The state supreme court decides that railway employes cannot recover damages for injuries sustained while on duty if they fall to exercise a reasonable degree of caution in observing the company's instruc-tions for their safety.

Ole Engen was fatally hurt while wrestling with a friend at Marquette.

The school bar of a Barry county district wants to a school ma'aur was absent attending a teachers' hostitute. A Vermontville couple was suitably rewarded for being married at the Charlotte

fair last week. Forty new ponds are to be added to the. Northville 4sh hatchery. The fish eggs and fry shipped out the past season reach

into the millions. Charlotte gets a \$30,000 furniture factory which will employ fifty men at the start, A \$5,000 bonus was what captured the

Burglar Breaks into a Convent DETROIT, Oct. 10.-Shortly before 4 o'clock Saturday morning Sister Theresa of the Convent of the Sacred Heart awoke to find a shoeless, hatless, and coatless burglar in her room. She immediately gave alarm, and before the fellow could es cape fifteen nuns in night attire were chasing him about the building. He was cor-nered and held by them, but finally by biting, scratching, and tearing, managed to get away and leaped from the second-story window to the ground and escaped.

### TWO STUDENTS SHOT.

They Trespassed Upon a Farmer's Land After Being Warned.

LAWRENCE, Kan., Oct. 11.-Fred Bassett, a farmer, shot and seriously wounded E. Higgins and Jack Cracoft, students of the Kansas university, because they walked across his land which he had warned all the students to keep off of. Both were members of the University foot ball team and returning home from a practice game. The shooting was done with a double barreled shotgun. Higgins' wounds are probably fatal, his left hand and arm being torn away and a number of shots lodged in his left breast. Cracoft is shot in the right leg but will recover. Bassett has been arrested and acknowledges that he did the shooting.

#### Killed by a Bear.

LISBON, Oct. 11.-A grizzly bear escaped from the bear pit in the Zoological garden Monday afternoon. The garden was full of vistors and the keeper made desperate efforts to keep the beast from them. The bear threw him down, tore open his throat and stomach, and then left him dying, to overtake the fugitives. Two visitors fell, and the bear was teering them? when six members of the Municipal guard arrived. The bear was shot three times before it was killed. The two visitors lacerated by the bear are in a critical condi-tion. The keeper is dead.

### The Toledo Boodling Case.

TOLEDO, Oct. 11.-The trial of Councilman Daly on the charge of boodling was resumed Tuesday morning. The defense cross-examined R. P. Swain, the councilman who turned state's evidence, but very little information was gained. Swain gave the dates, amounts, etc., agreed upon by the combine and gave as a reason for with-drawing from it that he had concluded that it was not right. Councilman Felker testified that he attended two meetings of the combine and was satisfied he should not become a party to the deals.

LIVE STOCK AND PRODUCE MARKET.

CHICAGO, Oct. 11. Edlowing were the quotations on the board of trade today: Wheat — October, opened 735,c, closed 725,c; December, opened 755,c, closed 755,c; May, opened 815,c, closed 825,c. Corn—October, opened 425,c, closed 425,c; May, opened 435,c, closed 435,c; May, opened cember, opened 455c, closed 455c; May, opened 475c, closed 465c. Oats—October, opened +-, closed 295c; December, opened 325c, closed 355c, closed 355c, closed 355c, Pork—October, opened \$11.30, closed \$11.20; November, opened \$11.30, closed \$11.20; January, opened \$12.50, closed \$12.25; Lard—October, opened \$8.36, closed \$2.375c.

Elder Berry is the significant name of a OF WHAT THE M'KINLEY LAW HAS DONE FOR US.

> New Markets Opened, Prices Advanced, Business Quickened-The Farmer, the Manufacturer and the Workman Benefited.

[Special Correspondence.] Washington, Sept. 5. - Secretary Foster, of the treasury department, found a pleasant surprise awaiting him when he returned from Ohio. The chief of the bureau of statistics, although the weather has been very hot, had been rattling around among his figures while Secretary Foster was away, and was able to give him some interesting information about the effects of the Mc-Kinley tariff which even surpassed the expectations which Secretary Foster had formed as to the wonderful success of that measure and the remarkable prosperity of the country under it.

"It is a wonderful showing," said Mr. Foster reflectively, as he leaned back in his office chair and looked again at the totals and comparisons which Mr. Brock had laid before him. "I wonder what the tariff reformers can say to this. It is worth more than volumes of assertions based on theories. It shows that the last congress, when it revised the tariff, did its work intelligently."

