Engagement Rings.
The custom of giving engagement rings ranks back to long before the Christian era. With the ancient Egyptians engagement rings were always of iron, to indicate the mutual sacrifice of liberty of the contracting parties.
One of the very earliest adornments of betrothal rings was a loadstone, which symbolized the attractive force which drew a maiden from her own family circle into that of her husband. It is believed that the fourth finger has always been the bride's ring finger.

Hard to Part With.
The man at our boarding house has the remains of a once prosperous pocket comb, from which the teeth have long since fled.
"Why," we ask him, "do you carry that thing around with you—that worthless old comb?"
And he replies:
"Well, I can't part with it."—Baltimore News.
