**FRANK E. ROWE, Editor and Publisher**  
 Speaking of the law compelling creameries to heat milk after separation to a point that will kill tuberculosis germs the Londonderry Sifter says:  
 No doubt the law was designed to lessen the spread of tuberculosis among farm animals; and it will do it, too. So would a law that there should be no farm animals in existence. But in eradicating tuberculosis, the raising of young stock ought not to be eliminated. The point is this: "scalded milk kills calves."  
 Rowarm your milk before feeding and add a spoonful of wheat middlings, then give your calf a chance to exercise freely instead of tying it with a short rope in a dark stall and it will survive scalded milk.

The towns voting to license the sale of intoxicating liquors have succeeded in figuring down the amount paid to the state to a trifle over \$50,000, while last year when the state got only half the fees it realized over \$44,000. The towns have done unexpectedly well. There are some 27 towns that voted license, aside from all the druggists' licenses and we hardly see how they squeezed the amount down so low. It is to be remembered too that the state as yet to pay the bills for the administration of the law in all the license towns. This will easily amount to from \$6000 to \$10,000 and the state will be lucky if it isn't a loser by the change of the law. The Banner believes though that those papers are wrong which intimate that this law was due to a raid by the small towns. This paper's remembrance of the affair is that it was a raid of certain politicians and future place hunters who thought they saw a chance to get more money into the state treasury to vote out, and in order to do it worked a combination with the prohibitionists who were frankly trying to do all they could to cripple the license laws.

**Strongarm Legislation**  
 Significant sentences appear in the recent telegrams sent out from the state house in Montpelier. One is to the effect that the entire appropriation for the administration of justice, some \$310,000, has been expended and that a deficit of from \$40,000 to \$50,000 is likely to be carried over to the next legislature.  
 Another item is published with a more or less audible whoop, which reports a sum of about \$16,000 collected by means of the horse power registration fee of automobiles. As this money goes straight back to the highways, however, it has no effect whatever on any situation outside of that department.  
 A circumstance that was fully anticipated during the sessions of the legislature is dealt with by the Montpelier Argus in this language:  
 "When all the liquor licenses are paid in this year to the state treasury, it is estimated at this time that they will amount to only \$50,000. A year ago the fees amounted to \$14,000. Under the new law all the money goes to the state. Before, the towns voting license got one-half. Most of the towns charged the minimum fees so that the actual return to the state is only a small degree bigger. It was claimed when the legislature was in session that \$90,000 would be the revenue from the licenses.  
 "With Burlington and St. Albans missing the license fees at present amount to \$39,157. Had the towns received even a part of the money the state would have got far more than it is going to receive this year."  
 When the fact is taken into consideration that the state must stand the expense of administering the law in license towns, it will be seen that absolutely nothing has been gained by that particularly hateful piece of brute force legislation which took away the fees for liquor licenses from the towns where they belong, and placed them in the state treasury, to state off, if possible, the deficit threatened by the legislature's own extravagance.  
 This was warmly condemned by the representatives of the larger towns and cities, but was carried through first, under the pretext of being temporary legislation, second, under J. A. DeBoer's sarcastic amendment to link the saloon and the little red school house together and place the fees in the permanent school fund, and third, under the frank and brutal prod of the administration pitchfork, with the brazen war-cry, "We need the money!"  
 As the Argus says, \$90,000 was the golden bait dangled before the glistening eyes of the future, salary-grabbers, and the indignant protest of the members from Burlington, Bennington, Rutland, St. Albans and other such places was simply hooted out of court. Those members did not hesitate to notify the legislature that their towns would take excellent care to see that the state would not benefit by this particularly overbearing measure, but the bill went through with a flourish of victory and the municipalities most injured were particularly invited to do their worst, either like the result or put up with it.  
 The selfish and short-sighted folly of such an attitude is now apparent in the actual result and must be highly gratifying to the leaders who were responsible for such piratical legislation.  
 If those busy meddlers, itching as they were for another chance to mulct the large towns for the benefit of the small, had let well enough alone the state would have been much better off because \$44,000 in clear money, with no expense of administration, is certainly better than \$50,000 which the