"What years are taken for purposes of comparison?" asked the correspondent.

"The fiscal years ende ! June 30, 1890, and June 30, 1892. During the entire year ended June 30, 1890, the tariff of 1883 was in operation, and during the mtire year ended June 30, 1892, the ariff of 1890 was operative."

"Can you give me a summary of the results of the comparison?" "Yes, here it is:

REVENUE INCREASED. "First-The revenue has been inreased \$51,367,650.

"Second-There has been an increase in the total value of our foreign commerce of \$210,540,510, as compared with 1890, and an increase of \$400,357,384 over the annual average of the ten years prior to 1891.

INCREASED EXPORTS. "Third-In 1892 the exports for the first time in our history exceeded a billion dollars, being \$1,030,278,030, which was \$172,449,346 more than in 1890, and \$265 142,533 in excess of the average annual value of exports for ten years prior to 1891.

"Fourth-The increase in exports of cotton over 1890 was \$7,492,449, and \$36,-772,912 over the annual average for ten years.

"Fifth-The exports of breadstuffs of 1892 exceeded the value of the same exports in 1890 by the sum of \$144,437,190, and exceeded the average annual value for the ten years prior to 1891 by the sum of \$131,206,224.

"Sixth-The value of the exports of provisions in 1892 exceeded the value of like exports in 1890 \$4,097,653, and the average annual value for the ten years prior to 1891 by the sum of \$37,703,482. "Seventh-The exports of cattle, sheep

and hogs in 1892 exceeded the value of like imports during 1890 by the sum of \$3,211,031, and exceeded the average annual value of the same exports for the ten years prior to 1891 by the sum of

GOOD FOR THE FARMERS. "Eighth-The combined value of exports of cotton, breadstuffs, provisions, cattle, sheep and hogs, all classed as agricultural products, of 1892 exceeded these exports of 1890 by the sum of \$159. 238,323, and exceeded the average annual value of the ten years mentioned by the sum of \$215,965,639.

"Ninth-The exports of all other products in 1892 exceeded those of 1890 by the sum of \$11,199,860, and exceeded the average annual value of such exports for the ten years prior to 1891 by the sum of \$49,420,063.

"Tenth-The exports of manufactures in 1892 were \$8,384,357 in excess of light exports in 1890 and \$39,906,294 in excess of the annual average value of the ten years prior to 1891.

BALANCE OF TRADE FAVORABLE. "Eleventh-The value of our imports in 1892 exceeded the value of the same in 1850 by the sum of \$38,091,164 and the average annual value of the ten years prior to 1891 by the sum of \$135,-215.052.

"Twelfth-The value of free imports in 1892 exceeded the value of like imports in 1890 by the sum of \$192,332,143, and there was a decrease of dutiable imports amounting to \$154,240,979.

INCREASED FREE LIST. "Thirteenth-The value of the free imports and also the percentage of the same in 1892 were the largest in the history of our commerce, so that trade is freer than ever before, and largely of such articles as are not produced in this country and which enter into the daily consumption of the people.

REDUCED TAXES. "Fourteench-The duty collected per capita of the population in 1892 was \$2.67, which was less than for any year since 1863 and 9516 cents less than the annual average for the ten years mentioned.

"Fifteenth-There was a decrease in the imports of the manufactures of wool of \$21,016,558, of \$18,255,618 in imports of manufactures of iron and steel; in manufactures of silk of \$7,513,430; in manufactures of flax and hemp, etc., \$2,136,062; in manufactures of cotton, \$1,594,330; in tobacco, \$1,176,411—a total decrease of \$46,692,454, thus giving increased employment to persons engaged in these manufactures in this country and retaining many millions of dollars at home. THE FARMERS' INCREASED HOME MARKETS.

"Sixteenth-By virtue of the new tariff the importations of horses, sheep, cattle, barley, oats, oatmeal, rye, eggs, vegetables, hops, flaxseed and tobacco during the year 1892 were \$20,041,495 less than in 1890, and that much more home market was given to our farmers. "Seventeenth-The value of our ex-

Chronic Diseases.

