SALEM NEWS

Mrs. Lewis Synder, of Richmond, is visiting relatives here. Miss Rachel Cox left yesterday for Giles county to visit relatives.

W. H. Shuff has returned after a several weeks' visit to Chattanooga. A beautiful stock of late style dress goods at S. M. Martin's College Avenue Store.

Misses Pearl Arnold and Elva Thompson, of Montvale, are visiting Mrs. R. C. Stearnes. Mrs. E. D. Mitchell, of Springwood, Botetourt county, is in Salem on a visit to relatives.

Davis Ayers moved yesterday to his residence on Church street, which property he recently purchased. Miss Mary Hartney and Mrs. Annie Jamison, of Patterson, N. J., are visiting Mrs. J. T. Penn, of this city.

J. B. Groever, graduate of Roanoke College in 1871, and now principal of Wortberg Seminary, Va., is in Salem. WHAT makes goods move so rapidly at S. M. Martin's College Avenue Store? Because they are so beautiful and cheap.

Rev. D. G. Armstrong, Jr., will conduct communion services at the Presbyterian Church next Sunday morning at 11 o'clock. Mrs. Charles Wilson, of Wills, W. Va., and Misses Lucy and Minnie Wilson, of Lafayette, are visiting their cousins, the Misses Moomaw, in this place.

Prof. R. C. Stearnes, of Salem, has been appointed State manager of the National Educational Association—a handsome compliment to this young and energetic educator. Mrs. Julia A. Deyerle, a very old lady, and widow of Benjamin Deyerle, living a few miles west of Salem, had a fall yesterday, and received painful, if not serious, injuries.

C. B. Strouse and Mr. Hypes have returned from Newcastle and report 175 conversions. Among the number of converts are Judge Marshall, Judge Jones and Colonel McDonald. CALL and see the big bargains I am offering in a large and attractive stock of fall and winter goods, fresh and new. Give me a call before you buy. S. M. Martin's College Avenue Store.

Mrs. Nannie Moore, daughter of J. M. Thomas, after a lingering illness, died Wednesday. The funeral service was held at the Lutheran Church yesterday, and the interment took place at East Hill Cemetery. Dr. L. G. Pedigo, who has been the resident physician at Crockett Springs during the past season, was in Salem yesterday. The doctor will leave for New York city next week, where he will engage, as heretofore, in professional work.

Salem Machine Works has recently closed three contracts for supplying machinery for mills and negotiations are now being made for four additional contracts. Those already secured will keep the works in constant operation during the winter. Prospects are very bright for the machine works. In the cases of the Bank of Salem against Dr. J. P. Killian, Mrs. Bruffey and others, argument upon motion to reject the special pleas offered by the defendants was concluded last night and this morning the judge announced his decision, which rejected said pleas so far as they contained affirmations of opinion. The Bank of Salem was represented by A. B. Pugh and by Lee & Allemon, while the defendants were represented by G. W. and L. C. Hanabrough, S. Griffin and Judge Green, of Danville.

While down in the Southwestern part of the State some time ago," says Mr. W. Chalmers, editor of the Chico (Cal.) Enterprise, "I had an attack of dysentery. Having heard of Chamberlain's Colic, Cholera and Diarrhoea Remedy I bought a bottle. A couple of doses of it completely cured me. Now I am a champion of that remedy for all stomach and bowel complaints." For sale by The Chat. Lyle Drug Company.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years, was supposed to be incurable. For a great many years doctors pronounced it a local disease, and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure in the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials. Address F. J. CHENEY & Co., Toledo, O. Sold by all druggists, 75c.

Go to Donaldson's for oak suits, very cheap. Did You Ever Think That you cannot be well unless you have pure, rich blood? If you are weak, tired, languid and all run down, it is because your blood is impoverished and lacks vitality. These troubles may be overcome by Hood's Sarsaparilla because Hood's Sarsaparilla makes pure, rich blood. It is, in truth, the great blood purifier. Hood's Pills cure liver ills, constipation, biliousness, jaundice, sick headache, indigestion.

OFFICIAL WHIPPING. A SAMPLE CASE.