**FAMOUS POULTRY FARM SOLD**  
 George H. Northrup Disposes of His Property at Granville, N. Y.  
 Granville, N. Y., June 8.—George H. Northrup, one of the foremost poultry breeders in the country and the originator of the strain of rose comb Black Minorca, has sold his famous poultry farm to George W. Hey of Bozeman, Mont., who will continue the breeding of the Black Minorca poultry. One of the considerations in the deal is that Mr. Northrup shall not engage in the breeding of this strain while Mr. Hey follows the business on the Northrup farm. The money consideration has not been made public but it is rumored that it was in the vicinity of \$15,000. In addition to a cash consideration Mr. Northrup took some city property in Bozeman.  
 Mr. Northrup was one of the first importers of single comb Black Minorcas in this country, he having secured birds in England in 1885 and 1886. He bred these birds for two or three years before buying the farm in this town 21 years ago. The purchase price was \$2000, of which Mr. Northrup paid \$700 down. He made a success of the business from the first and has secured enormous prices for a large number of birds, on cock selling for \$1000, about 40 cock and fowls for \$100 apiece, and others for \$200, \$300 and \$500 each. Since purchasing the farm, which contains about 100 acres, Mr. Northrup has erected buildings at a cost of about \$14,000.  
 There are at present about 500 matured hens and 1500 chickens on the farm, besides a large number of eggs in the process of hatching. This strain of birds, of which Mr. Northrup has made a life study, originated on the island of Minorca at the first importation to England so far as can be learned, was made about 145 years ago. The standard weight for cocks is nine pounds and for hens, seven and a half pounds.  
 Mr. Hey, a former proprietor, is a young man. For several years he has been director of music in the State college at Bozeman and for the last few years has been breeding Black Minorcas as a side line, meeting with great success. Last year he won the state prize offered to the breeder winning the largest number of prizes in the state. He has decided to give up his profession as a director of music and give his whole time to the breeding of this strain of poultry.  
 Mr. Northrup started today that he was undecided as to what he would do in the future.

**FIVE BILLS NOT FOUND**  
 No Indictment of Man Who Killed Burglar at Hyde Park  
 Hyde Park, June 8.—The grand jury completed its work in Lamoille county court Saturday afternoon, reporting five bills not found and two found.  
 The bills not found were these: Archie Billings of Stowe, charged with shooting unknown burglar at Hyde Park; Joseph LaQuee of Elmore, charged with shooting E. C. Moore; Fred Brown, Belvidere, charged with shooting a dog; Henry C. Cambridge, charged with shooting a deer; Silas Brooks, Waterville, charged with assault.  
 The two bills found were: Ernest Hyde Park, charged with assault with intent to kill Lot Emerson; Emma Shatney, Eden, charged with assault with intent to kill Daniel Barker.

**Faultless Prescription.**  
 No Remedy for Stomach Distress and Indigestion so Perfect  
 A scientific prescription for dyspepsia put up in small tablet form and called Miona is making thousands of quick and lasting cures throughout America.  
 There is no stomach disease (even catarrh of the stomach) that it is not guaranteed to cure, and Wm. L. Gokay has so much faith in Miona for stomach disorders of all kinds that he will refund your money if it does not cure.  
 Miona, the faultless prescription, stops sour stomach, belching of gas, distress in the chest, heartburn, biliousness and nervousness.  
 It is well worth a trial by any reader of the Banner who suffers from any stomach disturbance. It contains ingredients that not only give relief but clear the system and restore the strength and activity and can perfectly digest any kind of food without aid.  
 Try Miona for a week; misery will change to happiness; despair to hope, and eyes to bright and you will wonder why you suffered so long with such a remarkable prescription at hand.  
 And only 50 cents for a large box at W. L. Gokay's and at druggists everywhere.

**HYOMEI**  
 Cures catarrh or money back. Just breathe it in. Complete outfit, including inhaler \$1. Extra bottles 50c. Druggists  
**BAD CIRCULATION**  
 Causes Piles—External Treatment—Won't Cure Them.  
 Free circulation of blood in the lower bowel will cure any case of piles. Piles may be due to constipation or any of a dozen other causes. Dr. Leonard's Hem-Roid, the only internal, tablet remedy for piles, opens a free circulation in the bowel, and cures the cause.  
 24 days' treatment is sold for \$1 at Wm. L. Gokay's and is guaranteed fully. Dr. Leonard Co., Station B, Buffalo, N. Y. Write for booklet.  
 Colds that hang on weaken the constitution and develop into consumption. Foley's Honey and Tar cures persistent coughs that refuse to yield to other treatment. Do not experiment with untried remedies as delay may result in your cold settling on your lungs.—Quinlan's Pharmacy.

