

Steering clear of the shoals of ill health and the rocks of disease is easy enough if only the digestion be kept in good order. It isn't often any one is sick unless they have indigestion. The commonest way in which indigestion shows itself is in constipation. Nine people in ten are troubled more or less in this way.

Nine-tenths of all the world's sickness is caused by this one trouble. Sleeplessness, pimples, blotches, headaches, sour stomach, dizziness, "heart-burn," palpitation, biliousness, distress after eating—all these are merely symptoms of constipation. Why do people suffer with them when the cure is so simple and so easily obtained? Years ago, Dr. Pierce's Pleasant Pellets were placed on the market. Since then, there has been no excuse for anybody to suffer from constipation, and its attendant ills. The "Pellets" cure every case infallibly and permanently. They are very small, easy to take, gentle and quick in action. They are not at all violent; they do not disturb the system. They cure you so you stay cured. Thousands of women will find if they take the "Pleasant Pellets" that their ills will vanish with the constipation.

The People's Common Sense Medical Adviser gives more plain useful information about the human body and all the ailments to which it is subject than any other single book in the English language. It is really a medical encyclopedia in one volume, a large heavy book of 1008 pages, with over 300 illustrations. The outline of money, time and effort in producing this great book was paid for by the sale of the first edition of 60,000 copies at \$1.50 each; and the profit has been used in publishing the present edition of half-a-million copies to be sent absolutely without price to all who will remit the small charge of 21 cents in one-cent stamps to pay the cost of mailing out. THE GENERAL DEPRESSION.

Facts and Figures Proving That It is Due to the Demonetization of Silver

I find scattered over this country an eight page pamphlet headed, "A Few Facts For the Consideration of the People of the South and West," by Richard H. Edmonds, editor of the Manufacturer's Record, Baltimore. This pamphlet is replete with statistics and statements which are so arranged and doctored as to greatly deceive the people. Its intention is to make it appear that the demonetization of silver is not the cause of the general depression, and specially that the decline in the price of wheat and cotton cannot be properly attributed thereto, but he attributes the low prices of these articles of consumption to over production.

Now, the Record has not an enviable reputation for correctness, and has for many years been compiling its reports in the interests of trusts, combines and large corporations. In this article I can only notice what it says about the wheat crops, and, I think, can prove that its statements regarding the wheat crops of the United States is positively incorrect and misleading. On page 4 of the pamphlet we find the following: "When Europe ceased to draw so heavily upon us and our exports of wheat dropped from 186,000,000 bushels in 1881 to 94,000,000 bushels in 1886, there necessarily came low prices." The above quotation is calculated to indicate forcibly that our exports of wheat has undergone a wonderful diminution. This is not true. On the contrary, I have before me the statistical abstract of the United States up to 1894, and on page 268 I find that exports of wheat from the United States in 1892 amounted to 225,065,512 bushels; in 1893 to 191,912,637 bushels; in 1894 to 164,283,129 bushels; in 1895 to 164,283,129 bushels; in 1896 to 164,283,129 bushels; in 1897 to 164,283,129 bushels; in 1898 to 164,283,129 bushels; in 1899 to 164,283,129 bushels; in 1900 to 164,283,129 bushels; in 1901 to 164,283,129 bushels; in 1902 to 164,283,129 bushels; in 1903 to 164,283,129 bushels; in 1904 to 164,283,129 bushels; in 1905 to 164,283,129 bushels; in 1906 to 164,283,129 bushels;
