Catarrhal Deafness Cannot Be Cured
by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure catarrhal deafness, and that is by a constitutional remedy. Catarrhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result. Unless the inflammation can be reduced and this tube restored to its normal condition, hearing will be destroyed forever. Many cases of deafness are caused by catarrh, which is an inflamed condition of the mucous surface. Hall's Catarrh Cure acts thru the blood on the mucous surface of the system.

We will give One Hundred Dollars for any case of Catarrhal Deafness that cannot be cured by Hall's Catarrh Cure. Circulars free. All Druggists, 75c.

With more straight Republican votes cast at last Tuesday's election in Nogales, than there were Republicans registered, Democrats who split their ticket, have something to think about.

With Oscar Ashburn, Jack Schleimer, Vic Wager, Mrs. Saxon and Mrs. Walker, saved from the Republican landslide last Tuesday, we have cause for rejoicing. It could have been worse.

At last Tuesday's election in Nogales 302 straight Republican votes were cast as against 213 straight Democratic votes. President Wilson says "a Democrat is a person who votes the Democratic ticket."

The most exciting badger fight ever pulled off in southern Arizona, was witnessed at the Santa Cruz Club last night, when R. L. O'Neill's badger defeated Al. Scharf's famous bull dog. CHRISTMAS SEAL SALE.

Organized Throughout Arizona for Support of Campaign on Tuberculosis

The annual Christmas Seal Sale for the purpose of securing funds for the Arizona Anti-Tuberculosis Association and its branch county societies is under organization throughout the State of Arizona. This announcement comes from Mr. T. C. Cuvellier, Executive Secretary of the State Association who is acting as Campaign Manager for the sale. Thirty Thousand Dollars for tuberculosis work in Arizona during 1921 is the goal for which the campaign workers are striving this December. Local committees will be organized in every city and town in the State and every resident of Arizona will be given an opportunity to purchase a few Christmas Seals at one cent each. For those who wish to make a more substantial contribution to the cause there will be Health Bonds printed in values of \$5, \$10, \$25, 50 and 100. Enough tuberculosis Christmas Seals have been printed and distributed by the National Tuberculosis Association to reach more than half way around the world, nine hundred million Seals having been distributed to the forty-eight state tuberculosis associations and more than eleven hundred local anti tuberculosis societies. These Seals if placed in a row would measure fifteen thousand miles.

The aims of the Arizona Anti-Tuberculosis Association for 1921 are announced as follows:

To seek to provide enough more sanatorium and hospital beds to accommodate every consumptive needing such care; to follow up all tuberculosis cases; to provide public health nurses with a proper arries and consulting experts to assist physicians in the early discovery of tuberculosis; to provide wherever possible dispensary care; to provide discharged from sanatoria to prevent relapses and to provide suitable knowledge of tuberculosis in every community to give home care and instruction to all cases of tuberculosis; to establish open air schools or fresh air classes and preventorium for all children needing such special care; to urge the importance of a thorough examination of all school children for tuberculosis and other physical defects; to further organize community effort to control tuberculosis by securing adequate legislation and all other provision necessary; to educate all communities by literature, exhibits, lectures and publicity regarding the nature, treatment and prevention of tuberculosis; to seek by the introduction of the Modern Health Crusade to train all school children in correct health habits; and to endeavor to persuade employers of labor and working men and women of the economic value of periodic medical examination as a means of health conservation.

A recent tuberculosis survey of Arizona made by survey nurses revealed the fact that a work of this nature is much needed in Arizona because of the large number of tuberculosis cases coming to Arizona and who are without funds with which to provide themselves with necessities for their own care or for the protection of others against infection by these cases themselves. In many communities the crowded housing conditions only add to the problem of preventing the spread of this infection and this makes it doubly important that provision be made for adequate supervision and instruction of such cases. That there are over three thousand children directly exposed to tuberculosis infection by intimate contact with active cases was one finding of the tuberculosis survey made by the State Association in cooperation with the State Board of Health.

The Sale of the Tuberculosis Christmas Seals will be extended from December 1st to 15th in Arizona. Seals will be placed on sale, however, the last week in November so that merchants may secure them in time to place them on their statements mailed December 1st. Following is the personnel of the State Committee on the Tuberculosis Christmas Seal Sale who have endorsed the work of the Arizona Anti-Tuberculosis Association and who commend the Seal Sale to the people of Arizona.
