Thirty Feet of Danger

The intestines bend and twist and turn on themselves—more than thirty feet of them—and when food waste clogs them up, irritating and dangerous poisons are formed and carried by the blood through the system.

Remove this food waste regularly with Nujol—the modern method of treating an old complaint.

DON'T DESPAIR

If you are troubled with pains or aches; feel tired; have headache, indigestion, insomnia; painful passage of urine, you will find relief in

GOLD MEDAL WARMER OIL CAPSULES

The world's standard remedy for kidney, liver, bladder and uric acid troubles and National Remedy of Holland since 1695. Three sizes, all druggists.

Look for the name Gold Medal on every box and accept no imitation

Liggett's Kings

KING PIN PLUG TOBACCO

Known as "that good kind"

Try it—and you will know why

LUNGARDIA is "without a rival" in ordinary or deep-seated Coughs and Colds, difficult breathing, and for the relief of Whooping Cough.

The wonderful results following its use will astonish you and make you its life-long friend. Your money back if you have ever used its equal. Danger lurks where there is a Cough or Cold. Conquer it quickly with LUNGARDIA. Safe for all ages. 60¢ and \$1.20 per bottle. Manufactured by Lungardia Co., Dallas, Texas. For sale by your favorite druggist.

ITCH!

Money back without question if HUNT'S GUARANTEED SKIN DISEASE REMEDIES (Hunt's Salve and Soap), fail in the treatment of Itch, Eczema, Ringworm, Tetter or other itching skin diseases. Try this treatment at our risk. Sold by all reliable druggists. A. H. Richards' Medicine Co., Sherman, Texas

The Height of Deception.

"Why were you not suspicious of that thief who grabbed a tray of diamonds and darted out of the door?"

"He disarmed suspicion," said the Jeweler.

"How?"

"He said he wanted to look at some engagement rings, and the fellow acted the part so well he actually stammered and turned red."—Birmingham Age-Herald.

Lost a Sale.

"I want," said the very plain girl, "a book entitled 'Cultivate Your Natural Beauty.'"

"Here it is," said the clerk, who wanted to be sociable. "Are you getting it for a friend?"

And the very plain girl put her purse back into her bag and went right out.—From the Retail Ledger, Philadelphia.

Tit for Tat.

Jack—So you broke the engagement?
Tom—Yes, but not until after the engagement broke me.

A man imitates his thoughtlessness almost as much as he does his sins.

Strongest rope is made of cotton.

RODENTS HARM FRUIT TREES

Meadow and Pine Mice Begin Work of Destruction Early in New England States.

(Prepared by the United States Department of Agriculture.)

Rodents in New England, chiefly meadow and pine mice, have begun their fruit-tree work early this year, according to an investigation now being conducted by the Biological Survey, United States Department of Agriculture, and are levying a heavy toll upon the orchards of that section. More than \$1,000,000 worth of fruit trees, it is estimated, were destroyed in New England alone by field mice during the winter of 1919-20, and while the damage this winter may not measure up to that record, apparently it promises to be heavy.

A representative of the department has been making an extended trip

Apple Tree Injured by Meadow Mice.

throughout the section, conferring with extension service workers, investigating conditions, and placing in the possession of local authorities the department's suggestions for dealing with the menace. In Maine, for instance, it has been found that next to severe winter weather, mice have inflicted more damage to orchards than any other agency. Ten years ago there were, according to the census, 4,521,739 apple trees in Maine orchards, while in 1920 there were 3,345,521, much of this decrease no doubt due to the severe winter of 1917-18. It is estimated that 112,500 young trees were killed by mice in 1911. In New Hampshire mice have given the apple industry a severe setback during the past decade. In Massachusetts, orchardists reported losses two years ago from mice totaling \$125,000, this amount not covering the entire loss, because some orchardists did not report. In one Connecticut orchard of more than 350 acres damage by rodents during the winter of 1919-20 is conservatively placed at \$10,000.

