Ladies' night is observed by the Brotherhood of the Methodist church Tuesday evening, 8 o'clock. A program of music, vocal and instrumental, by local talent will be given; a short address, and readings by Fred Hancock of Troy. Refreshments will be served after the program.

There came near being a milk famine in Bennington over the week end, in fact in many instances families and in-town dealers, were with out milk from Friday until Sunday morning. The severe snow storm of Friday accompanied by strong winds left the roads in bad condition and a number of the farmers have been unable to break through.

Friday evening at 6:30 in the Methodist church the men who make the annual canvass for the village to defray current expenses of the financial year April 1st, 1920 to March 31st 1921, will have a clam chowder supper together. This is a very important meeting and should be attended by all the canvassers. Final arrangements will be made for the annual subscription taking on March 14th.

In order to insure the success of the Bennington High school baseball team for the coming season some place for indoor practice during the next four to six weeks must be had. Any property owner who has a vacant basement, shed or barn which he thinks may possibly be suitable will be helping them greatly if he will telephone or call at the high school. The Student's association is willing to pay reasonable rent for the right place. If you have a suitable place here is your opportunity to help in making the 1920 B. H. S. baseball team the best ever.—Adv.

The Sunday school of the Methodist church will have a social and business evening together Wednesday evening this week. The scholars are requested to sit together by classes with their teachers at tables provided for each class, furnish their own supper and one number of the program of entertainment, supper to be started at 6:30, the general committee furnishing coffee and setting the tables. The business end of the meeting is to organize the classes, and get a definite plan under way whereby the school may reach all the people of the constituency. It is a means to putting the school on a modern working basis. A committee on religious education to guide the courses of study and have charge of methods in the church and school will be chosen at this meeting.

VILLAGE WARNING. The legal voters of the Village of Bennington are hereby notified and warned to meet at Free Library Hall in said Village of Bennington on Tuesday, March 16th, 1920, at nine o'clock in the forenoon to transact the following business:—

HIGH MEAT PRICES ARE DUE TO EXTRAVAGANCE

Chicago, March 4.—The American laborers, who are eating too high up on the hog (pork chops and ham) and the American housewife who eats too far back on the beef (porterhouse and round steak) are to blame for the continued high cost of living, the American institute of meat packers announced Wednesday.

With the export market for meat shattered by adverse foreign exchange and wholesale prices back to where they were a year or two ago, the American consumer is chiefly responsible, the institute's bulletin on February conditions says.

"At home there was a good volume of pork trade during the month," the bulletin says, "but consumers seemed to want the choice and higher priced cuts. High wages in the South have led to purchase of choicer cuts of pork than in former years, and the result is a lack of sale for heavier cuts of salt pork."

Hog prices early in the month were at the highest level of the winter, with receipts at the yards 15 to 20 per cent below normal, despite the fact that government reports show there is probably a large surplus on the farms.

In the beef market a "factor which has had great influence upon the beef trade has been the relatively strong demand for hind quarter beef and the poor demand for forequarter beef," the packers state.

The mutton situation is similar. The report says "a larger demand from the housewife for cuts from the shoulder and stew meat would help in equalizing prices of all cuts. It would lower the cost of the most expensive cuts and would lead to a better consumptive demand for the lower price cuts."

ROBUST CHILDREN A child should not look pale, thin or worn. Such condition denotes malnutrition. To keep up growth and robustness a child needs a plenitude of food rich in vitamins.

SCOTT'S EMULSION

abundant in growth-promoting properties, is an ideal supplemental food that could well be a part of the diet of every growing child.

Children always do well on Scott's Emulsion.

We Specialize in GLASSES For Children

Many grown people have defective sight because their eyes were neglected in childhood. We advise all parents to give serious thought to the condition of their children's eyes.

Are you a parent? If so, act quickly!

Hudson Also Supreme in Distinction

The Super-Six Has Always Been the Pattern Car. Its Exclusive Motor for Five Years Has Given It Mastery in Performance and Endurance

It was never sought to develop the Hudson Super-Six as the greatest speed and power car in the world.

It is true that in speed—in hill-climbing—in quick acceleration—no stock car ever matched it. Official records show that. But they are incidental. They were made in tests to prove Hudson endurance.

Surely these great performance qualities are enough to account for Hudson's five years of leadership as the largest selling fine car in the world. Any owner would take pride in a car that none has equalled in any worthwhile performance record.

Yet a large class of Hudson buyers selected it for an altogether different quality.

means utter smoothness—due to less vibration, than any other type ever achieved. That, too, is a matter of record. The official proofs are open to all.

Perfected Mechanism Makes Such Luxury Possible

In the exclusive Super-Six motor vibration is reduced almost to nil. Motor efficiency is increased 80%. Motor power is increased 72%, without added size or cylinders. Endurance is almost doubled. The Super-Six principle would add these advantages to any conventional type, six-cylinder motor. But no other can use it.

Its type gives Hudson every advantage. Why accept a lesser car?

You will find in the Hudson all the beauty and luxury that imagination and skilled workmanship can create.

A Distinctive Design An Exclusive Motor

Thousands chose it with an eye single to its beauty, charm and notable appearance. They hold none can surpass it in distinction. For the Hudson looks its supremacy in every line.

But it is idle to think that those who primarily seek fine appearance in a car, do not value the mechanical superiority of the Hudson Super-Six.

Granted you will never require such great speed, yet Hudson's capacity means less than half load in ordinary driving. It insures absolute freedom from strain.

That extra reserve power means much on hills. It means much in flexibility and in quick response. It saves much changing of gears. It

See How It Leads All Fine Cars

Note how it predominates wherever fine cars are seen. Outside of the clubs, the opera, the theatre; in the fine residence streets and on fashionable boulevards observe how it outnumbers two, three and even four to one, any other make of fine car.

The supply of Hudsons has never been sufficient for the demand. Thousands have waited months for certain wanted models. You can insure yourself against disappointment in delivery only by placing your order well ahead of the time you will require it.
