circus continues to draw good crowds and give good performance.

The merry-go-round is still an attraction for the Bi-bee youths and appears to be doing well.

The 4th in Bisbee will be a grand event and a large crowd is expected from all parts of the county.

Supervisor McPherson and family who have been visiting friends in Bisbee for several days, returned home this morning.

Dave Eaton was another outgoing passenger for California today. Dave expects to spend a short time where the cool sea breezes blow.

E. G. Norton is being heartily endorsed hereabouts for the appointment of Deputy Customs Collector. Petitions in his behalf are numerous and signed, and he has prospects as good for receiving the appointment.

J. N. McDonough of Tombstone, was a passenger on the incoming train this evening. Mr. McDonough has many friends in the copper camp who were glad to welcome him, though his stay may be short.

There are likely to be many entries for the drilling contest. Many of the miners are considering whether they will try, while many have signified their intention of doing so. It will be an interesting feature and an exciting one.

For a lively, energetic, thriving community, Bisbee is the peer of any place in the territory. Improvement is seen on every hand; a better class of buildings are being erected than in former days, and each new house constructed appears to be an improvement on its predecessor. How we do grow.

BISBEE, June 17, 1897.  
COPPERINGS.

Travel on the A. and S. E. is on the increase, while the freight traffic is noticeably so.

Several cattle buyers arrived last evening to look after the purchase of some cattle. The shipping of cattle continues and prices appear to be holding up to the satisfaction of those having stock for sale.

A Mexican was seriously hurt yesterday by falling from a burro, his head coming in contact with a pointed rock. Blood flowed profusely but medical attention was given and he is able to be about, his head in a bandage.

Pete Anderson and Chas. Swenson, two smeltersmen employed by the Copper Queen for some years past, left this morning for a 6 months trip to the old country. They have been among the most steady of the smelter employees and go on a deserved trip.

Hugh Brophy was an outgoing passenger this morning, bound for the fair part of California where he will spend his summer vacation. Hugh will be gone the regulation two weeks but expects to have about three months pleasure during that short time.

Our little article of yesterday relating to the arrest and flogging of J. Rex Hall for assault and battery upon his former partner, has called forth from that voracious individual the usual torrent of spleen together with a denial of a portion of the article printed. We obtained our information from conversations with the court attaché and several other parties and aimed to get the account as nearly correct as possible. It appears now that we were misinformed as to some of the details but that does not in the least detract from the viciousness of his offense.

We have on several occasions shown up the incoherent character of this person, and each time he has attempted to turn the issue by directing the current of his vile abuse against ourselves. He is pretty well known by this time, however, and each fresh outburst but serves to let more light in on his character. We have not lost any sleep as yet over his vituperations.

BISBEE, June 18, 1897.  
COPPERINGS.

Frank Wilson was an outgoing passenger yesterday with Jerome as his destination.

Tom Sorin is in town from the Dr.

goons for a short stop. Tom says things are looking first rate on his prospects and he's liable to develop a bonanza some day.

J. A. Maxson, a prominent mining man of Denver, is a visitor to Bisbee and will remain several days.

D. Edmondson took a trip down the road this morning to meet his wife who has been absent for a couple of weeks. Mrs. Edmondson had a very pleasant time while away.

Mrs. W. H. Brophy and her little child left this morning to spend the summer months in California, as usual. She was accompanied to Benson by Mr. Brophy who will return tomorrow.

Simon Tate returned this evening from a trip to Tucson to see about his prospects of receiving the appointment of deputy U. S. marshal for this section. He is well satisfied with his trip and is still in the race.

Miss Nellie Cashman, of Tombstone fame, is a visitor to Bisbee and will remain a short time. Miss Cashman thinks Bisbee one of the liveliest mining camps in the territory and it is rumored she intends going into business here.

Photographer Dowe and his family left Bisbee this morning after quite an extensive visit. He undoubtedly did quite a little business while in town in spite of the fact that our local photographer, Markey, turns out work of an equal if not better class continually.

Some of the boys got a football out near the plaza last evening and in a very short time there was as promising a crowd of football sports in action as it is one's fortune to see very often. The majority of them, however, would have enjoyed the sport more if the ball had been round. As it happened to be of an unattractive egg shape, however, it succeeded in eluding many of their noble efforts and in a number of instances the gallants were subjected to hearty chaffing over their fruitless efforts. Col. Jack Wickstrom and Johnny Two-way both showed up in good form and will probably be found right in it when the 4th of July game comes off.

The ball grounds are being put in order for the coming game on the 4th.

Thos. Lowry left today for Bisbee, going on the noon special.

Considerable freight still arrives in Tombstone and one often wonders what becomes of it all. Tombstone is an important supply point for a large country about and a great part is consumed by ranchers regularly.

Prof. Church left last evening on his return to California. He came via Pearce, which burg he visited, and also examined the copper properties in the Dragons. He may return shortly.

Considerable fruit is received in Tombstone and a noticeable fact that most of it comes from Yuma and Arizona points. The Arizona fruit besides being earlier is of excellent quality and is in demand. A commendable spirit is shown by giving Arizona fruits the preference by purchasers, and that is as it should be.

R. A. Packard, one of the best men in Cochise county, contemplates disposing of his cattle interests in Arizona and locating in Kansas City. The Gazette would dislike to see old "Pack" leave Arizona, we have known him for many, many years and consider him one of Arizona's best men.—Gazette.

A position asking for the appointment of S. R. DeLong to be postmaster at Wilcox is being circulated here. While regretting the resignation of Postmaster King, who has served us long and faithfully, giving both in service and office convenience far more than than the size of the town required, we know of no one better fitted for the position than Major DeLong.—Range News.