The mice, of these two varieties, strip the bark from the trees above ground and from their roots below the surface. An active campaign is under way in many sections which, if continued, will help check the rodents' depredations.

CARE FOR SPRAY MATERIALS

Fruit Growers should Guard Against Injury by Freezing, Loss of Moisture, Etc.

(Prepared by the United States Department of Agriculture.)

Most fruit growers have insecticides left over because of the late freezes last spring, which killed fruit buds in the middle northern belt. In storing this for the winter, says the United States Department of Agriculture, care should be taken to prevent these being injured by freezing, loss of moisture by evaporation, etc. Liquid lime-sulphur should be stored where it will not freeze and care should be taken to see that the barrel is tight. This is especially important if the material is stored in the house cellar, as the smell of the stuff is very disagreeable. Even under the best conditions this material is liable to deteriorate, and should be tested before being used in the spring. Dry lime-sulphur will not be injured, but should be stored in tight containers.

Powdered lead arsenate should be kept in a dry place. If in paste form, it should have water poured over the top, and should be kept where it will not freeze. With all poisonous insecticides, it is important to place them where neither children nor farm animals can get at them.

SLOW GROWTH OF PEAR TREE

If Given Same Treatment That Apple Receives It Would Not Bear Particularly Well.

It is common to see pear trees which are of smaller size than apple trees of the same age. A pear tree forty years old may still be rather small. This is as it should be, for if given the same generous treatment that apple trees usually are given, the pear trees would grow too rapidly and not only would not bear particularly well but would be more likely to be killed by that enemy of pear trees—fire blight.

Those who grow pear trees in blue grass sod seem to have better success than others who do not allow the sod to grow around them.

Trimming Plays Important Part

Artistic Decorations on Clothes Give the Distinctive Touch That Appeals.

MANY CHANGES IN FASHIONS

New Ideas in the Construction of Apparel Do Not Lie in Outline of Garments But in Unusual Embellishments.

Wherever dress is discussed one hears the assertion, "There is nothing new." To the casual observer, there is little that is new. From a walk along a fashionable thoroughfare one gathers the impression that clothes are much the same as they were last year.

But the close observer, the one who really is interested in the fashions will see that there are changes—many of them—and that these changes are clever and subtle. They do not lie in the outline of the garments, but in unusual trimmings. It requires much less effort and ingenuity to bring out a silhouette that is attention attracting than to evolve a beautiful and original decoration.

Today the clever dressmaker buys only a small percentage of her trimmings ready made; she creates decorations suitable to the model she is designing, often using nothing but the material from which the dress is made.

This is an old idea. Our grandmothers depended largely upon ruffings, pleatings and flutings to enhance the beauty of their costumes, and it is from these old-time trimming ideas that the present-day self-trimming, as it is called, emanates.

Trimming of Self Material.

There was nothing artistic about the evenly pleated or fluted ruffles. Every dressmaker used them and stitched them to the dress with great exactness. Vastly different are the delicate hand-made trimmings of today, carefully tacked here and there.

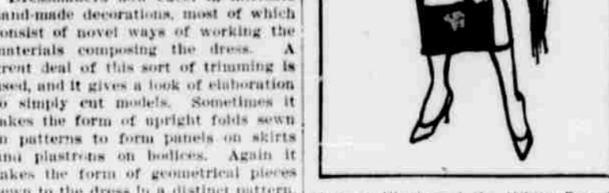

Dressmakers now excel in intricate hand-made decorations, most of which consist of novel ways of working the materials composing the dress. A great deal of this sort of trimming is used, and it gives a look of elaboration to simply cut models. Sometimes it takes the form of upright folds sewn in patterns to form panels on skirts and plaistons on bodices. Again it takes the form of geometrical pieces sewn to the dress in a distinct pattern.

Another unusual form of trimming consists of narrow tabs embroidered in self-tone, and still another interesting effect is produced by small leaflike points and narrow strips cut from two layers of material pasted together. This makes it possible to use the raw edge.

