### ERRORS OF THE PRESS.

How a Newspaper Foreman Enlightened the Professor.

Professor Hindersey, has given up the idea of publishing a reform news-paper, and has returned to the college. where he will resume for a time, the work of teaching the language to young men who contemplate journalism. The men who contemplate journalism. The professor's newspaper experience was not pleasant and he only issued one edition of the Weekly Iliad. He took the proof sheets, after his elaborate article had been set up, and read them carefully. He did not demand a "revise," and of course the foreman did not insist upon the extra precaution. When the paper came out, the professor discovered with horror that he had been made to use many expressions not been made to use many expressions not at all consistent with grammar. In a

rage he called the foreman.

"Look here!" he exclaimed. "You make me say, 'have took,' and 'lrad saw.' I marked all of these errors and told you to see that they were cor-

The foreman looked at the paper for moment and replied: "It is enough to make a man swear." "It is enough to make an angel swear!" snorted the professor. "I'd sue 'em," mused the foreman,

much concerned and deeply grieved.

"Sue whom?"
"The parties that sold you the press."
"What have they to do with it?"
"Why, sir, they sold you an incorrect
press. No matter how your paper is
set up, its correctness depends on the
way the press makes the impression.

You might go along for a year and not have a single error, and again, you might have a dozen in a a paragraph."
"I never heard of such a thing," said the professor in astonishment, waver-ing in that indefinable credulity, the

inseparable companion of impractical education. "Oh, yes," continued the foreman,

"it's something that catches the best of 'em. Walter, the great English news-paper man, labored for years trying to get at some rule by which all presses might be corrected, but his efforts only received the purple robe of partial suc-cess. He could correct the Walter presses, but could do nothing with the machines of other make. He had a great deal of trouble, for once, just as he was congratulating himself, the press slipped a cog and called the king a fool and the lord chancellor a rapscellion." scallion.

"This is most extraordinary information," said the professor, thoroughly convinced by the artful foreman. "I think that I shall prepare a lecture on the errors of the press.

"A good idea, sir, as the newspaper men are loth to let the public into their confidence.

"Do you think that our press can be "Not without great expense. You

would have to get a man from New York and pay him largely."

"I am sorry that I went into this thing. Don't you think you could take the office and after awhile pay me what you think it is worth?" "The responsibility would be great,

"I know that, but you are willing to

'Oh, yes. I'll try." "You have shed a great deal of light on my hitherto darkened pathway, and have given me a new insight into me-chanical philosophy. Assist me further in getting up data for my lecture, and I will make you a present of the of-

come famous as a great lecturer, remember that to you my latch string ever hangs on the outside."-Arkansaw Traveller.

# The Lime-Kiln Club.

"I hold heah in my hand," said the President as the meeting opened in due form, "a petishun signed by 220 pusson praying dis club to admit de female sex to membership. Tze sorry to see 'em waste so much time. When de time arroves dat dis club can't be run widout de help of de odder sex, Paradise Hall will be a deserted ruin."
"Does I understan' de President to

be opposed to what am called woman's rights?" asked the Rev. Penstock as he suddenly bobbed up.

"You does, sah—you does. Take de movement from its incepshun twenty y'ars ago to de present date, and it has nebber included one true woman. It has bin a movement mapped out an' followed by a class of males an' females who have somehow kept cl'ar of idiot asylums, an' yet who doan' know 'nuff to be lunaties. To de wife an' mother —de true woman of de fiah-side—I grant homage and reverence. I class her second only to deangels of Heaben. To the female who imagines dat de Lawd created her to be sunthin greater dan a woman, I grant de same respects as to a man, an' gin her de same chance to stan' up to a crowded kyar. I doan' want to meet her nor talk to her nor read to her. She am a mighty poo' woman an' a slim sort of a man.

"Does de President mean dat it shall go out to de world dat disclub am 'pos-ed to woman's rights?" inquired Pen-

"Yes, sah."
"I should like to see a vote taken on

de queshun." The roll was called and the vote stood: For woman's rights, 12; against, 194. Elder Penstock sat down with a jar which was heard eighty rods away, and the routine business taken up.—Detroit Free Press.

