

FRAUDULENT VOTING

The federal department of justice has sent out warnings to all sections of the country to look carefully into election frauds. The National government just now is concerned with the activities of the I. W. W. and the fact that the greater number of that scoundrelly organization are not citizens, but who have been voting nevertheless. Even in this county many alien are said to have registered and the same is true all over the state. These men must not be allowed to vote under any circumstances, but if they do they should be informed against and punished. Certain organizations are against the government, no matter whether republican or Democrat and they should be suppressed. Fraudulent voting is punishable by two years in jail.

THE FACT THAT OUR COUNTRY IS AT WAR

Does not, and cannot, alter the true interpretation of the basic principle of economy. Price alone never was and never can be a safe guidepost to economy. To spend a dollar less for some article which you need, be it for immediate consumption as foodstuffs or clothing, shoes or house furnishings, only to find that you have bought unwisely, thinking solely of price, and have thereby sacrificed satisfaction, perhaps your comfort and pride in ownership, is certainly not economy—it is blind extravagance. No matter what your need, be it ever so modest, or ever so magnificent you are assured of finding just what you want here to fit your requirements and render you fullest satisfaction, at the lowest price consistent with good value and good merchandise. Our motto "Where Quality Meets Price" stands ever before us in our dealings with you and it is our desire to give you the greatest possible one hundred cents value for every dollar you spend with us.