These tabs and strips are tacked to form a design. Sometimes the edges are finished with a line of water color paint, or again, there is a tiny metal ball, usually steel, sewn to the tip.

Colors Relieve Sombre-Hued Dresses.

The most lavish user of self-trimmings is Madame Renee, of Paris. She

Here is illustrated the White Broad-Cloth Suit Trimmings With Black.

Over the shoulders falls a scarf of the satin in shawl effect. This, as well as the skirt, is lined with orange-colored silk, and one end of the shawl is fringed with orange. The bodice is embroidered with steel beads and silver threads. Slippers of orange and silver brocade are worn with this costume.

Braids Enliven Furs and Frocks.

Among the many details that go to make up the winter fashions are cut-out designs of cloth appliqued to frocks of sheer fabrics. Lacy appliques spread over the shoulders and down the length of the skirt, forming sleeves of many of her frocks. Usually she selects cloth a few shades lighter than the gown itself. This idea is not new, but, nevertheless, it is much in use.

There is a penchant for sparkling effects in dress and, consequently, these cloth motifs often are covered with a cut-work of steel beads, or embroidered in glistening metallic threads.

Other glistening trimmings are the braids that have the glistening white appearance of bright new silver. Even furs are enlivened by inserts of such braids. Perhaps it is the liking for glistening ornamentation that has brought materials shot with gold into so much prominence.

Foliage Trims Mid-Winter Dresses.

On black dresses star trimmings are made by glistening points of jet, and simple black velvet gowns have bushes, trains and panels lined with silver and brightly tinted metal cloths. Incrustations of rhinestones also are used on black velvets. This combination is especially popular at the house of Worth. One of Worth's best models is of black velvet practically covered with an incrustated pattern of rhinestones.

Leaves and flowers are very important trimmings, especially when used as girdles. In many instances they are formed of cloth or silk. A wreath of realistic autumn leaves, made from wondrous shades of red and brown silks is extremely effective on a silk frock in a soft shade of green. Pinkish lavender chrysanthemum girdle an informal evening gown of mauve colored crepe. Very effective trimmings in the form of flowers or pom-poms are made of fine fringes.

Colors for the evening are brilliant. There is many a woman with a liking for bright colors who, while unwilling to make herself conspicuous by wearing them on the street, will be quick to take advantage of the prevailing vogue for bright-hued clothes in the evening.

Particular emphasis is laid on the fuchsia tones, these ranging from the deep blues and violets shades to those so light that they verge on pink.

The Black Suit With Inserts of White Fur in the Sleeves.

does marvelous things with materials, working out intricate designs in silks, cloths and velvets.

An example of one of the simpler methods of trimming with strips of the material is in chemise frock. It is of maroon-colored crepe de chine adorned with interlacing strips of the silk.

A dress from Margaine Lacroix, with innumerable strips of the cloth form a ladder-like device. The trimming bands are made separately and then loosely sewn to the gown. The girdle also is constructed in this way.

This frock is a confirmation of the tendency to relieve dark clothes with bright colors, the model being a black broadcloth, with the cascading side panels and the sleeve tabs of Chinese green silk, a shade which is one of

fashion's favorites just now. It not only is used extensively as a trimming, but takes a prominent place in foot-wear. Slippers of Chinese green brocade are smart with either black or white evening gowns.

Metal Cloth Sparkling With Color.

Jenny achieves the unusual through a scarf yoke and a girdle of silk flowers, both of the material which forms a straight-line dress. The scarf yoke is a feature with Madame Jenny. She makes it do many new tricks, such as forming sleeves or a train. In this instance it makes a panel back.

Shawls, which still hold their place in the sun, frequently are called upon to do duty as trimmings, and there is no doubt that they make one of the most graceful decorations.

Margaine Lacroix uses the shawl idea with excellent effect in a frock composed of silver cloth and taupe satin. The skirt, which is long and uneven at the bottom, is of the satin. This is attached to a straight bodice of silver cloth tinted with orange. These tinted metal cloths, which are new this season, are soft and supple. They also come in all the violet shades, as well as wonderful raspberry reds.