A New York cigar dealer has invented a "tobacco refrigerator" for keeping the weed fresh and moist while exposed for sale. It is a cigar stand and tobacco-box combined, made of polished white metal, and divided in the center by two perforated partitions, between which is placed a wet sponge.

and to all of such I would say: "Do not let your good judgment be governed by your prejudices, but give

### HYPOCHONDRIA.

The Mysterious Element in the Mind that Arouses Vague Apprehensions-What Actually Causes It.

The narrative below by a prominent scientist touches a subject of universal importance. Few people are free from the distressing evils which hypochondria brings. They come at all times and are fed by the very flame which they themselves start. They are a dread or coming 50c. and \$1.00 .- 44 derangement caused by present disorder and bring about more suicides than any one thing. Their first approach should be carefully guarded. Editors Herald:

It is seldom I appear in print and should not do so now did I not believe myself in possession of truths, the revelation of which will prove as heals the lungs .- 44. of inestimable value to many who see these lines. Mine has been a trying experience. For many years I was conscious of a want of nerve tone. My mind seemed sluggish and I felt a certain falling off in my natural condition of intellectual acuteness, activity and vigor. I pre sume this is the same way in which an innumerable number of other people feel, who like myself are physically below par, but like thousands of others I paid no attention to these annoying troubles, attributing them says: That he is a resident of Miller to overwork, and resorting to a glass of beer or a milk punch, which would for the time invigorate and relieve my weariness.

After awhile the stimulants commenced to disagree with my stomach, my weariness increased, and I was compelled to resort to other means to trouble from the disease since. He find relief. If a physician is suffer- also states that he gave the remedy ering he invariably calls another physician to prescribe for him, as he cannot see himself as he sees others, so I called a physician and he advised totally unable to work, and was bedme to try a bottle of hypophosphates. chemical food with no apparent benefit. My lassitude and indisposition seemed to increase, my food distressed me. I suffered from neuralgic pains in different parts of my body, my muscles became sore, my bowels were constipated, and my prospects for recovery were not very flattering. I stated my case to another physician and he advised me to take five to ten drops of Magende's solution of morphine, two or three times a day, for the weakness and distress in my stomacn, and a blue pill every other night to relieve the constipation. The morphine produced such a deathly nausea that I could not take it, and the blue pill failed to relieve my constipation.

In this condition I passed nearly year, wholly unfit for business, while the effort to think was irksome and painful. My blood became impoverished, and I suffered from incapacity with an appalling sense of misery and general apprehension of coming evil. I passed sleepless nights and was troubled with irregular action of the heart, a constantly feverish condition and the most excruciating tor-"My enlightening friend, here is my tures in my stomach, living for days and, and in after years, when I beon rice water and gruel, and, the digestive functions seemed to be

entirely destroyed. It was natural that while in this condition I should become hypochondrical and fearful suggestions of self-destruction occasionally presentinsatiable desire for sleep, but on retime tormented with troubled reflections, and when at last I did fall into an uneasy slumber of short duration, lieved in twenty-four hours after beit was disturbed by horrid dreams. In this condition I determined to take a trip to Europe, but in spite of all the attentions of physicians and change of scene and climate, I did not improve and so returned home with no earthly hope of ever again being able to leave the house.

Among the numerous friends that called on me was one who had been afflicted somewhat similarly to myself, but who had been restored to perfect health. Upon his earnest recommendation I began the same treatment he had employed but with little hope of being benefitted. At first I ex-perienced little, if any relief, except that it did not distress my stomach as other remedies had done. I continued its use, however, and after the third bottle could see a marked change for the better, and now after the fifteenth bottle I am happy to state that I am again able to attend to my professionable duties. I sleep well, nothing distresses me that I eat, I go from day to day without a feeling of weariness or pain, indeed I am a well man, and wholly through the influence of H. H. Warner & Co.'s Tippecanne. I considea this remedy as taking the highest possible rank in the treatment of all diseases marked by debility, loss of appetite, and all other symptoms of stomach and digestive disorders. It is overwhelmingly superior to the tonics, bitters, and dyspepsia cures of the day, and is certain to be so acknowledged by the public universally. Thousands of people to-day are going to premature graves with these serious diseases, that I have above described, not let your good judgment be gov-erned by your prejudices, but give

the above named remedy a fair and patient trial, and I believe you will not only be rewarded by a perfect restoration to health, but you will also be convinced that the medical profession does not possess all the knowledge there is embraced in medical science."