How Boy Criminals Are Punished by Thrashing in England. Boys who are found guilty of minor offenses in England are sentenced by the judges to a sound thrashing at the hands of the policeman. Here is a description of it taken from an English paper: The birch is a very different instrument of torture from the cat. The former is made up of a number of long birch twigs, while the latter is really a whip with nine knotted small cord lashes. When the cat is administered, the prison doctor must be present, but when the birch is put on it is only necessary for the inspector or superintendent of police to witness it, although the parents or near relatives of a boy sentenced to be flogged may be present at the castigation. When a dose of the cat is dealt out, none but those connected with the prison are allowed to be there. Like the cat the birch may be made a very severe punishment or a comparatively trivial affair, not merely according to the number of strokes, but from the instructions given the constable who is told off to do the flogging. I have seen a boy after six strokes resemble nothing so much as a piece of raw beef and bleeding fearfully, while I have also seen a boy after six strokes merely a trifle red.

Some policemen dread the duty of flogging, and after the first two strokes get a sharp order to "hit the boy and not play with him." Other constables delight in the work and boast of their ability to draw blood at the first stroke. Various modes of administering the punishment obtain in different parts of the country. In some places boys are placed face downward on a form. One constable holds his arms and head firmly, while another does him the same service with his legs, and the third administers the punishment. In other prisons the culprit is placed on a constable's back, and as he sits there with his arms around the officer's neck, awaiting "the event," his attitude strikes a spectator more as one of affection than discomfort. Another way is to compel a boy to lean over a chair as if he were praying, then run a strap right around his legs and the legs of the chair, a constable holding his head and arms from the other side.—Brooklyn Eagle.

THROUGH OTHER EYES. Life at Harvard College From the English Point of View. The student life of America is eminently an American institution. It has grown up in an odd compound of native manners and foreign influences, which form an essentially new product. It is a good deal more complex in its organization than anything known on the Isis or the Cam. There is more details in it, and consequently less breadth of effect. The university organizations are innumerable. Men are banded together in college clubs for every conceivable purpose of study or amusement. Their bond of union may be their attempt to talk Greek with the accent of modern Attica, or it may be only a passion for dominoes, but it has all the notes of institution in its machinery of committee, president and secretaries. Great variety of life comes from the differences in fortune among the students, but of late years there has been a laudable attempt on the part of the university and college authorities to introduce a more uniform simplicity. Plain living is the cry, and with this secured it is believed the thinking will take care of itself.

At Harvard some time ago Professor Palmer tried to discover how far the living had departed from the philosophic standard by asking some hundreds of students for a return of their annual expenditure. The answers showed that Harvard at least had nothing to be ashamed of. Many of the students, less than a fourth, spent less than £130 a year; some less than £100. The average probably did not amount to the £200 a year which the professor regards as an entirely adequate allowance for both case and refinement. Yale is less costly than Harvard, so these institutions at least are not open to the reproach that they have introduced the millionaire into the American university life.—London News.

The Duke of York's Baby. There is a report that the Duke of York's baby is deaf and dumb, but everybody will hope that it is not true, and that the royal suckling will talk and hear as well as anybody when the time comes. If not, the disability will not be without its alleviations. Only a few of his line have said anything good or heard anything good of themselves in six generations. One of his predecessors earned this epitaph, which he may deserve whether he talks or not: Here lies Prince Fred, Who was alive and is dead, Had it been his father I had much to say, Had it been his brother Sooner had he died, Had it been his sister There's no one would have missed her, Had it been his whole generation All the better for the nation, But as it's only Fred, Who was alive and is dead, There is nothing to be said. —New York Tribune.

A Trick of the Huntsman. During a visit to Montana a prominent Chicago gentleman went with a party just starting for a grand "hunt for big game in the Yellowstone region." He remarked to the leader, "You cannot hunt in Yellowstone park." "Oh, no," said the leader. "We go outside the limits of the park, and if the game won't come to use we know how to manage to make it come." Such excursions are not uncommon, and it will not be strange if hungry Indians should occasionally imitate their white brethren.—Chicago Inter Ocean.

Too Dense For Him. Stage Villain—Ah! The plot thickens. Disgusted Auditor—Then I'm off! Can't make head or tail of it now, and I'll never see through it if it gets any thicker.—London Tit-Bits.

Enock Bros.

