Many communities in South-west Oklahoma will need to buy either grain or hay this year, while a few places in the same region are either grain or hay to sell. Eastern and northern Kansas have both grain and hay for sale.

But it has been the custom for those who have nothing for sale to jump to the higher center markets. Continuing this, eastern Kansas would send all the surplus hay in grain produced in Old Town to St. Louis, Memphis and Kansas City. Thus western Oklahoma would have to buy it from those places.

We are hoping, on account of saving in use of cars, to help people to find hay and grain for western Oklahoma before it leaves the station near which it was produced.

This can be done if our patrons will make their wants known. The men who are working for the Department of Development of the Frisco will help buyers to find products needed, and they will also help people to find a nearby market for their surplus.

Coming This Way.

An announcement is made that on Monday Oct. 22, Ringling Bros. circus will give afternoon and night performances at Chickasha.

The famous showmen are this season presenting an all new and wonderful program. The tremendous fairland spectacle, "Cinderella," will appeal to both young and old. More than 1,000 persons take part in it. It is easily the biggest spectacle Ringling Bros. have ever staged and its glorious "Ballet of the Fairies," with 300 dancing girls, is in itself worth going many miles to see. Following "Cinderella" 100 arena artists appear in the main tent program. The Ringlings have secured scores of circus performers never before seen in America. An entire trained animal show has been made a part of the main tent program this season. The menagerie now numbers 1000 wild animals. The elephants, including Big Bingo, the earth's largest pachyderm, have increased to 41 and almost 800 horses are carried. There will be 60 clowns and a big free three-mile street parade show day morning.

Feterita—A Day

Year Friend

Wherever we see late-planted feterita this year, it is showing good results.

While this crop really does well in years of abundant moisture, the seed is so tender that under conditions which usually prevail in April and May it is hard to get a stand of feterita when the seed of kafir and milo may give good results. But when seeding conditions are so extremely unfavorable that all our grain sorghums fail, except those planted after June 1, we often find feterita heading the list of late-planted crops. Some of the best crops of feterita we have seen were planted after July 1st. We have not seen any impressive yields of feterita, but when it has a chance to make a quick growth in summer, it makes a grain crop which is cheaply produced, and which is dependable.

By many, the feeding value of feterita is thought to be very low but I have seen it used profitably for fattening hogs.

Fighting Of Tamales.

Seven years ago a famous European student of history prophesied that the next great war of the future would not be won by fighting but by famine. We are today fighting that war and famine is indeed threatening to be the arbiter.

The men of England, Scotland, Ireland, France, Italy, and Belgium—our allies—are fighting; they are not on the farms. The production of food by these countries has therefore been greatly reduced. Even before the war it was much less than the amount consumed. The difference came more largely from other countries. They must now come from America. Therefore, our wives depend on us for food as they have depended before, and they ask us for it with a right they never had before. For today they are doing the fighting, the suffering and dying—in our war.