A. G. RICHARDS, M. D., 468 Tremont street, Boston, Mass.

Singers and public speakers are greatly benefited by using Downs' Elixir, as it removes hoarseness and increases the power of the voice. Take small doses often. Price 35c.,

Baxter's Mandrake Bitters are rapidly taking the lead of all other remedies as a mild cathartic and active tonic. -44

Olivet College has 351 students. Bilious Colic Cured by Rheumatic Syrup.

Wolcott, N. Y., June 18, '82. Rheumatic Syrup Co.:

Gents—A few weeks since, while suffering with bilious colic, which rendered me unfit for business, I was advised to try a bottle of your Syrup. I had no faith in it at all, at that time, for the reason that I had tried so many things in years past without receiving any relief, but before the first bottle was emptied I was feeling better than I had felt for many years. know now, that I have tried it, that it is the greatest remedy that exists in the world, and I feel proud to recommend the Rheumatic Syrup to all sufferers from bilious colic, for I am satisfied it has cured me. Wishing you every success with your most wonderful Syrup, I am sincerely yours, WATTER H. WHITE.

Portland has erected street lamps.

A timely possession of a couple of bottles of Athlophoros enabled Rev. J. E. Sentman, St. Paris, Champaign Co., Ohio, to do quite a work as ed themselves. I experienced an Good Samaritan in his neighborhood. He writes respecting it: "Athlophotiring would lie awake for a long ros has proved highly satisfactory to me. One lady who was confined to her bed with Rheumatism was reginning to take it, and has not had a return of the disease. Numerous inquiries have been made of me for the remedy.

The Ionia reformatory is about full.

# He Felt No Effects.

Uncle Abe was fond of 'possum. Hav-ing caught one, he got his wife Dinah to cook it for him, and requested that it should be placed in the cupboard until morning. The favor was granted, and Uncle Abe lay down before a log fire and went to sleep. His son Mose, coming in late, got the 'possum and ate it, laid the bones down at Uncle Abe's head, smeared the old man's face and hands with the grease, and went to bed. The following morning Uncle Abe awoke and asked Dinah: "Whar's dat 'possum?"

"In de cubberd," which she explored

and found it missing.

Returning, Dinah inquired: "Abe, when did you eat dat 'possum? Dars de bones at yer head, yer face smells ob 'possum and yer han's am greasy.'' "Maybe I did eat dat 'possum, but if I did it did me less good dan any 'pos-sum I eber et."—Nashville Journal.

A German chemist says he can freeze up any man or woman, depriving them of all appearances of vitality, and thaw them out in good condition at the end of two years. There are no volunteers.

A boy near Poughkeepsie took some paint and dye and fixed up a dog to resemble an escaped menagerie leopard. And of course the dog felt bad and hunted up his master and went to sniffing at his heels, and the master went up a tree so quick that it absolutely astounded the dog, who sat down to wait for the old man to descend. It was a cold day; the wind blew and the bare branches rattled and the man shivered and swore for half an hour, till finally the dog barked.—Bodon Post.

Tame Grasses in the West.

In the prairie regions of the great west, for some time after the country is settled, only native grasses are needed. The conditions of a settled country are not congenial to the wild grasses, and while they do remain they are not quite equal in value to the tame grasses. As a rule, tame grasses furnish feed about a month earlier in the spring. and the same length of time later in autumn, than the wild grasses. When the wild grasses begin to dry up in the fall they are tougher than tame grasses with the exception of the buffalo and bunch grasses of the arid region along the eastern slope of the Rocky moun-tains. There is no kind of forage which will fatten cattle faster than our native prairie grasses during the growing season, from the middle of May to the

season, from the middle of May to the middle of August.