**GETS MORE FROM STATE**  
 Canadian Imports of Manufactures From This Country Steadily Gain  
 Washington, June 8.—Merchandise from the United States forms a steadily increasing share of the imports of Canada, as shown by figures from Canadian official publications just received by the bureau of statistics of the department of commerce and labor. Furthermore, Canada's imports from Great Britain have declined during their period of increase from this country.  
 Whereas, imports from the United States to Canada increased from 34.05 per cent. of the total importations of Canada in 1889 to 60.4 per cent. for the fiscal year ending March 31, 1909, the imports from Great Britain have decreased during the same period from 56.2 per cent. to 23.69 per cent.  
 Two-thirds of Canada's imports are manufactures. These amounted in 1907, the last year for which statistics are available, to \$166,000,000. Of this amount \$39,000,000 worth of goods of the total, were from the United States, and only \$54,000,000 worth, or 33 per cent. from Great Britain.  
 Merchandise entering Canada from the United Kingdom and most of the British colonies is admitted at rates materially below those of the general tariff paid by merchandise from the United States.

**AFTER THE BALLOON RECORD**  
 High Flyers in International Race Fail to Make It  
 Indianapolis, June 7.—Three of the new balloons that started Saturday in the National distance race of the Aero club of America and the endurance test of the Aero club of Indiana, landed yesterday and another, the Indiana, entered in the National race, is reported to have dropped to earth at Shaker Island, Tenn., at 6 o'clock in the evening, taken on water sailed off south.  
 Two of the balloons, it was reported from Nashville, Tenn., were sighted about 50 miles south of that city in the afternoon—about 200 miles from here.  
 The balloons that landed yesterday were the Chicago, the largest balloon entered, with C. A. Coey an John Benja in the car, which came down at Scottsville, Ky., and the Indianapolis, with Dr. Goete Link and R. J. Irwin of Indianapolis, which landed at Westmoreland, Tenn. Both these craft were entered in the Indiana endurance race, as also was the first balloon down, the Ohio, with Dr. H. W. Thompson of Salem, Ohio, and J. Blake of Canton, Ohio which came down to earth last evening at Nashville, Ind.  
 There is no definite information as to the six other entrants, save in respect to the Indians. All probably are still sailing south near Nashville, Tenn. Under the rules of the international aero club governing the American race, Carl Ebsloeh and his aide, G. L. Bumbach, are disqualified themselves by landing a proceeding again.  
 The Indiana endurance race was won by Dr. Link and R. J. Irwin in the Indianapolis. They were in the air about 22 hours. The Chicago was second and the Ohio third. The record is 44 hours, held by Alfred Leblanc of France who started in the international race from St. Louis October 21, 1907 for the James Gordon Bennett cup.  
 The distance record is held by Oscar Erbsloeh of Germany and was made in the same race. Erbsloeh landed in Asbury Park, N. J., having covered 832 miles.  
 If the balloons still competing in the present race continue due to the Indiana, which is about 675 miles from Indianapolis and therefore would have no chance of beating the record. If, however, they strike a current that carries them southeast into Florida or southwest into Mexico, they may set a new record.

**END OF A RED NOSE.**  
 New Flesh Colored Product That Heals and Hides Skin Imperfections.  
 A peculiar feature of poslam, a new skin discovery, is that it is naturally flesh colored and contains no grease, so that when used on the face for the complexion, or for pimples, red noses, or any other inflammations, blemishes, or discolorations, its presence cannot be detected. It can thus be applied in the day time, the natural color of the skin being immediately restored and the actual healing and curing process accomplished in a few days. It can be had of any pharmacist who sells pure drugs. Wm. L. Gokay makes a specialty of it. Fifty cents worth will answer either for the troubles mentioned or in curing ordinary cases of eczema. Itching stops at once.  
 The Emergency Laboratories, No. 32 West 25th street, New York, are the sole dispensing agents for poslam in the United States and will send an experimental quantity free by mail in plain wrapper to all who write for it. This will show results after an overnight application.
