Two hundred thousand farmers of Oklahoma had an average income of \$3,000 for 1919 from their farms, is the statement made by J. A. Your Choice of a Dozen Charming Designs in Metal Beds

LOOKING at these beautiful new designs in her accustomed store, a woman might wonder why no one has ever thought before to follow the accepted design principals in metal beds.

The trouble in the past has been due to the limitations imposed by the oldstyle tubing. It cannot be worked into the shapes. It is apt to be rough—does not take the enamel smoothly.

For years Simmons Company has been working on this problem of bettering metal bed designs.

To accomplish what it was after—such charming models as the "Florentine" design illustrated above in Twin pair—it had to invent a tubing that is truly seamless.

The result is a bed that is square and trim—free from joint, seam

and roughness. Beautifully smooth, so that the enamel lies tight and evenly all over—does not scratch, check or chip, just such a bed as you have long wanted to possess.

Come in and see these fine new Simmons designs in Beds Built for Sleep. Quiet beds with the Simmons Pressed Steel Corner Lock—free from squeak or rattle.

Your choice of many different patterns—and of Twin Pairs and Double Width in each pattern. Enameled in the accepted Decorative Colors, and in Mahogany, Oak and Circassian Walnut.

Prices of Simmons Beds are little if any higher than those of ordinary Beds. You'll be glad to select from this assortment