The doctor treats no acute diseases, but devotes his whole time to the treatment of chronic and long standing and surgical diseases; cases given up by other doctors and pronounced incurable, he most desires to see. Dr. Humphrey has had nearly 3,000 cures in the state of Michigan, while his patients all told in Minnesota, Wisconsin, Illinois, Alabama, Tennessee, Georgin, Ohio and Indians, have been fully five times that number; nearly two-thirds of these sufferers were given up as hopeless invalids, some to be blind, some deaf, and others a prey to scrofula, chronic kidney disease, consumption, destructive female troubles.

ease, consumption, destructive female troubles Among others, hundreds of children hopeless ly deformed. But behold how many of then see and hear, while nearly all are rapidly

The doctor is surrounded with the finest an

most extensive collection of instruments ever imported to this country for examining and treating all forms of chronic allments of the head, face, eye, ear, throat chest, lumas, heart, stomach, liver, spleen, kidneys, bowels, reproductive organs, urinary organs, brain and nervous system, paralysis, growths, joint diseases, piles, bip diseases, sciatica, skin diseases, ulcers and every form of weakness of either major female.

male or female.

The doctor a specific medicines go straight to the diseased organ, and can be plainly felt at work in the diseased parts very shortly after their use is began. They are pleasant to take, mild but searching in action, yet agree with the most delicate lady or child, do not reduce the strength, and can be used while at the usual cosupation, as many patients still able for hard work at delicate attenues or business are often slowly, surely, yet unconsciously dying, knowing themselves lil, yet deceived into a false security, they permastinate and put off the matter until the case is rendered meurable. The doctor carnestly requests all persons under treatment to write him often, as advice may be necessary week after work in order to push any given case on as rapidly as possible, and a rood common-sense statement on the part of the patient by mall is the next thing to a personal consultation.

Facts for Men of All Ages.

JOHNSON'S BAKERY

IN OWOSSO ONE DAY FRIDAY, OCT. 14. OFFICE at the WILDERMUTH HOUSE.

# IMPORTANT TO INVALIDS.

# DR. HOLMANS. HUMPHREY.

Late of LONDON, now of CHICAGO, with a Branch Office and Laboratory at HILLSDALE, MICH., Has Visited Southern Michigan for the past Year, and during these visits has examined and prescribed for hundreds, and effected some of the most Wonderful Cures ever made in the State.

Ask your friends and neighbors about Dr. Holman S. Humphrey. There is scarcely a neighborhood in the county that has not had the benefit of the doctor's wonderful skill, and rarely a family which has not had one or more of its members snatched from death and restored to health after all hope had been given up and the family physician had pronounced the case incurable. If afflicted do not fail to consult this most eminent physician and surgeon. All examinations, consultations and advice free.

## Examination Free to All.

Although the doctor is in many cases compelled to use expensive instruments and chemicals in making analyses, micro scople and other scientific examinations yet be makes no charges to anyone, believ ing it to be a part of the physician's duty to ascertain the patient's true condition without expense to the sufferer. When ever and wherever Dr. Humphrey decide to locate a monthly visit crowds flock to see him, and no wonder, for by the first examination, and often without asking a question, he tells the invalid what the trouble is, and the prospect of a cure, and most wonderful of all he values his first muression and first look at a patient mo impression and first look at a patient more than all else, and Dr. Humphrey is never mistaken in his diagnosis in any case.

The doctor's methods differ markedly from the general practitioner in all respects. Following the plan of St. George's Hospital of London he registers every particular as to the patient's physical condition and mental state. The condition of each organ, location of any and all diseased parts, and whether sympathetic or organic together with the amount and nature of the disease. In this way the cutire amount of vitni energies are readily computed and the restoring power of the body measured against the force and energy and destructive capabilities of the disease. Thus knowing the actual condition of the tissues and the effect of specific medicines upon every structure of the body, unlike most doctors, he is enabled to say positively whether any given case is curable or not, and can also give the approximate time and expense of treatment, and would here point out the utter delusion cherished by many patients that they ought to get well in a few days or weeks, notwithstanding the fact that they have suffered for years. than all else, and Dr. Humphrey is never

# Dr. HOLMAN S. HUMPHREY

Cures after all others Fail.

Many diseases are so deceptive that hundreds are alling with dangerous, yet insidious, maladies, all unconscious of their true condition. They know they are not well, but are entirely ignorant of the deadly fangs fastening upon some vital organ, which must sooner or later utterly destroy them unless rescued by a skilled hand. Are you afflicted? Your case may be easily curshle now, but remember, every moment of neglect brings you nearer the day when an incurable stage may supervene, when the most skillful rhysician can render you no assistance. The present is ours. The future may be TOO LATE. By reason of false modesty the youth of our land are kept in gnorance of the serious results which certain solitary and indiscree practices produce. These vices if persisted in eventually undermin

A Life of Experience and Opportunity. At life of Experience and Opportunity.