Tame hay is more nutritious, but stock usually like good prairie hay better. Tame hay must be made at a season when rains are frequent; while the best time to make prairie hay is in the month of August and the early part of Santowher, when as a rule, but litof September, when, as a rule, but lit-tle if any rain may be expected.

Eastern farmers, when they first come west, think that they could cut their prairie hay early in July, as they have been accustomed to cut tame grass. Wild hay, made early in July, is of poor color and flavor, as well as lackpoor color and flavor, as well as lack-ing in nutritive qualities. All the valu-able wild grasses here are late in blooming. At the time of writing (September 17), Blue Joint and Indian Grass, or Wood Grass, which are considered by farmers two of our most valuable native grasses, are still in full bloom. However valuable the wild grasses may be, the tame grasses are also needed. In the latter part of the growing season

tame grasses furnish a better quality of feed than the wild sorts. The first and simplest mode is to sow tame grass seed, especially Timothy and blue grass, on the native prairie, when it first begins to fall from tramping or too close feeding. This seeding should, if possible, be done early in the spring, on one of the late snows. If the soil, when soft, be well scarified with a sharp harrow, it will increase the chances of a catch. With good seed sown in this way, success is almost certain.

The only kinds of tame grasses that have been extensively tested west of the Missouri, are: Timothy, Kentucky blue grass, and orchard grass. Only red clover and white clover have been grown on a scale sufficiently extensive to justify absolute confidence. Red top has been tried in a few instances with success, but only, so far as the writer is informed, on low and moist land. Of the five first-named grasses, by far the best to stand dry weather is orchard grass. Of twenty kinds of tame grasses sown on the Nebraska Agricultural College farm one very dry spring, or-chard grass was the only one that grew. This grass starts early, keeps through the hottest weather, and is good until hard freezing comes. It is not specially valuable for hay, as it is rather coarse, yet stock seems to like it.—Professor Thompson, of Nebraska, in American Agriculturist.

### In Bermuda.

I have said that courtesy is the rule in Bermuda. Here is a proof of it. At one time during these performances, the crowd surged in front of me, so that I could see only a wall of backs and shoulders. A kindly-faced and sweet-voiced negro woman, perceiving this, touched my shoulder, saying,
"Take my place, lady. You cannot
see." "But," I answered, "if I do,
you will see nothing." "Oh, that does
not matter," she said, with a bright
smile. "The lady is a stranger, but I
have seen the princess a good many
time." times."

Manners in the islands, if not hearts, are exceedingly friendly. Everybody, as a rule, salutes. No man, be he white or black, passes a lady without lifting his hat. Every child makes its little salutation. Negro women, with baskets on their heads, give you a word or a smile, as they go by. Little boys and girls steal shyly up with gifts of flowers or fruit. Nobody is in a hurry, nobody seems to have anything to do; yet every one is well clad, and looks

happy and contented.

Perhaps there is poverty in Bermuda, but squalor and absolute want, if they exist, keep themselves strangely out of sight. The first thing, perhaps, that strikes the visitor, after the beauty of the water and the perfection of the flowers, is the appearance of ease and well-to-do comfort that pervades the islands. There is no rubbish, no dirt, no dust, no mud. Instead of the tumble-down shanties that deform and defile the rest of the world, here the humblest citizen not only dreams of marble halls, but actually dwells in them—or seems to. All the houses are built of the native snow-white stone; a coral formation that underlies every foot of soil. When first quarried, this stone is so soft that it can be cut with a knife. But it hardens on exposure to the air, and so durable is it that a house once builded is good for at least 100 years. That it readily lends itself to architectural purposes is shown by the interior of Trinity church, and by the handsome and massive gateways, with their arches and columns, that one meets at every turn. These, with the well kept grounds, give an impression of affluence and elegance that is, perhaps, some-times misleading. For we are told that there are not many large incomes in Bermuda, and that the style of living in these beautiful and picturesque homes is very simple and unostentations.—Julia C. R. Dorr in December Atlantic.