CHOICE BETWEEN TWO LOVES

Can One Wonder That Malvina Turtledove Hesitated When It Came to a Showdown?

Malvina Turtledove wept bitterly. Those dear, bright blue eyes were in danger of being washed clearer and bluer—

—"I."

—She was in love!

Then she dressed hurriedly. In preparation for Jack's expected visit. Promptly at eight he arrived.

"Jack," she breathed, "I am so worried."

"My pet, my angel, what is it?" asked Jack, in great concern.

"I have got to give one of you up, and I don't know which I love best. Can't I?" the maiden wept.

"No!" returned Jack, determinedly. "You must choose between us—be or I!"

"Jack," she wept, "show me some mercy!"

But he showed her none, and so, with a last look of love, Malvina threw her Pomeranian, Bob, out of the window and said:

"Jack, I am yours!"

Sour Milk Called Life Elixir.

The elixir of long life consists of soured cow's milk, cheese made from sheep's milk and white bread, according to Dr. Sadowicz, professor of physical chemistry at the University of Kiev. He has found a village in the mountains near Taur Khan, Shura, the new capital of the Dagestan republic, where 18 men out of a population of 120 are more than 100 years old. Investigations showed they ate the above named foods exclusively.

Many persons transported there from the fertile regions of Central Russia are migrating into the mountains, where this food is to be had in abundance.

Couldn't Fool Him.

An Indianapolis woman was visiting her three-year-old grandson, and one day saw him standing before the mirror looking at himself, and saying:

"Yes, that's me."

"Thomas," said grandmother, "you should say, 'That is I.'"

"Well, it might be I, but it looks like me."

About two-thirds of a man's friends would fall to stand the test.

The moral of a dog's tail is that it invariably points to the past.

USE SLOAN'S TO WARD OFF PAIN

LITTLE aches grow into big pains unless ward off by an application of Sloan's Liniment. Rheumatism, neuralgia, stiff joints, lame back won't fight long against Sloan's Liniment.

For more than forty years Sloan's Liniment has helped thousands, the world over. You won't be an exception. It certainly does produce results. It penetrates without rubbing. Keep this old family friend always handy for instant use. Ask your neighbor.

At all druggists—35¢, 70¢, \$1.40.

WINTERSMITH'S CHILL TONIC

NOT ONLY FOR CHILLS AND FEVER BUT A FINE GENERAL TONIC.

W. N. U., Oklahoma City, Ne. 52-1921.

That You May Understand

This being an age in which business and professional activity is developed on getting the confidence of the people, we, the Licensed Chiropractors of Oklahoma, are going to talk to you through publications and tell you many things you are interested in knowing. In order that you may intelligently seek health and when you succeed in finding it that you follow the Golden Rule and pass the information on to others.

A Golden Rule Thought

The sure way to find happiness is to help others find it. You believe in boosting everybody who is doing good work for mankind. Licensed Chiropractors all over the state are being heralded as the wonder workers in restoring people to health.

It is the folly of follies to pass our opinions unless we really know something about the subject. Everyone who knows about Chiropractic is in favor of it and they are complying with the Golden Rule and passing the information on to others. In this way they help others to find health through this wonderful method of healing, which pleases them and makes you happy because you have brought people together who need each other.

Watch for articles that will explain this wonderful science, also talk with a Licensed Chiropractor in your town. They may save you from an operation or other serious trouble. Chiropractors are now licensed by our Great State and are therefore legally as well as professionally in position to serve you.

EDUCATIONAL COMMITTEE

For All The Ills of All The Family

Every standard drug or medicine, every kind of special preparation that has proved effective; every kind of health accessory needed by the average person—may be had at your drug store or general store in a "V.V." brand. "V.V." means Freshness, Strength and Quality—the Best. Insist on "V.V." medicines and accessories.