Dr. Humphrey's entire life has been devoted to the study and worl of his profession, and is rich in practical experience in hospital, dispensary and private practice, and many of the truly wooderful things he has seen and done, if told, would read more like fletion that sober truth. In the great bospitals of Europe his opportunities have been second to no living man's; not only so, but he has thoroughly traveled, and his views of life, disease, etc., are so broad and cosmo politan that like a Gould or a Vanderbilt in railroad business, he keeps watch of and overlooks the entire medical world constantly. The methods of McKenzle, Virchow, Pasteur, Koch, Brown-Sequerd M. Bergeon, Fothergill, Bernard, etc., are as familiar to him as themselves, and while ever ready to grasp and retain a fact, he holds fast to old friends tenaciously, and makes new ones cautiously, experience having long since proven that one old truth well applied is worth a dozen conjectures however plausible.

Latest Discoveries and Improvements,
Dr. Humphrey is the only physician who
has had the special advantage of European
hospital studies in microscopy of the blood
and tissues, who carries with him a full line of
instruments and apparatus for making strictly scientific examinations of the various textures and secretions of the body, as the urins,
blood, discharges of any kind, catarrhal secretions, etc., etc., which examinations are now
considered indispensable to a correct diagnosis
in all forms of obscure and chronic diseases.
As very few doctors outside the large cities are
thus prepared with costly outfit of microscopic
and other essential instruments for making a
strictly first-class diagnosis in many cases, the
affileted would do well to call upon the doctor
and get his opinion and learn whether the
doors of hope are yet open or forever closed Latest Discoveries and Improvements,

or organs has taken place, as to affect the proper function of said organ and finally break down the actual structure itself. Even in some cases when this has happened unusual skill may stop the destructive operation, stay the inronds of the disease, and the hadient a comfortable see.

such as have baffied the skill of all other physicians and their remedies, Dr. Humph-rey quickly cures. Cancers, tumors, fibroid and polypoid growths cured without the use of the knife or caustics. No cutting, no pain, no dancer.

Mauhood Perfectly Restored.

practices produce. These vices if persisted in eventually undermine the constitution, induce nervous debility and early decay, organic weakness, premature loss of the manly powers, involuntary loss of vital fluids, general prostration, and oftentimes inbecility and chronic epilepsy. Of all maladies afflicting mankind there is probably none about which the common family doctor in general practice knows so little, yet no sufferers need the attention of the experienced specialist more than these, and here we have to minister to a discussed body, a discussed mid. and imaginations filled with morbid desires and fearful apprehensions. Dr. Humphrey's unparalleled success with those unfortunates arises not only from the fact of the most scientific and specific medication known either in this or any other country, but also to the fact of the direct influence of his powerful will upon the peculiar mental depression always found in such cases, by which he is enabled to infuse a part of his own energy into their honeless lives. Were not all such cases held in the most sucred confidence the doctor could print letters from thousands of grateful patients who have been cured, and are to-day perfect men, physically and mentally. Disease or debility of the reproductive organs of either sex rapidly destroys the energies of both body and mind, robs the step of its elasticity, dims the bright eye, pales the check, develops cowardice, and often destroys the brightest intellect. The reproductive function is the mainspring of animal life—preserve it at all hazards. tence, lost manhood, spermatorrhoes, losees, weakness and nervous debility, also for prostatitis, varicoccle and all private diseases, whether from imprudent habits of youth or sexual excesses in mature years, or any cause that debilitates the sexual functions, speedily and permanently cured. Consultation free and strictly confidential. Absolute cures guaranteed. No risk incurred.

Persons unskillfully treated by ignoran protenders who keep trifling with them month after month, giving poisonous and injurious compounds, should call and see the doctor.

Wonderful Cures by my improved met of treatment accomplished in nervous debil premsture decline of manly powers, and kin affections, which have been neglected or skillfully treated. No experiments or failu Patients treated by mail and medicines a by express. Personal consultation prefers we guarantee curable cases.

Free Urinalysis (Examination of Urice).—All persons suffering with obscure diseases, or suspected kidney affections, would do well to ring from two to four ounces of the first urine passed in the morning for examination. While Dr. Rumphrey's permanent address is hierage, Ill., owing to the large number of patients in Southern Michigan and Northeastern Indiana and Ohio, he has located a branch fifee and dispensary at Hillsdale. Michigan, where all letters from this section can be addressed. Cor. North and Broad Sts.