**OBITUARY**

**Miss Minnie Hart Dies In Tucson**

The following obituary appears in the Star of Miss Minnie Hart who was well known here, being formerly a teacher in the public school here. She was a favorite in Tombstone and her many friends here will be pained to hear of her death.

"It will be sad news to many to learn of the death of Miss Minnie Hart, who died yesterday morning in this city. The deceased was a sister of K. L. Hart. The family came to the territory several years ago and located in Tombstone, where she was a teacher in the public school, and a most excellent instructor in every department of the school. The family moved to Tucson four years ago, and the father and brother engaged in business here, which is still carried on by the brother, K. L. Hart. The deceased has been suffering for some time. Two years ago she, with her mother and another brother, moved to Congress, where her brother, was in the employ of the Congress Mining Co. Several days ago she became very low and expressed a desire to return to Tucson. Her wish was complied with and here yesterday morning she breathed her last among friends, for the deceased had many sincere friends here who loved her for her many amiable and good qualities and sweet, Christian character, all of whom will mourn her loss."

**SANTA TERESA.**

**Takes Her Departure—Pa Goes Too with His Winchester.**

There was quite a crowd to see Santa Teresa off yesterday afternoon on the Southern Pacific. Mexican women lifted their kids up to the car window that the saintess might touch them with the tips of her long slender fingers, and considerable attention generally was shown the young woman. She said that she left for Clinton and Merced where the men folk of her family expect to work in the mines. She thought she would return to El Paso later on, but couldn't exactly say.

**RAW SWEATNESS.**

**Thousands of Tons Imported in One Week.**

One hundred and twelve thousand tons of foreign raw sugar arrived in the United States last week, at three ports. Not less than 600 factories, and probably more, were required to make this sugar. Forty thousand tons of beet sugar have been made in the United States during the last year, or less than 40 per cent of one week's arrival of foreign sugar at three ports. Judging from this there seems to be no immediate danger of an overproduction of beet sugar in the United States, and as New Mexico is the favored spot of all the world for this particular thing, it should be encouraged to the greatest extent.—Las Vegas Optic.

Two more drummers arrived this morning. One or more drummers arrive in town daily and all appear to get a number of orders.

**FIRST IN THE MARKET.**

**Yuma Heights Leads in the Race for Supremacy.**

Last Thursday H. W. Blaisdell, manager of Yuma Heights, shipped a carload of watermelons grown at that great ranch to Los Angeles, where they will from the fact that melons will not be ripe in southern California for some time yet, being exceedingly fancy prices. The Sun says the car contained twelve tons of melons, which averaged about twenty pounds each, making a total of 1,200 melons. They will bring in Los Angeles from \$1 to \$1.50 each, and Mr. Blaisdell will probably not in the neighborhood of \$1900 from the carload. This is the first carload of melons shipped in the United States this season.

The U. S. Gov't Reports show Royal Baking Powder superior to all others.

**GREATEST OF ALL PHYSICIANS.**

**Discoverer of Paine's Celery Compound to Whom Thousands Owe their Life and Happiness.**

"Excepting its hand of magnificent stevedores and its military heroes" says the most recent writer upon America, "the people owe more to Dartmouth's physician-teacher than to any one man."

"In every walk of life, among the highest official circles at Washington, in the homes of the best people in the large cities, among the every day folks of the country families that 'live from hand to mouth' and could not, if they wished, afford the services of any but an ordinary physician—everywhere I have met people to whom Paine's celery compound has been a blessing."

The story of the life-work of this giant among men has been often told and is familiar to most readers. The likeness above is probably the best portrait of him yet printed.

It was the world-famed discovery by Prof. Phelps of an infallible cure for those fearful ills that result from an impaired nervous system and impure blood which has endeared the great doctor to the world, and made his life an era in the practice of medicine.

Prof. Phelps was born in Connecticut and graduated in medicine at Yale.

His unusual talent soon brought

him reputation and prominence among his professional brethren. First he was elected to the professorship of anatomy and surgery in the Vermont University. Next he was appointed lecturer on materia medica and medical botany in Dartmouth College. The year he was chosen professor of the chair then vacated by Prof. Robby, and occupied the chair, the most important one in the country, at the time when he first formulated his most remarkable prescription.

In view of the overwhelming testimony to the value of Paine's celery compound that has recently appeared from men and women of national reputation, the picture of Prof. Phelps is particularly interesting.

The fact is, Paine's celery compound is not a patent medicine; it is not a strasparilla; it is not a mere tonic; it is not an ordinary urine—it is as far beyond them all as the diamond is superior to cheap glass.

It makes people well. It is the one true specific recognized and prescribed by eminent practitioners for diseases arising from a debilitated nervous system. Prof. Phelps gave to his profession a positive cure for

sleeplessness, wasting strength, dyspepsia, biliousness, liver complaint, neuralgia, rheumatism, all nervous diseases and kidney troubles. For all such complaints Paine's celery compound has succeeded again and again where everything else has failed.

No remedy was ever so highly recommended, because none ever accomplished so much.

Today Paine's celery compound stands without competition for feeding exhausted nerves and building up the strength of the body. It cures radically and permanently.

The nervous prostration and general debility from which thousands of women suffer so long that it finally gets to be a second nature with them—all this suffering and despondency can be very soon removed by properly feeding the nerves, and replacing the unhealthy blood by a fresher, more vitified fluid. A healthy increase in appetite and a corresponding gain in weight and good spirits follow the use of Paine's celery compound.

Paine's celery compound is the most remarkable medical achievement of this last half of the nineteenth century.