No. 34 SALEM Avenue. Enock Bros. No. 34 SALEM Avenue. Our Grand Fall Opening of Millinery, Silks, Velvets, Dress Goods, Cloaks, Capes, Wraps, &c., will take place Monday, Sept 30, and will be Continued the Entire week.

SPECIAL. AN ORIENTAL DREAM OF LOVELINESS.—Such a gathering of Exquisite, Silk and Dress Fabrics has never before charmed the ladies of Roanoke. We cordially extend an invitation to all the ladies to attend, and assure them they will be well repaid for their trouble. Please do not forget the date, September 30, and the entire week. RESPECTFULLY, ENOCK BROTHERS.

ARTIFICIAL SUNLIGHT.

The Stupendous Problem That Tesla Is Trying to Solve. Tesla had two big undertakings on hand when his laboratory caught fire and was destroyed in New York. The more important of these, from his point of view, is the production of light by the vibration of the atmosphere. According to the inventor, the light of the sun is the result of vibrations in 94,000,000 miles of ether, which separate us from the center of the solar system of which we are a part. His idea is to produce an earth vibration similar to those that cause sunlight, and thus give us a light as intense as that of the sun, with no danger of obstruction from the clouds. The inventor had already done something toward accomplishing this end when the fire occurred. It is understood that he has again taken the subject up in a way. To illustrate his principle it is only necessary to take a long bar of glass and note the brilliancy of the light it produces through vibration alone. It is a prismatic experiment in general terms applied to electricity. Tesla can compute vibrations as readily as most people count the wealth they would like to have. He can tell you the number of vibrations produced by a fly in action and draw interesting comparisons therefrom. For example, he will tell you that a certain kind of fly peculiar to the swamps of Central America moves its wings about 25,000 times to the second. You may doubt the accuracy of this statement in your own mind, but if you hunger for details Tesla will sit down and convince you with figures adduced from a scientific contemplation of the problem. "All I have to do," he said recently, "is to duplicate the number of vibrations required to light up the sun, and the practicality of my theory will have been demonstrated. It is difficult for me to give you an idea that you may readily grasp about the question of vibration. In ordinary life our minds do not deal with the figures that come up in such investigations. I have come to the conclusion that sunlight is produced by five hundred trillion vibrations of the atmosphere per second. In order to manufacture the same kind of light it will be necessary to produce an equal number of vibrations by machinery. I have succeeded up to a certain point, but am still at work on the task."—Current Literature.

VIGOR OF MEN

Easily, Quickly, Permanently Restored. Weakness, Nervousness, Debility, and all the train of evils from early errors or later excesses, the result of overwork, sickness, worry, etc. Full strength, development and tone given to every organ and portion of the body. Simple, natural methods. Immediate improvement seen. Failure impossible. 2,000 references. Book, explanation and proofs mailed (sealed) free. ERIE MEDICAL CO., Buffalo, N. Y.

COME AND SEE THE FOURTEENTH

BOTETOURT FAIR! FINCASTLE, VA., October 8, 9, 10 and 11, 1895.

\$4,000 Are Offered in Premiums and Purses.

BALLOON ASCENSION EACH DAY, With at Least Three Drops from Each Ascension.

FINE RACING, Running and Trotting. BICYCLE RACES.

Fine music each day by the Park Street Band of Roanoke.

Numerous and costly attractions to entertain guests during the Fair. Soldier's Running on the Fair Grounds on October 11th—last day of the Fair.

Hon. JOHN W. DANIEL, Orator.

Numerous distinguished ex-Confederates are expected to attend. For Premium Lists and complete information, address A. BECKLEY, President. JAMES McDOWELL, Secretary. 9-26 101 Fincastr, Va.

HENCH & DROMGOLD'S

SAW MILL AND ENGINES

A wonderful improvement in Friction Feeds and Gig-Back, back motion of Carriage 3 times as fast as any other in the market. Friction Clutch Feed, cutting off the feed gear to stand still while the rack is great saving in power and wear. Send testimonials for large Catalogue and prices. Also Friction Harrows, Hay Rakes, Cultivators, Corn Planters, Shellers, etc. Mention this paper. HENCH & DROMGOLD, Mrs., York, Pa.
